WARNING
To prevent fire or shock hazard, do not expose the LCD Projection TV to rain or moisture.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

ATTENTION
RISQUE DE CHOC ELECTRIQUE,
NE PAS OUVRIR

PRECAUCION
RIESGO DE CHOQUE ELECTRICO
NO ABRIR

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK,
DO NOT REMOVE COVER (OR BACK).
NO USER-SERVICEABLE PARTS INSIDE.
REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

This symbol is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

CAUTION
To prevent electric shock, do not use this polarized AC plug with an extension cord, receptacle or other outlet unless the blades can be fully inserted to prevent blade exposure.

Note on Caption Vision
This television receiver provides display of television closed captioning in accordance with §15.119 of the FCC rules.

Owner’s Record
The model and serial numbers are located at the rear of the LCD Projection TV, below the Sony logo, on the sticker, and also on the TV box (white label). Record these numbers in the spaces provided below. Refer to them whenever you call upon your Sony dealer regarding this product.
Model No.________________________
Serial No.________________________

Note to CATV system installer
This reminder is provided to call the CATV system installer’s attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

Use of this television receiver for other than private viewing of programs broadcast on UHF, VHF, transmitted by cable companies or satellite for the use of the general public may require authorization from the broadcaster/cable company and/or program owner.

NOTIFICATION
This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference with radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antennas.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that any changes or modifications not expressly approved in this manual could void your warranty and your authority to operate this equipment.

This document is for the remote control RM-Y913.
MODEL: KF-42WE610, KF-50WE610, KF-60WE610
Please keep this notice with the instruction manual.
Safety

❑ Operate the LCD Projection TV only on 120 V AC.
❑ The plug is designed, for safety purposes, to fit into the wall outlet only one way. If you are unable to insert the plug fully into the outlet, contact your dealer.
❑ If any liquid or solid object should fall inside the cabinet, unplug the LCD Projection TV immediately and have it checked by qualified service personnel before operating it further.
❑ If you will not be using the LCD Projection TV for several days, disconnect the power by pulling the plug itself. Never pull on the cord.

For details concerning safety precautions, see “Important Safeguards” on page 4.

Installing

❑ To prevent internal heat buildup, do not block the ventilation openings.
❑ Do not install the LCD Projection TV in a hot or humid place, or in a place subject to excessive dust or mechanical vibration.
❑ Avoid operating the LCD Projection TV at temperature below 41°F (5°C).
❑ If the LCD Projection TV is transported directly from a cold to a warm location, or if the room temperature changes suddenly, the picture may be blurred or show poor color. In this case, please wait a few hours to let the moisture evaporate before turning on the LCD Projection TV.
❑ To obtain the best picture, do not expose the screen to direct illumination or direct sunlight. It is recommended to use spot lighting directed down from the ceiling or to cover the windows that face the screen with opaque drapery. It is desirable to install the LCD Projection TV in a room where the floor and walls are not of a reflective material.

**Important Safety Instructions**

1) Read these instructions.
2) Keep these instructions.
3) Heed all warnings.
4) Follow all instructions.
5) Do not use this apparatus near water.
6) Clean only with dry cloth.
7) Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11) Only use attachments/accessories specified by the manufacturer.
12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13) Unplug this apparatus during lightning storms or when unused for long periods of time.
14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15) Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.

---

**Important Safeguards**

For your protection, please read these instructions completely, and keep this manual for future reference. Carefully observe and comply with all warnings, cautions and instructions placed on the set or described in the operating instructions or service manual.

**WARNING**

To guard against injury, the following basic safety precautions should be observed in the installation, use and servicing of the set.

**Use**

**Power Sources**

This set should be operated only from the type of power source indicated on the serial/model plate. If you are not sure of the type of electrical power supplied to your home, consult your dealer or local power company. For those sets designed to operate from battery power, refer to the operating instructions.

**Grounding or Polarization**

This set is equipped with a polarized AC power cord plug (a plug having one blade wider than the other), or with a three-wire grounding type plug (a plug having a third pin for grounding). Follow the instructions below:

**For the set with a polarized AC power cord plug**

This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug still fails to fit, contact your electrician to have a suitable outlet installed. Do not defeat the safety purpose of the polarized plug by forcing it in.

**Alternate Warning for the set with a three-wire grounding type AC plug**

This plug will only fit into a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to have a suitable outlet installed. Do not defeat the safety purpose of the grounding plug.
Overloading
Do not overload wall outlets, extension cords or convenience receptacles beyond their capacity, since this can result in fire or electric shock. Always turn the set off when it is not being used. When the set is left unattended and unused for long periods of time, unplug it from the wall outlet as a precaution against the possibility of an internal malfunction that could create a fire hazard.

If a snapping or popping sound from a TV set is continuous or frequent while the TV is operating, unplug the TV and consult your dealer or service technician. It is normal for some TV sets to make occasional snapping or popping sounds, particularly when being turned on or off.

Object and Liquid Entry
Never push objects of any kind into the set through the cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the set.

Attachments
Do not use attachments not recommended by the manufacturer, as they may cause hazards.

Cleaning
Clean the cabinet of the LCD Projection TV with a dry soft cloth. To remove dust from the screen, wipe it gently with a soft cloth. Stubborn stains may be removed with a cloth slightly dampened with solution of mild soap and warm water. Never use strong solvents such as thinner or benzine for cleaning.

If the picture becomes dark after using the LCD Projection TV for a long period of time, it may be necessary to clean the inside of the LCD Projection TV. Consult qualified service personnel.

On contamination on the screen surface
The screen surface has a special coating to reduce a picture displayed by reflecting. If you clean the screen surface in the wrong way, the screen may be damaged. To clean the screen, do as follows:
- Clean the screen with a soft cloth, such as the supplied cleaning cloth or a glass cleaning cloth.
- To remove hard contamination, use the supplied cleaning cloth or a glass cleaning cloth moistened with a solution of mild detergent and water.
- Do not use any type of abrasive pad, alkaline cleaner, acid cleaner, scouring powder, chemical cloth, or solvent such as alcohol, benzene or thinner, as these may scratch the screen's coating.

Installation
Water and Moisture
Do not use power-line operated sets near water — for example, near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, etc.

Accessories
Do not place the set on an unstable cart, stand, table or shelf. The set may fall, causing serious injury to a child or an adult and serious damage to the set. Use only a cart or stand recommended by the manufacturer for the specific model of LCD Projection TV. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Ventilation
The slots and openings in the cabinet and in the back or bottom are provided for necessary ventilation. To ensure reliable operation of the set, and to protect it from overheating, these slots and openings must never be blocked or covered.
- Never cover the slots and openings with a cloth or other materials.
Never block the slots and openings by placing the set on a bed, sofa, rug or other similar surface.

Never place the set in a confined space, such as a bookcase or built-in cabinet, unless proper ventilation is provided.

Do not place the set near or over a radiator or heat register, or where it is exposed to direct sunlight.

**Power-Cord Protection**

Do not allow anything to rest on or roll over the power cord, and do not place the set where the power cord is subject to wear or abuse.

**Antennas**

**Outdoor Antenna Grounding**

If an outdoor antenna is installed, follow the precautions below. An outdoor antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can come in contact with such power lines or circuits.

WHEN INSTALLING AN OUTDOOR ANTENNA SYSTEM, EXTREME CARE SHOULD BE TAKEN TO KEEP FROM CONTACTING SUCH POWER LINES OR CIRCUITS AS CONTACT WITH THEM IS ALMOST INVARiABLY FATAL.

Be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges.

Section 810 of the National Electrical Code (NEC) in USA and Section 54 of the Canadian Electrical Code in Canada provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

---

**Antenna Grounding According to the NEC**

Refer to section 54-300 of Canadian Electrical Code for Antenna Grounding.

**Lightning**

For added protection for this television receiver during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna. This will prevent damage to the receiver due to lightning and power-line surges.

**Service**

**Damage Requiring Service**

Unplug the set from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- When the power cord or plug is damaged or frayed.
- If liquid has been spilled into the set.
- If the set has been exposed to rain or water.
- If the set has been subject to excessive shock by being dropped, or the cabinet has been damaged.
- If the set does not operate normally when following the operating instructions. Adjust only those controls that are specified in the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the set to normal operation.
- When the set exhibits a distinct change in performance, it indicates a need for service.
Servicing
Do not attempt to service the set by yourself since opening the cabinet may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Replacement Parts
When replacement parts are required, be sure the service technician certifies in writing that he has used replacement parts specified by the manufacturer that have the same characteristics as the original parts. Unauthorized substitutions may result in fire, electric shock or other hazards.

Safety Check
Upon completion of any service or repairs to the set, ask the service technician to perform routine safety checks (as specified by the manufacturer) to determine that the set is in safe operating condition, and to so certify. When the set reaches the end of its useful life, improper disposal could result in a picture tube implosion. Ask a qualified service technician to dispose of the set.

For Safety
Be careful when moving the LCD Projection TV
When you place the LCD Projection TV in position, be careful not to drop it on your foot or fingers.
Watch your footing while installing the LCD Projection TV.

Carry the LCD Projection TV in the specified manner
If you carry the LCD Projection TV in a manner other than the specified manner and without the specified number of persons, it may drop and a serious injury may be caused. Be sure to follow the instructions mentioned below.
- Carry the LCD Projection TV with the specified number of persons (see page 18).
- Do not carry the LCD Projection TV holding the speaker grill.
- Hold the LCD Projection TV tightly when carrying it.

About the LCD Projection TV
Although the LCD projection TV is made with high-precision technology, black dots may appear or bright points of light (red, blue, or green) may appear constantly on the LCD screen. This is a structural property of the LCD panel and is not a malfunction.

Installation
- If direct sunlight or other strong illumination shines on the screen, part of the screen may appear white due to reflections from behind the screen. This is a structural property of the LCD Projection TV. Do not expose the screen to direct illumination or direct sunlight.
- The picture quality may be affected by your viewing position. If you sit too close to the TV, you may suffer from eye fatigue. For the best picture quality, install your LCD projection TV according to the operating instructions.
  - Sit at least 1.8m (approx. 5.9ft.) for KF-42WE610, 2.0m (approx. 6.6ft.) for KF-50WE610 or 2.2m (approx. 7.2ft.) for KF-60WE610 away from your LCD projection TV, and within 60° of the vertical viewing area, and 130° of the horizontal viewing area.
- When installing your LCD Projection TV against a wall, keep it at least 10 cm (4 inches) from the wall.
- Avoid installing the LCD projection TV close to high temperature sources such as a heater.

Projection lamp
- Your LCD projection TV uses a projection lamp as its light source. When the projection lamp wears out after using the LCD projection TV for a long period of time, the screen image becomes dark, or no image will appear on the display. If the lamp replacement indicator of the front panel blinks in red, replace the lamp with a new one (not supplied). In some cases, the bulb bursts inside the lamp unit noisily, but the lamp unit is securely designed so that the pieces of broken glass remain inside the lamp unit. (See “Replacing the Lamp” on page 13.)

Cooling fan
- This LCD projection TV uses a cooling fan. You might hear the noise from the cooling fan, depending on the place you install the LCD projection TV.

Carrying
- Before carrying the LCD projection TV, disconnect any accessories or cables.

Remote control detection
- The remote control sensor is at the upper right side of the TV. For the best results, aim the remote control at this location.

Introducing the Sony LCD Projection TV

Presenting the Sony LCD Projection TV

Thank you for purchasing the Sony LCD Projection TV. This manual is for models KF-42WE610, KF-50WE610 and KF-60WE610.

Features

Some of the features that you will enjoy with your new LCD projection TV include:

- **HD-Monitor**: Enables to display the 1080i, 720p, 480p and 480i digital TV format signals. By using the HD/DVD IN jacks, you can connect a DTV (digital television) receiver to view DTV programs.

- **DRC® (Digital Reality Creation) Multifunction V1**: Unlike conventional line doublers, the DRC feature converts frames reproduced every 1/60th of a second in real time, minimizing the blur or ghost of the motion images (for 480i signals only).

- **CineMotion™**: Using the reverse 3-2 pull down technology, the CineMotion feature allows you to obtain a smooth picture movement when playing back movies or other video sources on film.

- **Twin View™**: Using Multi-Image Driver (MID-X), Twin View allows you to watch two programs side by side with the ability to zoom in on one picture and listen to the program in the selected window. You can watch pictures from two different sources (1080i, 720p, 480p or 480i) simultaneously.

- **Memory Stick® Picture Viewer**: Allows you to view on your LCD Projection TV screen digital images that are stored on Memory Stick media.

- **Parental Control**: V-Chip technology allows parents to block unsuitable programming for younger viewers.

- **Digital Visual Interface (DVI-HDTV)**: Can accommodate a copy-protected digital connection (HDCP*) to other devices (such as digital set-top boxes) that have compatible interfaces. The DVI-HDTV input terminal is compliant with the EIA-861 standard and is not intended for use with personal computers.

* High-bandwidth Digital Content Protection

(Continued)
Introducing the Sony LCD Projection TV

- **Component Video Inputs:** Offers the best video quality for DVD (480p, 480i) and Digital Set-top box (1080i, 720p, 480p, 480i) connections.

- **S-VIDEO Inputs:** Provides a high-quality image for connected equipment.

- **Favorite Channel Preview:** Preview up to sixteen favorite channels without leaving the current channel.

- **Wide Screen Mode:** Allows you to watch 4:3 normal broadcasts in wide screen mode (16:9 aspect ratio).

- **Auto Wide:** Allows you to select the wide screen mode automatically.

**Using This Manual**

We recommend that you carefully review the contents of the following three sections in the order shown to ensure that you fully understand the operation of your new LCD projection TV.

1. **Installing and Connecting the LCD Projection TV**
   This section guides you through your initial setup. It shows you how to install your LCD projection TV, to connect your new components and to connect the antenna and cable.

2. **Using the Features**
   This section shows you how to begin using your new LCD projection TV. It also shows you how to use your remote control functions.

3. **Using the menus**
   This section teaches you how to access on-screen menus and adjust your LCD projection TV settings.

Instructions in this manual are written for the remote control. Similar controls are also found on the LCD projection TV console.
Enjoying Your LCD Projection TV

Indicators
The indicators show the current status of your LCD projection TV. If the LAMP indicator flashes, see “Flashing Indicators on the Front of the Monitor” on page 98.

Screen
To minimize screen reflection, its surface has a special coating. Read the instructions “Use of the Cleaning Cloth” on page 12 carefully before cleaning.

Inappropriate cleaning methods could damage the finishing.

Projection lamp
Your LCD projection TV uses a projection lamp as its light source. Note the following:

- After turning on your LCD projection TV, it may take a while before the picture appears (1 minute or less).
- When the projection lamp wears out, the screen image becomes dark. Replace the lamp with a new Sony XL-2100U replacement lamp (not supplied).

Be sure to attach the lamp cover securely; otherwise, your LCD projection TV will not turn on. For details on lamp replacement, see “Replacing the Lamp” on page 13.

The light emitted from the lamp is quite bright when your LCD projection TV is in use. To avoid eye discomfort or injury, do not look into the housing when the power is on.
Notes on the LCD Projection TV

To enjoy clear pictures
- Be sure not to allow sunlight or light from a lamp to shine directly onto the screen.
- The screen surface is easily scratched. Do not rub, touch, or tap it with a sharp or abrasive object (see “Use of the Cleaning Cloth” below).

On moisture condensation
- If your LCD projection TV is transported directly from a cold to a warm location, is placed in a humid room, or if the room temperature changes suddenly, the picture may be blurred or show poor color. This is because moisture has condensed on the lenses inside. If this happens, leave the power on and let the moisture evaporate before using your LCD projection TV.

When the LCD projection TV will not be used for a long period of time
- Turn off the main power on the front of your LCD projection TV before going to sleep or going out. Disconnect the AC plug if idle for more than 7 days.

When turning off the power
- Be sure to turn off the power switch on the main unit or on the remote control. After turning off the power, the fan will continue to blow for about two minutes. Be sure to wait for several minutes after turning the power off when unplugging from the outlet or switching the breaker off.

When carrying the LCD projection TV
- Disconnect the connections.

Use of the Cleaning Cloth

To remove dust from the front of the screen, wipe with the supplied Cleaning Cloth.

- Do not use any type of abrasive pad, alkaline cleaner, scouring powder, window cleaners or solvent such as alcohol or benzene. Otherwise, this type of contact may result in a damaged screen.
- To clean the screen, please use the supplied Cleaning Cloth lightly moistened with water diluted mild detergent solution. Do not apply heavy press when cleaning.
- The supplied Cleaning Cloth is washable with warm water and a mild detergent solution, and can be used repeatedly.
Introducing the Sony LCD Projection TV

Replacing the Lamp

The projection lamp has a limited life which illuminates the picture. If the screen becomes dark, the color looks unusual, or the LAMP indicator on the front of the LCD projection TV flashes, it is time to replace the lamp with a new one (not supplied).

❑ Use a Sony XL-2100U replacement lamp (not supplied) for replacement. Failure to do so may damage the LCD projection TV.
❑ Do not remove the lamp for any purpose other than replacement. Failure to do so may cause fire or a skin burn.
❑ Before replacing the lamp, turn the power off on the main unit, then several minutes later, unplug the power cord. (The cooling fan will continue to blow for about two minutes after turning the power off.)
❑ Before replacing the lamp, let it cool down completely, as the surface of the lamp remains extremely hot for at least 30 minutes after the power has been turned off.
❑ Do not leave the removed lamp near flammable materials or within the reach of children.
❑ Do not pour water onto the removed lamp, or put any object inside the lamp. Doing so may cause the lamp to burst.
❑ Do not put flammable materials and metal objects inside the lamp receptacle of the LCD projection TV after removing the lamp. Doing so may cause fire or electrical shock. Also, be sure not to touch the receptacle, because it may cause a skin burn.
❑ Mount the new lamp securely, otherwise the screen may become dark, or it may cause a fire.
❑ Do not touch the glass with your fingers on the new lamp.

The Used Lamp
The used lamp contains Mercury, Dispose According to Local, State or Federal Laws.

⚠️ WARNING
Electric appliances can cause fire or high temperature, resulting in injury or death. Be sure to follow the instructions below.

❑ Do not touch the front glass of a new lamp or the glass of the lamp receptacle. This may reduce picture quality or lamp life.
1. Turn off the power switch on the LCD projection TV and after several minutes, unplug the power cord. (The cooling fan will continue to blow for about two minutes after turning the power off.)

Do not touch the front glass of a new lamp or the glass of the lamp receptacle. This may reduce picture quality or lamp life.

2. Unplug the power cord after turning off the main power. Wait at least 30 minutes to allow the lamp to cool down before replacing it. Take the new lamp out of the box.

3. Loosen the screws on the rear side panel.

4. Remove the front panel.

5. Loosen the screw with a coin or similar object to remove the lamp cover.
6 Loosen the two screws that secure the lamp, then pull out the lamp. The lamp is very hot immediately after use. Never touch the front glass of the lamp or the surrounding parts.

Loosen the two screws with the hex key supplied with the lamp.  
Hold the handle and pull straight out.

After it has cooled, place the removed lamp into the empty box of the replacement lamp. Never put the removed lamp into a plastic bag.

7 Mount the new lamp. Be sure to attach the new lamp securely.

Mount the new lamp securely into the lamp receptacle.  
Tighten the two screws securely in the order of ① to ②, as shown in the illustration using the supplied hex key.

8 Mount the lamp cover and tighten the screw. Make sure that the lamp cover is mounted securely, otherwise the power will not turn on.

Match the projection of the right side of the lamp cover with the hole of the unit, and replace the lamp cover as it was.
Introducing the Sony LCD Projection TV

9 Mount the front panel securely.

- If the lamp cover is not mounted securely, the self-diagnostic function works and the POWER/STANDBY indicator flashes for three times (See page 98).

10 Mount the rear side panel and tighten the screws.

- Consult your Sony dealer for a Sony XL-2100U replacement lamp.

- Take great care when replacing the lamp or plugging in/unplugging the connecting cords. If you handle them roughly, the LCD projection TV may fall or be moved, and the TV stand or floor surfaces may be scratched.
Installing and Connecting the LCD Projection TV

Contents

The box contains your new LCD projection TV, a remote control and two AA batteries. No peripheral cables are included. If you intend to add additional equipment to your LCD projection TV, please check the hookup instructions for your desired setup before you begin. You may need to purchase cables and/or splitters to complete the hookup properly.

Inserting Batteries into the Remote Control

Insert two size AA batteries (supplied) by matching the + and – on the batteries to the diagram inside the battery compartment.

 minimise damage from possible battery leakage whenever you anticipate that the remote control will not be used for an extended period.

 minimise damage from possible battery leakage whenever you anticipate that the remote control will not be used for an extended period.

 minimise damage from possible battery leakage whenever you anticipate that the remote control will not be used for an extended period.

 minimise damage from possible battery leakage whenever you anticipate that the remote control will not be used for an extended period.

 Handle the remote control with care. Avoid dropping it, getting it wet, or placing it in direct sunlight, near a heater, or where the humidity is high.

 Your remote control can be programmed to operate most video equipment. (See “Programming the Remote Control” on page 86.)
Carrying Your LCD Projection TV

Carrying the LCD projection TV requires at least two people. Do not grasp the pedestal or the front panel of the LCD projection TV, otherwise these parts might break off.

When moving the LCD projection TV, support the hole on the lower portion with one hand while grasping the top part with the other hand, as shown in the illustration below.
To Prevent the LCD Projection TV from Falling Down

Pay special attention to children around the LCD projection TV. If children should climb onto or push the LCD projection TV or its stand, it may fall down.

As a protective measure, secure the LCD projection TV as follows.

Using the LCD projection TV stand with support belts

❑ You can also use the LCD projection TV stand SU-GW1 (for KF-50/60WE610, not supplied), SU-GW2 (for KF-42WE610, not supplied) with support belts.

When Installing Your LCD Projection TV Against a Wall

Keep your LCD projection TV at least 10 cm (4 inches) from the wall.
Recommended Viewing Area

The picture quality may be affected by your viewing position.

For the best picture quality, install your LCD projection TV within the areas shown below.

Sit at least 1.8 m (approx. 5.9 ft) for KF-42WE610, 2.0 m (approx. 6.6 ft.) for KF-50WE610 or 2.2 m (approx. 7.2 ft.) for KF-60WE610 away from your LCD projection TV, and within 60° of the vertical viewing area, and 130° of the horizontal viewing area.

## Installing and Connecting the LCD Projection TV

<table>
<thead>
<tr>
<th>Connection</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1</strong> DVI-HDTV VIDEO AUDIO R/L (VIDEO 7 IN)</td>
<td>Can accommodate a copy-protected digital connection (HDCP) to other devices (such as digital set-top boxes) that have compatible interfaces. The DVI-HDTV input terminal is compliant with the EIA-861 standard and is not intended for use with personal computers. See the instruction manual that came with your equipment for details about connecting and using it with the LCD projection TV.</td>
</tr>
<tr>
<td><strong>2</strong> S VIDEO (Rear and front)</td>
<td>Connects to the S VIDEO OUT jack of your VCR or other S VIDEO-equipped video component. Provides better picture quality than the VHF/UHF jacks or the Video IN jack.</td>
</tr>
<tr>
<td><strong>3</strong> VIDEO/ (L/R) AUDIO (Rear and front)</td>
<td>Connects to the audio and video OUT jacks on your VCR or other video component. A fourth video input (VIDEO 2) is located on the side panel of the LCD projection TV.</td>
</tr>
<tr>
<td><strong>4</strong> HD/DVD IN (1080i, 720p, 480p, 480i)</td>
<td>Connects to your DVD player’s or Digital Set-top box’s component video (Y, Pb, Pr) and audio (L/R) jacks.</td>
</tr>
<tr>
<td><strong>5</strong> AUDIO OUT (VAR/FIX) L (MONO)/R</td>
<td>Connects to the left and right audio inputs of your audio or video component.</td>
</tr>
</tbody>
</table>
| **6** CONTROL S IN/OUT | To control other Sony equipment with the LCD projection TV’s remote control, connect the CONTROL S IN jack of the equipment to the CONTROL S OUT jack on the LCD projection TV with the CONTROL S cable.  
To control the LCD projection TV with a remote control for another Sony product, connect the CONTROL S OUT jack of the equipment to the CONTROL S IN jack on the LCD projection TV with the CONTROL S cable. |
| **7** AUX | Allows you to view local and cable channels if your cable provider does not feature local channels. You can switch between local and cable channels easily by pressing ANT on the remote control. Devices connected to the AUX input cannot be viewed in Twin View. |
| **8** VHF/UHF (Primary RF input) | Connects to your VHF/UHF antenna or cable.                                                                                                                                                                                                                   |
| **9** TO CONVERTER | This is a VHF/UHF OUT jack that lets you set up your LCD projection TV to switch between scrambled channels (through a cable box) and normal cable channels (CATV). Use this jack instead of a splitter to get better picture quality when switching between scrambled and unscrambled cable channels. |

*High-bandwidth Digital Content Protection*
**Connector Types**

You may find it necessary to use some of the following connector types during set up.

**Coaxial cable**
Standard TV cable and antenna cable

**Plug Type**
- Push into connection.
- Screw into connection.

**S Video cable**
High quality video cable for enhanced picture quality

- Align guides and push into connection.

**Audio/Video cable**

- Push into connection.

- Video - Yellow
- Audio (Left) - White
- Audio (Right) - Red

Some DVD Players are equipped with the following three video connectors:

- Y - Green
- Pb (C_b, C_b or B–Y) - Blue
- Pr (C_r, C_r or R–Y) - Red

**CONTROL S cable**
CONTROL S connections are exclusive to Sony products and allow greater control of all Sony equipment.

- Push into connection.
Basic Connections (Connecting Cable TV or Antenna)

Connecting Directly to Cable or an Antenna

The connection you choose depends on the cable found in your home. Newer homes are equipped with standard coaxial cable (see A); older homes probably have 300-ohm twin lead cable (see B); other homes may contain both (see C).

A  VHF Only or VHF/UHF or Cable

75-ohm coaxial cable

Rear of LCD projection TV

VHF/UHF

B  VHF Only or UHF Only or VHF/UHF

300-ohm twin lead cable

Antenna connector

Rear of LCD projection TV

VHF/UHF

C  VHF and UHF

75-ohm coaxial cable

300-ohm twin lead cable

U/V Splitter (not supplied)

Rear of LCD projection TV

VHF/UHF

It is highly recommended to connect the antenna using a 75-ohm coaxial cable to get optimum picture quality. A 300-ohm twin lead cable can be easily affected by radio noise and the like, resulting in signal deterioration. If you use a 300-ohm twin lead cable, keep it away as far as possible from the LCD projection TV.

Do not use an indoor antenna because it is especially susceptible to radio noise.
Installing and Connecting the LCD Projection TV

**Cable and Antenna**

If your cable provider does not feature local channels, you may find this set up convenient.

Select CABLE or antenna (ANT) mode by pressing ANT on the remote control.

To receive channels with an antenna, you need to turn your Cable to Off (see page 76) and perform the Auto Program function (see page 76).

**Cable Box Connections**

**Cable Box and Cable**

This is the preferred basic cable TV hookup to use if:

- Your cable TV company scrambles some channels, but not all of them (pay channels vs. regular cable channels) and you need to use a cable box, and
- You want to enjoy the Twin View feature.

With this setup you can:

- Use the LCD projection TV remote control to change channels using your cable box when the signal is scrambled.
- Use the LCD projection TV remote control to change channels using your LCD projection TV when the signal is not scrambled. (Your LCD projection TV’s tuner provides a better signal than the cable box.)
- Use the Twin View feature. (When all channels are routed through your cable box, only one channel is sent to the LCD projection TV, so you can not use the Twin View feature for your cable box.)

1. Connect the Cable TV cable to the LCD projection TV’s VHF/UHF jack.

2. Using a coaxial cable, connect the LCD projection TV’s TO CONVERTER jack to the cable box’s IN jack. The LCD projection TV’s internal converter allows you to switch between unscrambled signals coming straight into the LCD projection TV and scrambled signals coming in through the cable box, eliminating the need for an external splitter.
3 Using a coaxial cable, connect the cable box’s OUT jack to the LCD projection TV’s AUX jack.

Pressing ANT on the remote control switches between the channels coming in through the cable box (scrambled) and those coming directly to the TV (unscrambled).
Cable Box Only
Use this hookup if:

- You subscribe to a cable TV system that uses scrambled or encoded signals requiring a cable box to view all channels, and
- You do not intend to hook up any other audio or video equipment to your LCD projection TV.

When all channels are routed through your cable box, only one unscrambled channel is sent to the LCD projection TV, so you cannot use the Twin View feature. If some channels are scrambled, but others are not, consider using the hookup on page 26 instead.

1. Connect the coaxial connector from your cable service to the cable box’s IN jack.

2. Using a coaxial cable, connect the cable box’s OUT jack to the LCD projection TV’s VHF/UHF jack.

Also, set **Cable** to **On** in the Channel menu (see page 76).

⚠️ Your Sony remote control can be programmed to operate your cable box (see “Programming the Remote Control” on page 86).

⚠️ To change channels using the cable box, set your LCD projection TV to channel 3 or 4 depending on the cable box channel output. If you will be controlling all channel selection through your cable box, consider using the Channel Fix feature to set your LCD projection TV to channel 3 or 4 (see page 76).

💡 Setting the Channel Fix feature in the Channel menu (see “Using the Channel Menu” on page 76), ensures that you do not accidentally switch the channels using your LCD projection TV.
Connecting a VCR and Cable

Use this hookup if:

- You have cable TV that does not require a cable box.

Disconnect all power sources before making any connections.

1. Connect the cable TV cable to the VCR’s IN jack.

2. Using a coaxial cable, connect the VCR’s OUT jack to the LCD projection TV’s VHF/UHF jack.

3. Using AUDIO and S VIDEO cables, connect the VCR’s Audio and S Video OUT jacks to the LCD projection TV’s AUDIO and S VIDEO IN jacks.

If your VCR is not equipped with S VIDEO, use a VIDEO cable (yellow) instead of the S VIDEO cable.
Connecting a VCR and Cable Box

Use this hookup if:

- Your cable TV company scrambles some channels, but not all of them (pay channels vs. regular cable channels) and you need to use a cable box, and
- You want to enjoy the Twin View feature.

With this setup you can:

- Use the LCD projection TV remote control to change channels on your cable box when the signal is scrambled. To program your Sony remote control to operate your cable box, see “Programming the Remote Control” on page 86.
- Use the LCD projection TV remote control to change channels using your LCD projection TV when the signal is not scrambled. Your LCD projection TV’s tuner provides a better signal than the cable box.
- Use the Twin View feature. (When all channels are routed through your cable box, only one signal is sent to the LCD projection TV, so you cannot use the Twin View feature.)

Disconnect all power sources before making any connections.

1. Connect the Cable TV cable to the LCD projection TV’s VHF/UHF jack.

2. Using a coaxial cable, connect the LCD projection TV’s TO CONVERTER jack to the cable box’s IN jack. The LCD projection TV’s internal converter allows you to switch between unscrambled signals coming straight into the LCD projection TV and scrambled signals coming in through the cable box, eliminating the need for an external splitter.

3. Using a coaxial cable, connect the cable box’s OUT jack to the VCR’s IN jack.

4. Using AUDIO and S VIDEO cables, connect the VCR’s AUDIO and S VIDEO OUT jacks to the LCD projection TV’s AUDIO and S VIDEO IN jacks.

5. Using a coaxial cable, connect the VCR’s OUT jack to the LCD projection TV’s AUX jack.

To view scrambled channels, set your LCD projection TV to AUX 3 or 4 (depending on your cable box output). Change channels using your cable box.
Installing and Connecting the LCD Projection TV

- **Coaxial cable**
- **Cable box**
- **Rear of LCD projection TV**
- **AUDIO-R (red)**
- **AUDIO-L (white)**
- **VIDEO (yellow)**
- **VC-810S/820S (not supplied)**
- **S VIDEO**

**If your VCR is not equipped with S VIDEO, use a VIDEO cable (yellow) instead of the S VIDEO cable.**

You will not be able to change channels on the VCR. Set your LCD projection TV and VCR to channel 3 or 4, depending on your cable box channel output.

Pressing ANT on the remote control switches between the channels coming in through the cable box (scrambled) and those coming directly to the LCD projection TV (unscrambled).
Connecting Two VCRs for Tape Editing

If you connect two VCRs, you can record from one VCR to the other while using your LCD projection TV to monitor what is being recorded.

Disconnect all power sources before making any connections.

1. Using AUDIO and VIDEO cables, connect the playback VCR’s Audio and Video OUT jacks to the recording VCR’s Audio and Video IN jacks.

2. Using AUDIO and VIDEO cables, connect the recording VCR’s AUDIO and Video OUT jacks to the LCD projection TV’s AUDIO and VIDEO IN jacks.

- To perform tape editing, set the LCD projection TV to the video input intended for playback by pressing TV/VIDEO on the remote control.
- You may need to change the video input on your VCR. Consult your VCR’s operating manual for instructions.
- If your VCRs have an S VIDEO jack: For best picture quality, use an S VIDEO connection instead of the yellow video cable on your combined A/V cable. Using an S VIDEO cable, connect the playback VCR’s S VIDEO OUT jack to the recording VCR’s S VIDEO IN jack. S VIDEO does not provide audio, so audio cables must be connected to provide sound.
- You cannot record signals from equipment connected to the Y, Pb, Pr input.
Connecting a Satellite Receiver

Disconnect all power sources before making any connections.

1. Connect the satellite antenna cable to the satellite receiver’s SATELLITE IN jack.

2. Using AUDIO and S VIDEO cables, connect the satellite receiver’s AUDIO and S VIDEO OUT jacks to the LCD projection TV’s AUDIO and S VIDEO IN jacks.

3. Connect a coaxial cable from your cable or antenna to the LCD projection TV’s VHF/UHF jack.

⚠️ If your satellite receiver is not equipped with S VIDEO, use a VIDEO cable (yellow) instead of the S VIDEO cable.
Connecting a Satellite Receiver with a VCR

Disconnect all power sources before making any connections.

1. Connect the satellite antenna cable to the satellite receiver’s SATELLITE IN jack.
2. Connect the CATV cable to the VCR’s VHF/UHF IN jack.
3. Using a coaxial cable, connect the VCR’s OUT jack to the LCD projection TV’s VHF/UHF jack.
4. Using AUDIO and S VIDEO cables, connect the satellite receiver’s AUDIO and S VIDEO OUT jacks to the VCR’s AUDIO and S VIDEO IN jacks.
5. Using AUDIO and S VIDEO cables, connect the VCR’s AUDIO and S VIDEO OUT jacks to the LCD projection TV’s AUDIO and S VIDEO IN jacks.
Be sure your VCR's video input is set correctly. Consult your VCR's operating manual for instructions.

Use TV/VIDEO to select
- VIDEO 1 to watch satellite TV or the VCR (your VCR must be turned on).
- VHF/UHF to watch cable TV.

If your VCR or satellite receiver is not equipped with SVIDEO, use a VIDEO cable (yellow) instead of the SVIDEO cable.
Connecting an Audio Receiver

Disconnect all power sources before making any connections.

Using audio cables, connect the LCD projection TV’s AUDIO OUT (VAR/FIX) jacks to the audio receiver’s audio LINE IN jacks.
Connecting a DVD Player with Component Video Connectors

This is the preferred hookup to use if:

❑ Your DVD player has component (Y, B-Y, R-Y) jacks.

Disconnect all power sources before making any connections.

1. Using three separate component video cables, connect the DVD player’s Y, B-Y and R-Y jacks to the Y, Pb and Pr jacks on the LCD projection TV. Use the HD/DVD IN 5 or 6 connections.

   ✍ The Y, B-Y and R-Y jacks on your DVD player are sometimes labeled Y, CB and CR, or Y, PB and PR. If so, connect the cables to like colors.

2. Using an audio cable, connect the DVD player’s Audio OUT jacks to the LCD projection TV’s AUDIO IN jacks. Be sure to use the same row of inputs that you used for the video connection (HD/DVD IN 5 or 6).

✍ To take advantage of the Wide Screen modes, set the TV’s aspect ratio to 16:9 on your DVD player. For details, refer to the operating instructions supplied with your DVD player.
Connecting a DVD Player with A/V Connectors

Use this hookup if:

- Your DVD player does not have component (Y, Pb, Pr) jacks.

If your DVD player has video component output connectors: for best picture quality use the connection described on page 37.

Disconnect all power sources before making any connections.

1. Using audio cables, connect the DVD player’s Audio OUT jacks to the LCD projection TV’s AUDIO IN jacks.

2. Using an S VIDEO cable, connect the DVD player’s S VIDEO jack to the LCD projection TV’s S VIDEO jack.

To take advantage of the Wide Screen modes, set the TV's aspect ratio to 16:9 on your DVD player. For details, refer to the operating instructions supplied with your DVD player.

Use TV/VIDEO on the remote control to switch between the VCR, DVD player and cable TV inputs.

If your VCR is not equipped with S VIDEO, use a VIDEO cable (yellow) instead of the S VIDEO cable.
Connecting a Digital TV Receiver with component connectors

Disconnect all power sources before making any connections.

1. Using three separate component video cables, connect the Digital TV Set-top box’s Y, Pb and Pr jacks to the LCD projection TV.

- The Y, Pb and Pr jacks do not provide audio, so audio cables must be connected to provide sound.
- Component video connection is necessary to view 480i, 480p, 720p, and 1080i formats. You may also use the S VIDEO or Composite Video connections, however, component video (Y, Pb, Pr) will provide the best picture quality for all format types.

2. Using an audio cable, connect the Digital TV Set-top box’s Audio OUT jacks to the LCD projection TV’s AUDIO IN jacks.

- You cannot record the signal from any equipment connected into the Y, Pb and Pr connectors.
- This LCD projection TV is not compatible with digital TV receivers configured with RGB or VGA output connectors.
Connecting a Digital TV Receiver with DVI-HDTV connector

Disconnect all power sources before making any connections.

1. Using a DVI-D single link cable, connect the Digital TV Set-top box’s DVI-HDTV connector to the LCD projection TV.

   The DVI-HDTV VIDEO connector does not provide audio, so audio cables must be connected to provide sound.

2. Using an audio cable, connect the Digital TV Set-top box’s Audio OUT jacks to the LCD projection TV’s DVI-HDTV AUDIO jacks.

---

Diagram:

Connecting a Camcorder

For easy connection of the camcorder, the LCD projection TV has front Audio and Video inputs (shown below). However, if you prefer, you can also connect the camcorder to the LCD projection TV’s rear Audio and Video IN jacks.

Using AUDIO and S VIDEO cables, connect the camcorder’s Audio and S VIDEO OUT jacks to the LCD projection TV’s AUDIO and S VIDEO IN jacks.

⚠️ If you have a mono camcorder, connect its left audio output to the LCD projection TV’s AUDIOL (MONO) jack.

⚠️ If your camcorder is not equipped with S VIDEO, use a VIDEO cable (yellow) instead of the S VIDEO cable.
Using the CONTROL S Feature

CONTROL S allows you to control your LCD projection TV system and other Sony equipment with one remote control. In addition to allowing you to control multiple devices with one remote control, the CONTROL S feature allows you to always point your remote control at your LCD projection TV, instead of having to point it at the other equipment, which might be hidden or out of direct line of sight.
Setting Up the LCD projection TV Automatically

After you finish connecting your LCD projection TV, you can run Auto Setup to set up your channels. The Auto Setup screen appears when you turn your LCD projection TV on for the first time after installing it. If you do not want to set up the channels at this time, you can do it later by using the Auto Program feature in the Channel menu (see page 76).

The Auto Setup feature does not apply for installations that use a cable box for all channel selection.

Using Auto Setup

1. Press POWER on the front panel of your LCD projection TV or on the remote control to turn on the LCD projection TV.
2. Press FUNCTION on the remote control until the TV indicator lights up.
3. Press CHANNEL+ on your LCD projection TV to run Auto Setup, or press CHANNEL– to exit. If you use the channel buttons on your remote control, be sure to use .

You can run Auto Program by selecting it in the Channel menu, as described on page 76.
## Using the Features

### Using the Remote Control

The following table describes the buttons on the remote control that are for more advanced functions.

### Button Descriptions

<table>
<thead>
<tr>

<tr>
<td>26 SLEEP</td>
<td>Press repeatedly until the LCD projection TV displays the time in minutes (15, 30, 45, 60, or 90) that you want the LCD projection TV to remain on before shutting off automatically. To cancel Sleep timer, press SLEEP repeatedly until SLEEP OFF appears. Pressing down POWER also cancels the Sleep timer and turns off the power. While the Sleep feature is set, press once to view the remaining time.</td>
</tr>
</tbody>
</table>
Many TV features can be accessed directly through the remote control. The following will explain the function of some of the buttons found on your remote control.

**Buttons for LCD Projection TV Operations**

1. **FUNCTION TV**
   Press to have the remote control operate the TV. The indicator lights up momentarily when pressed to show which equipment the remote control is operating.

2. **ANT— (AUX input)**
   Press to change between the VHF/UHF input and the AUX input.

3. **POWER**
   Turn the LCD projection TV on and off. If a video input indication (e.g., VIDEO 1, VIDEO 2) appears on the screen, press TV/VIDEO or CH +/- until a channel number appears.

4. **0-9 and ENT**
   Use for direct channel selection. Press 0-9 to select a channel (for example, to select channel 10, press 1 and 0). The channel will change after 2 seconds, or you can press ENT for immediate selection.

5. **CH +/-**
   Press to scan through the channels (+ up or – down).

6. **VOL +/-**
   Press to adjust the volume (+ up or – down).

7. **JUMP**
   Press to alternate or jump back and forth between two channels. The LCD projection TV will jump between the current channel and the last channel selected.

8. **MUTING**
   Press to mute the sound. “MUTING” will appear on the screen. To restore the sound, press again or press VOL +.

9. **FREEZE**
   This is useful when you need to copy down information that appears on the LCD projection TV’s screen (see “Using the Freeze Function” on page 53).
10 SLEEP
Press repeatedly until the LCD projection TV displays the approximate time in minutes (15, 30, 45, 60, or 90) that you want the LCD projection TV to remain on before shutting off automatically.

Cancel by pressing SLEEP until “SLEEP OFF” appears.

11 DISPLAY
Press to display the channel number, current time and channel label (if set).

To turn the display off, press DISPLAY again.

12 TV/VIDEO
Press repeatedly to scroll through available video inputs: TV, VIDEO 1, VIDEO 2, VIDEO 3, VIDEO 4, VIDEO 5, VIDEO 6 and VIDEO 7.

If you select Skip as a Video Label in the Setup menu, your LCD projection TV will skip the video input you selected (see “Video Label” on page 83).

13 MTS/SAP
Press to scroll through the Multi-channel TV Sound (MTS) options (see “MTS” on page 72).

14 PICTURE MODE
Press PICTURE MODE repeatedly to directly choose one of three different video modes that best suits the program you are watching.

Vivid: Select for enhanced picture contrast and sharpness.

Standard: Select to display a standard picture for normal viewing environments.

Pro: Select to display a picture with minimum enhancements.

When you select each mode, you can also adjust the picture quality (such as Brightness, Color, etc.) to suit your taste. For details, see “Mode” on page 69.
Watching Digital TV

When you have connected the DTV receiver, you can enjoy digital TV programs. This LCD projection TV is capable of receiving the 1080i, 720p, 480p and 480i digital TV formats.

To view a digital TV program

1. Connect the DTV receiver to DVI-HDTV IN 7, HD/DVD IN 5 or 6 on the LCD projection TV (for details, see page 39).
2. Press TV/VIDEO to select DVI-HDTV IN 7, HD/DVD IN 5 or 6.
3. Select a digital channel on the DTV receiver. For details, see the Operating Manual of the DTV receiver.
4. Adjust the volume of the LCD projection TV as necessary.
Using the Features

Using Favorite Channels

The Favorite Channel feature lets you select programs from a list of favorite channels that you preset.

Creating a List of Favorite Channels

1. Press MENU to display the Menu.
2. Press \ or \ to highlight the Channel icon and press \.
3. Press \ to select Favorite Channels.
4. Press \ or \ to highlight a Favorite Channel number (1-16) and press \.
5. Press \ or \ to highlight a channel you want to assign to the Favorite Channel number. A preview of the highlighted channel appears in the upper right of the screen.
   Press \ to select that channel as a Favorite Channel.
6. To add more channels to your favorites list, repeat steps 4-5.
   To clear a Favorite Channel, press \ or \ to highlight the channel you want to clear. Press \ and then press RESET.
7. Press MENU to exit the Menu.

For details on using the Channel Menu, see page 76.

Displaying a List of Favorite Channels

1. Press FAVORITES.
   The Favorite Channel options appear.
2. Press \ or \ to highlight the channel you want to watch. The program of that channel appears in the preview window. Press \ to select.

When the remote control function is set to other than TV function, you can display the Favorite Channels. However, you cannot select the channel by using \ or \.

To assign Channel Labels (e.g., ABC, HBO, MTV, etc.) to channel numbers, as shown at right, use the Channel Label feature in the Channel Menu (see page 77).
Using the Features

Using Twin View™

Twin View enables you to watch two programs at the same time. You can also change the size of both the left and right pictures.

Activating Twin Pictures

To display twin pictures
1. Make sure your LCD projection TV is tuned to a working channel.
2. Press .

To cancel twin pictures
- Press again (or press ).

Activating the Picture

Although two pictures appear on the screen at the same time, only one picture is active. Change the picture size by using the † or ‡ button. For an active picture, you can:
- Change channels.
- Adjust the volume.
- Switch the input sources from VHF/UHF to cable by pressing ANT or TV/VIDEO to switch the video input.

To activate the right picture
- Press †.

To activate the left picture
- Press ‡.
Factors Affecting Twin View

- If you use a cable box to view all channels, the same channel appears in both windows because the cable box unscrambles only one channel at a time.

- If you use a cable box, you can view the cable box output in one window and view a different source (such as a VCR or DVD player) in the second window by using the TV/VIDEO button.

- Sources connected to the AUX, VIDEO 5, VIDEO 6, and VIDEO 7 inputs display in the left window, but not the right.

- If you are viewing a 4:3 source and a 16:9 enhanced source (such as a DVD) side by side, the 4:3 source appears larger.

- Twin View does not display channels that are blocked by parental settings (see page 78).
The zoom feature lets you change the size of the left and right pictures.

**Changing the Picture Size**

---

**To enlarge the left picture (reduce the right)**

1. Press ◀ to activate the left picture (if not already activated).
2. Press ‣ to enlarge the picture and ‰ to reduce the picture.

**To enlarge the right picture (reduce the left)**

1. Press ◀ to activate the right picture (if not already activated).
2. Press ‣ to enlarge the picture and ‰ to reduce the picture.

---

💡 When you adjust the twin screen sizes, the LCD projection TV memorizes the change. The next time you use the Twin View function, the memorized sizes appear.
Using the Freeze Function

The FREEZE button allows you to temporarily capture a program’s picture. You can use this feature to write down information such as phone numbers, recipes, etc.

To use the Freeze function

1. When the program information you want to capture is displayed, press FREEZE.

2. The LCD projection TV switches to Twin View mode and displays the “frozen” picture on the right, while the current program continues on the left.

3. To cancel and return to normal viewing, press FREEZE.

Freeze feature is not available if you are already in Favorite Channel (see page 49) or Twin View™ (see page 50).
Using Wide Screen Mode

Wide Screen Mode lets you watch 4:3 normal broadcasts in several Wide Screen Modes (16:9 aspect ratio).

- Press WIDE MODE repeatedly to toggle through the following Screen Mode settings.

  ![Wide Screen Modes](image)

  You can also access the Screen Mode settings in the Screen menu. For details, see page 74.

  - Wide Zoom enlarges the 4:3 picture to fill the 16:9 screen, keeping the original image as much as possible.
  - Normal returns the 4:3 picture to its original size.
  - Full Mode stretches the 4:3 picture horizontally only, to fill the 16:9 screen.
  - Zoom Mode enlarges the 4:3 picture horizontally and vertically to an equal aspect ratio that fills the 16:9 screen. Useful for watching Letterbox movies.

When you change channels or inputs, the Screen Mode settings revert to Wide Zoom (or the 4:3 Default setting in the Wide menu). To retain the current Screen Mode setting as channels and inputs are changed, set 4:3 Default to Off. For details, see page 75.
About Memory Stick

Memory Stick (sold separately) is a new, compact, portable, and versatile Integrated Circuit recording medium with a data capacity that exceeds that of a floppy disk. Memory Stick is specially designed for exchanging and sharing digital data among Memory Stick compatible products such as digital cameras and digital video cameras. Because it is removable, Memory Stick can also be used for external data storage.

The Memory Stick Viewer on your LCD projection TV allows you to view still images (JPEG files) and movies (MPEG1 files) stored on Memory Stick media.

For more information about using Memory Stick media, see “Notes on Using Memory Stick, Memory Stick PRO Media” on page 90.

Supported Image Types

This LCD projection TV's Memory Stick viewer can display still images and movies that have been recorded on Memory Stick media.

You can view;

- JPEG images taken with Sony digital cameras
- MPEG1* movies taken with digital cameras and camcorders

* Some variations of MPEG1 movies may not play back correctly.
Using the Memory Stick Viewer

About Directory and File Names

Most Sony brand digital still and video cameras automatically record still images using DCF compliant directory and file names, or record movies using the directory and file names as shown in the following examples:

Still image files

Example:
Directory Name: /DCIM/100MSDCF
File Name: DSC00001.JPG

Movie files

Example:
Directory Name: /MSSONY/MOML0001
File Name: MOV00001.MPG

Unsupported Image Types

This LCD projection TV’s Memory Stick viewer cannot display any of the following:

- Images stored in TIFF or any other non-JPEG or non-MPEG compression format
- Images with less than 16 horizontal and/or vertical dots per line
- Images with more than 4096 horizontal and/or vertical dots per line
- An image processed by a computer may not be displayed correctly.

 JPEG stands for “Joint Photographic Experts Group,” which is the organization that implemented this format. DCF stands for “Design Rules for Camera File Systems,” which are specifications established by the Japan Electronic Industry Development Association (JEIDA).

MPEG1 stands for “Motion Picture Experts Group” which is the organization that implemented this format and is the typical compression format for movie files.

JPEG stands for “Joint Photographic Experts Group,” which is the organization that implemented this format. DCF stands for “Design Rules for Camera File Systems,” which are specifications established by the Japan Electronic Industry Development Association (JEIDA).

MPEG1 stands for “Motion Picture Experts Group” which is the organization that implemented this format and is the typical compression format for movie files.
Inserting and Removing a Memory Stick

To insert a Memory Stick

1. Locate the Memory Stick slot (see page 21) and insert the Memory Stick into the Memory Stick slot as illustrated below. When inserted properly, it should slide in with little resistance and click into place.

Be sure to insert the Memory Stick in the correct direction. If the Memory Stick is forced in the wrong way, it may become damaged. Insert only Memory Stick media into the Memory Stick slot. Attempting to insert other objects into the slot may damage the LCD projection TV. Before inserting a Memory Stick Duo into the Memory Stick slot, you must first insert the Memory Stick Duo into an adaptor (optional).

To remove a Memory Stick

1. Check that the Memory Stick indicator is off. (When the light is on, this indicates that the LCD projection TV is reading data from the Memory Stick.)
Using the Memory Stick Viewer

2 Push the Memory Stick gently into the slot, and then release it. The Memory Stick media is ejected.

3 Pull the Memory Stick completely out of the slot.

To protect small children from injury from Memory Stick Media, remove all Memory Stick media from the LCD projection TV’s Memory Stick slot and store it in a safe location when it is not in use.

Displaying the Memory Stick Home (Memory Stick Index)

Turn on your LCD projection TV and insert a Memory Stick that contains the photo or movie files you want to view. For details on inserting a Memory Stick, see “To insert a Memory Stick” on page 57.

The Memory Stick Home appears, which displays thumbnails of still image and movie files stored on the Memory Stick.

When MEMORY STICK on the remote control is pressed, the Memory Stick Home also appears.
About the Icons on the Thumbnail Images

- **Movie** (Movie) Indicates the thumbnail is a movie (MPEG1) file.
- **Protect** (Protect) Indicates the thumbnail is protected. Protected files cannot be changed or deleted. For details, see “Using the Index Menu” on page 60.
- **Relative file** (Relative file) Indicates another file named the same in the last four digits exists in the Memory Stick.

About the Digi. Cam. Mode (Digital Camera Mode)

Digi. Cam. Mode displays all JPEG and MPEG1 files recorded with the DCF compliant digital cameras. When you set the Digi. Cam. Mode to Off, the data of selected files or all files with the extension .jpg or .mpg can be displayed. The Memory Stick viewer of this projection TV sets Digi. Cam. Mode to On at the factory. When Digi. Cam. Mode is set to On, the maximum 2000 pieces of still images and/or movies can be displayed. When you want to display more than 2000 pieces of still images and/or movies, set Digi. Cam. Mode to Off. To set Digi. Cam. Mode to Off, see “Select Folder Menu Options” on page 66.

About caution displays

- ![Warning] This image data is the JPEG or MPEG1 format that is not-compatible.
- ![Warning] There is the thumbnail but it is not DCF-compatible.
- ![Warning] There is the image data but the thumbnail is broken.
- ![Warning] The image data is broken.

Using the Memory Stick Viewer

Memory Stick Home Menu Options

The Memory Stick Home lets you select the Slide Show, Options and Select Folder menus that include additional options for each menu.

To access the Memory Stick Home menu

1. Press 
   
   or 
   
   to select Slide Show, Options or Select Folder.
2. Press . The setup menu appears.
3. Press 
   
   or 
   
   to select the desired option and press .

Slide Show Menu Options

The Slide Show menu includes the following menu options.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Start</td>
<td>Starts the slide show. Slide show plays all still and movie files. To stop the slide show, press .</td>
</tr>
<tr>
<td>Advance</td>
<td>Auto Advances slides automatically. Slide show repeats after all files are displayed. Press to stop the slide show.</td>
</tr>
<tr>
<td></td>
<td>Manual Advances slides manually. Press or on the remote control to go to the next or previous still or movie image file. Select / to play movie files in the Movie Player window.</td>
</tr>
<tr>
<td>Interval</td>
<td>Allows you to specify a timed slide advance after a selected time interval. Select from 5 sec, 10 sec, 30 sec, 1 min and 5 min.</td>
</tr>
<tr>
<td>Close</td>
<td>Displays the Memory Stick Home.</td>
</tr>
</tbody>
</table>

Audio Select

Switches the sound to be heard. Select L (left sound), R (right sound) or L/R (left and right sounds) to hear the respective sound(s). The setting affects movie files.

Protect

Allows you to protect the file from any changes. Select On to protect. Select Off to unlock the protect.

Delete

Deletes the displayed file from the Memory Stick. Select Selected Items and press . When the dialog appears, select YES. If the file has been protected (or if the Memory Stick is locked), it cannot be deleted.

Option | Description
--- | ---
Information | Allows you to turn on or off the display of file information. Select On or Off.
Audio Select | Switches the sound to be heard. Select L (left sound), R (right sound) or L/R (left and right sounds) to hear the respective sound(s). The setting affects movie files.
Protect | Allows you to protect the file from any changes. Select On to protect. Select Off to unlock the protect.
Delete | Deletes the displayed file from the Memory Stick. Select Selected Items and press . When the dialog appears, select YES. If the file has been protected (or if the Memory Stick is locked), it cannot be deleted.
## Options Menu Options

The Options Menu includes the following options.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>File</td>
<td>The File option is available when Digi. Cam. Mode is set to Off. For details, see “Using Select Folder Menu” on page 67.</td>
</tr>
<tr>
<td>Sort</td>
<td>Allows you to change the order in which the Memory Stick files are displayed. Select from Name Order (in alphabetical order by filename), Name Order (in reverse alphabetical order by filename), Date Order (in chronological order by recording or modification date) and Date Order (in reverse chronological order by recording or modification date).</td>
</tr>
<tr>
<td>Filter</td>
<td>Allows you to selectively display specific file types within the selected folder. Select from Show Stills (only still image files), Show Movies (only movie files), and Off (all readable files).</td>
</tr>
<tr>
<td>Memory Stick</td>
<td>Displays the current status of the Memory Stick, including Memory Stick type, total capacity, used capacity, and free capacity.</td>
</tr>
</tbody>
</table>

## Select Folder Menu Options

The Select Folder Menu includes the following options.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Digi. Cam. Mode</td>
<td>On: Displays only JPEG and MPEG1 files defined by the DCF rules and JPEG and MPEG1 files recorded on a Sony digital still camera or digital video camera. Off: Displays all folders within the directories. JPEG and MPEG1 files in those directories are recognized even if they do not conform to the DCF file naming rules.</td>
</tr>
</tbody>
</table>
Using the Memory Stick Viewer

Using Select Folder Menu

Allows you to select different folders to view in the Memory Stick Viewer when you set Digi. Cam. Mode to Off.

2. Press ➔ to select the folder list.
3. Press ↑ or ↓ to select the folder which includes the file you want, and press ●.

To select the hidden folders, press ➔ to select the slider and press ↑ or ↓.

Using the Menus

Overview

Opening and choosing a menu

1. Press MENU to display the menu screen.
2. Press ◄ or ► to highlight the desired menu icon and press + to select it.
3. Use the arrow button to scroll through the features.
4. See the specific menu page for instructions on moving through the menu.

To end a menu session

❑ Press MENU again.

To end one menu session and move to another

❑ Press ◄ to return to the menu icons.
  Press ◄ or ► to choose the next menu icon and press + to select it.

The menu gives you access to the following features:

<table>
<thead>
<tr>
<th>Menu Icon</th>
<th>Description</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Video</td>
<td>Allows you to make adjustments to your picture settings. It also allows you to customize the Picture Mode based on the type of program you are viewing.</td>
<td>69</td>
</tr>
<tr>
<td>Audio</td>
<td>Offers enhanced audio options such as listening to second audio programming (SAP), or customizing the Effect of the sound on your LCD projection TV.</td>
<td>72</td>
</tr>
<tr>
<td>Screen</td>
<td>Allows you to set the wide screen mode, adjust the vertical center in wide mode, and set the 4:3 Default mode.</td>
<td>74</td>
</tr>
<tr>
<td>Channel</td>
<td>Allows you to set up a Favorite Channel list, run the Auto Program function, and more.</td>
<td>76</td>
</tr>
<tr>
<td>Parent</td>
<td>Lets you control the viewing of programs based on their ratings.</td>
<td>78</td>
</tr>
<tr>
<td>Setup</td>
<td>Provides several options for setting up your channels, labeling your Video inputs, and selecting the language of the on-screen menus.</td>
<td>82</td>
</tr>
</tbody>
</table>
Using the Video Menu

To select the Video Menu

1. Press MENU.

2. Press ‹ or › to highlight the Video icon 🎥 and press ‼.

3. Use the arrow button to scroll through the features.

4. Press ‼ to select a feature. That feature’s adjustment appears.

5. Use the arrow button to make the desired adjustments.

6. Press ‼ to select/set.

7. Press MENU to exit the menu screen.

To restore the factory default settings for Picture, Brightness, Color, Hue, Sharpness and Color Temp

- Press RESET on the remote control when in the Video menu.

Selecting Video Options

The Video menu includes the following options.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mode</td>
<td></td>
</tr>
<tr>
<td>Customized picture viewing</td>
<td>Vivid</td>
</tr>
<tr>
<td>Standard</td>
<td>Recommended for Normal viewing conditions.</td>
</tr>
<tr>
<td>Pro</td>
<td>Select to display a picture with minimum enhancements.</td>
</tr>
</tbody>
</table>

💡 You can alter the Video menu settings (Picture, Brightness, Color, etc.) for each Mode.

💡 You may set up a Picture Mode (Vivid, Standard, Pro) independently for each Video input (Video 1 - Video 7, including the Antenna input). Your Picture Mode settings will automatically be saved after each selection. This will enable you to customize the Picture Mode setting for each type of signal source. Typically, Vivid should be used for higher quality input signal sources, and Pro for lower quality signals.

💡 We recommend selecting Standard for normal home use.

💡 To quickly and easily change from one Video Mode to another, use PICTURE MODE on the remote control.

<td>Program DRC Mode Creates a high-resolution picture with 4x density, for high quality sources (i.e., DVD player, satellite receiver).</td>
</tr>
<tr>
<td></td>
<td>High Density Recommended for moving pictures.</td>
</tr>
<tr>
<td></td>
<td>Progressive Recommended for still images and text.</td>
</tr>
<tr>
<td></td>
<td>CineMotion Provides an optimized display by automatically detecting film content and applying a reverse 3/2 pulldown process. Moving pictures will appear clearer and more natural-looking.</td>
</tr>
</tbody>
</table>

*Note: Mild Mode is unavailable when the Mode is set to vivid.*
Using the Menus

Using the Menus

Advanced Video (Continued)

Palette
Allows you to customize the level of detail (Reality) and smoothness (Clarity) for up to three input sources. For example, you can create one Custom setting to optimize your cable input's picture, and create another to optimize your DVD player's picture. You can switch among the three Custom settings.

1 Press the arrow button to highlight Custom 1, Custom 2, or Custom 3 and then press 

The DRC palette appears.

2 Press the arrow button to adjust the position of the marker ( ). As you move the higher along the Reality axis, the picture becomes more detailed. As you move the to the right along the Clarity axis, the picture becomes smoother.

3 To save the setting, press 

To return the Custom options to the default factory settings, press the RESET button.

Advanced Video is unavailable when you have selected Mild picture mode, or you are watching 1080i, 720p and 480p sources with Video 5 to 7 inputs.

BN Smoother
Select to reduce noise caused by video encoding and decoding process. It is especially effective for watching a DVD or HDTV picture. Select from High, Medium, Low and Off.

An image may not be corrected due to the connected equipment.
Using the Menus

Using the Audio Menu

To select the Audio Menu

1 Press MENU.
2 Press ► or ◄ to highlight the Audio icon and press + -.
3 Use the arrow button to scroll through the options.
4 Press + - to select an option. That option’s settings appear.
5 Use the arrow button to scroll through the settings.
6 Press + - to select the desired setting.
7 Press MENU to exit the menu screen.

To restore the factory default settings for Treble, Bass and Balance
 Press RESET on the remote control when in the Audio menu.

Selecting Audio Options

The Audio menu includes the following options:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>

Using the Screen Menu

To select the Screen menu

1. Press MENU.
2. Press ◀ or ▶ to highlight the Screen icon  and press +.
3. Use the arrow button to scroll through the features.
5. Use the arrow button to scroll through the options.
6. Press + to select the desired option.
7. Press MENU to exit the menu screen.

Selecting Screen Options

The Screen menu includes the following options:

To change from one Wide Mode to another, use WIDE MODE on the remote control.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wide Mode</td>
<td>Select a Screen Mode to use for 4:3 sources.</td>
</tr>
<tr>
<td>Wide Zoom</td>
<td>Select to enlarge the 4:3 picture, to fill the 16:9 screen, keeping the original image as much as possible.</td>
</tr>
<tr>
<td>Normal</td>
<td>Select to return the 4:3 picture to normal mode.</td>
</tr>
<tr>
<td>Full</td>
<td>Select to enlarge the 4:3 picture horizontally only, to fill the wide screen.</td>
</tr>
<tr>
<td>Zoom</td>
<td>Select to enlarge the 4:3 picture horizontally and vertically to an equal aspect ratio that fills the wide screen.</td>
</tr>
</tbody>
</table>

Wide Mode is unavailable while in Twin View (page 50) or Freeze (page 53).

Wide mode is unavailable when you are watching 720p and 1080i sources, and when viewing photos from your Memory Stick media.
### Using the Menus

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>4:3 Default</td>
<td>Select the default Screen Mode to use for 4:3 sources.</td>
</tr>
<tr>

Using the Menus

Using the Parent Menu

The Parent Menu allows you to set up the TV to block programs according to their content and rating levels.

To select the Parent Menu

1. Press MENU.
2. Press ◀ or ▶ to highlight the Parent icon and press ▶.
3. Use the 0-9 buttons on the remote control to enter a four-digit password.
4. If this is the first time you are creating this password, confirm the password by entering it again. (The Parent Menu options appear.)
5. Press ◀ ◀ ◀ ◀ to change settings. Press ◀ to select the changed setting.
6. Press MENU to exit the Menu.

⚠️ You need your password for any future access into the Parent Menu. If you lose your password, see “Lost password” on page 97.

Selecting Parent Options

The Parent Menu includes the following options:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Parental Lock</td>
<td><strong>Off</strong> Parental lock is off. No programs are blocked from viewing.</td>
</tr>
<tr>
<td></td>
<td><strong>Child</strong> Maximum ratings permitted are:</td>
</tr>
<tr>
<td></td>
<td>US: TV-Y, TV-G, G</td>
</tr>
<tr>
<td></td>
<td>Canada: C, G, TV-Y</td>
</tr>
<tr>
<td></td>
<td><strong>Youth</strong> Maximum ratings permitted are:</td>
</tr>
<tr>
<td></td>
<td>US: TV-PG, PG</td>
</tr>
<tr>
<td></td>
<td>Canada: C8+, PG, 8 ans+, TV-PG</td>
</tr>
<tr>
<td></td>
<td><strong>Y. Adult</strong> Maximum ratings permitted are:</td>
</tr>
<tr>
<td></td>
<td>US: TV-14, PG-13</td>
</tr>
<tr>
<td></td>
<td>Canada: 14+, 13 ans+, TV-14</td>
</tr>
<tr>
<td></td>
<td><strong>Custom</strong> Select to set ratings manually.</td>
</tr>
<tr>
<td></td>
<td>US: See page 80 for details.</td>
</tr>
<tr>
<td></td>
<td>Canada: See page 81 for details.</td>
</tr>
</tbody>
</table>
To deactivate the Parental Control feature
❑ Set Parental Lock to OFF when in the Parent menu.

To change the password
1 Select Change Password option when in the Parent menu using the arrow button, and press .
2 Enter a new four-digit password using the 0-9 buttons.
3 Confirm the new password by entering it again.
4 Press MENU to exit the menu screen.

Viewing Blocked Programs

You can view a blocked program by entering the password.
1 Press ENTER when tuned to a blocked program.
2 Enter your password using the 0-9 buttons.
Parental Control will be canceled temporarily until you turn your LCD projection TV off.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Change Password</td>
<td>For changing your password.</td>
</tr>
<tr>
<td>Select Country</td>
<td>U.S.A. Select to use USA ratings (see page 80).</td>
</tr>
<tr>
<td></td>
<td>Canada Select to use Canadian ratings (see page 81).</td>
</tr>
</tbody>
</table>

If you are not familiar with the Parental Guideline rating system, you should select Child, Youth, or Young Adult to help simplify the rating selection.
To set more restrictive ratings, select Custom.
For descriptions of Child, Youth, and Young Adult ratings, see page 80.
## Selecting Custom Rating Options

If you selected U.S.A. as the country of residence on page 79, the Custom Rating Menu includes the following options. (If you selected Canada, see page 81.)

- **To ensure maximum blocking capability, the age-based ratings should be blocked.**

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Movie Rating</td>
<td></td>
</tr>
<tr>
<td>G</td>
<td>All children and General Audience.</td>
</tr>
<tr>
<td>PG</td>
<td>Parental Guidance suggested.</td>
</tr>
<tr>
<td>R</td>
<td>Restricted viewing, parental guidance is suggested for children under 17.</td>
</tr>
<tr>
<td>NC-17</td>
<td>No one 17 and under allowed.</td>
</tr>
<tr>
<td>TV Rating</td>
<td></td>
</tr>
<tr>
<td>TV-Y</td>
<td>All children.</td>
</tr>
<tr>
<td>TV-Y7</td>
<td>Directed to older children.</td>
</tr>
<tr>
<td>TV-G</td>
<td>General Audience.</td>
</tr>
<tr>
<td>TV-PG</td>
<td>Parental Guidance suggested.</td>
</tr>
<tr>
<td>TV-14</td>
<td>Parents Strongly cautioned.</td>
</tr>
<tr>
<td>TV-MA</td>
<td>Mature Audience only.</td>
</tr>
</tbody>
</table>

### Age-Based Options

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FV</td>
<td>Fantasy Violence.</td>
</tr>
<tr>
<td>D</td>
<td>Suggestive Dialogue.</td>
</tr>
<tr>
<td>L</td>
<td>Strong Language.</td>
</tr>
<tr>
<td>S</td>
<td>Sexual situations.</td>
</tr>
<tr>
<td>V</td>
<td>Violence.</td>
</tr>
</tbody>
</table>

### Content-Based Options

<table>
<thead>
<tr>
<th>Unrated</th>
<th>Block programs or movies that are broadcast without a rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Block</td>
<td>Blocks all programs and movies that are broadcast without a rating.</td>
</tr>
<tr>
<td>Allow</td>
<td>Allows programs and movies that are broadcast without a rating.</td>
</tr>
</tbody>
</table>

- If you select “Block,” please be aware that the following programs may be blocked: emergency broadcasts, political programs, sports, news, public service announcements, religious programs and weather.

- The content ratings will increase depending on the level of the age-based rating. For example, a program with a TV-PG V (Violence) rating may contain moderate violence, while a TV-14 V (Violence) rating may contain more intense violence.
**Canadian custom rating options**

If you selected Canada as the country of residence on page 79, the Custom Rating Menu includes the following options. (If you selected U.S.A., see page 80.)

Using the Menus

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clock/Timers</td>
<td>Lets you set the clock on your TV and allows you to program your TV for scheduled viewing using the Timers.</td>
</tr>
<tr>
<td>Sleep</td>
<td>Allows you to select the time in minutes (15, 30, 45, 60, or 90) that you want the TV to remain on before shutting off automatically.</td>
</tr>
<tr>
<td>Timer 1</td>
<td>You can use the Timers to program the TV to turn on and off and tune to a specific channel at two scheduled viewing times.</td>
</tr>
<tr>
<td>Timer 2</td>
<td></td>
</tr>
</tbody>
</table>

Timer 1 and Timer 2 are not available to be set until you set the Current Time.

1. Press † or ‡ to highlight Timer 1 or Timer 2. To set the timer, press †.

2. Press † or ‡ to highlight one of the following options, then press ±.
   - Program: Select to set the Timer by day, time, duration, and channel.
   - Off: Select to turn off the Timer. (Your previous settings are saved.)

3. If you selected Program in step 2, press † and ‡ to set the day(s), hour, minute, duration, and channel number. Press ± or press † to confirm each setting and move to the next setting. Press † to go back to the previous setting.

4. Press MENU to exit the Menu. An LED on the front panel will light, indicating the timer has been set.

   ![To go directly to programming Timer 1 or 2, press ± instead of pressing †.]

Current Time

1. Press ± to select Current Time.

2. Press † and ‡ to set the current time (day, hour, and minute). Press ± (or press †) to confirm each setting and move to the next setting. Press † to go back the previous setting.

3. Press MENU to exit the Menu.
### Using the Menus

<table>
<thead>
<tr>

- **Level 1-4 (manual)**: Select the value with which double images are improved.
Programming the Remote Control

The remote control is preset to operate Sony brand video equipment.

<table>
<thead>
<tr>
<th>Function</th>
<th>Equipment</th>
<th>Programmable Code Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>VCR/DVD</td>
<td>Sony VCR</td>
<td>301</td>
</tr>
<tr>
<td>SAT/CABLE</td>
<td>Sony DSS tuner</td>
<td>801</td>
</tr>
</tbody>
</table>

If you have video equipment that you want to control with the LCD projection TV's remote control, use the following procedures to program the remote control.

Tips
- If more than one code number is listed, try entering them one by one until you come to the correct code for your component.
- If you enter a new code number, the code number you previously entered at that setting is erased.
- In some rare cases, you may not be able to operate your component with the Sony remote control. In this case, use the component’s own remote control unit.

The equipment must have infrared (IR) remote capability in order to be used with the remote control.

From the “Manufacturer’s Codes” listed on page 87, select the three-digit code number for the manufacturer’s code for your component. If more than one code number is listed, start with the number listed first. Use the code number to complete the following procedure.

1. Press CODE SET.
2. Press the desired FUNCTION button.
3. Input the three-digit manufacture's code number.
4. Press ENT.

When no code number is input for 30 seconds or invalid or incorrect numbers are input, the remote control is reset to the normal TV remote control mode.

Notes on Using Memory Stick, Memory Stick PRO Media

Memory Stick, Memory Stick PRO Precautions

When using Memory Stick, Memory Stick PRO media, follow these precautions:

- To avoid permanent damage to still image data, do not turn off the TV or remove Memory Stick media from the insertion slot while data is being read (as indicated by the Memory Stick indicator light being on).
- Avoid touching the terminal of Memory Stick media or bringing it into contact with a metal object.
- Do not drop, bend, or submit Memory Stick media to external shock.
- Do not disassemble or modify Memory Stick media.
- Avoid getting liquid on Memory Stick media.
- Apply labels only within the designated label area.

- To avoid permanent damage to still image data, do not use or store Memory Stick media in a location subject to:
  - High temperature (such as near a heater or inside a hot car)
  - High humidity
  - Direct sunlight
  - Corrosive substances
  - Magnetic fields
  - Excessive dust
  - Static electricity or electric noise
  - Electric surges
- Store and carry Memory Stick media in its original case to ensure protection of stored data.
- Save a backup of stored data.
- Memory Stick PRO of maximum 1GB-memory can be used for this unit.
Notes on Using Memory Stick Duo

Memory Stick Duo is a new, compact version of the standard-sized Memory Stick recording medium. You can use a Memory Stick Duo on your LCD projection TV by inserting a Memory Stick Duo into an adapter before inserting it into the TV.

- Be sure to attach a Memory Stick Duo to the adapter with the correct orientation.
- Be sure to insert the Memory Stick Duo adapter into the Memory Stick slot with the correct orientation. Otherwise, the LCD projection TV may be damaged.
- Do not insert the Memory Stick Duo adapter without the Memory Stick Duo attached. Doing so may result in malfunction of the LCD projection TV.
**Contacting Sony**

If, after reading these operating instructions, you have additional questions related to the use of your Sony television, please call our Customer Information Services Center at 1-800-222-SONY (7669) (US residents only) or (416) 499-SONY (7669) (Canadian residents only).

### Troubleshooting

#### Twin View

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Remedies</th>
</tr>
</thead>
<tbody>
<tr>
<td>I cannot get Twin View to work</td>
<td></td>
</tr>
</tbody>
</table>
- If you are using a cable box to unscramble all channels (as shown on page 28), you cannot use the Twin View feature. This is because the cable box can unscramble only one channel at a time.  
- You can use Twin View to view a signal from a different source that is connected to the TV’s A/V jacks (such as a VCR or DVD player) in the second window by pressing TV/VIDEO while in Twin View.  
- Sources connected to the AUX, HD/DVD IN 5 and 6, DVI-HDTV IN 7 inputs display in the left Twin View window, but not the right. |
| There is no Twin View window, or it is just static |  
- Be sure the Twin View window is set to a video input or channel that has a signal airing.  
- You might be tuned to a video input with nothing connected to it. Try cycling through the video inputs by pressing TV/VIDEO. |
| Twin View cannot display anything but TV channels | Try cycling through the video inputs by pressing TV/VIDEO. Check that the Video Label option is not set to Skip. (See the Setup Menu on page 83.) |
| Twin View displays the same program in both windows | Both Twin View windows might be set to the same channel. Try changing channels in either window. |
## Remote Control

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Remedies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Remote control does not operate</td>
<td>- The batteries could be weak. Replace the batteries.&lt;br&gt; - Check the orientation of the batteries.&lt;br&gt; - Press FUNCTION (VCR/DVD, SAT/CABLE or TV) to select the equipment that you want to operate.&lt;br&gt; - Make sure this unit’s power cord is connected securely to the wall outlet.&lt;br&gt; - Locate the unit at least 3-4 feet away from fluorescent lights.</td>
</tr>
<tr>
<td>Cannot change channels with the remote control</td>
<td>- If you are using the TV to change channels, first press FUNCTION TV button.&lt;br&gt; - If you are using another device to change channels, be sure you have not inadvertently switched your TV from the channel 3 or 4 setting. Use the Channel Fix option to “fix” the channel based on the hookup you used (see page 76).&lt;br&gt; - If you are using another device to change channels, be sure to press FUNCTION (VCR/DVD, SAT/CABLE or TV) for that device.</td>
</tr>
<tr>
<td>Remote control does not operate non-Sony video equipment</td>
<td>- If you replaced the batteries to the remote recently, the code numbers for the video equipment may need to be reset.&lt;br&gt; - There may be more than one code for the equipment that you are attempting to operate.&lt;br&gt; - There is a possibility that some non-Sony equipment cannot be operated by your Sony TV remote. You may need to use the equipment’s original remote control.</td>
</tr>
</tbody>
</table>

## Memory Stick

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Remedies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Image does not display</td>
<td>- Make sure the Memory Stick is inserted properly (see page 57).&lt;br&gt; - Memory Stick functions are not available while using Twin View, Freeze or Favorite Channel functions.&lt;br&gt; - Press the MEMORY STICK button (see page 45).&lt;br&gt; - Make sure that the photo or movie files are contained in the Memory Stick.&lt;br&gt; - Set Digi. Cam. Mode to Off and select the folder when the photo or movie image is processed by the computer.</td>
</tr>
<tr>

<tr>
<td>Black bands appear at the top and bottom of the screen</td>
<td>🗞️ Some wide-screen programs are filmed in aspect ratios that are greater than 16:9 (this is especially common with theatrical releases). Your LCD projection TV will show these programs with black bands at the top and bottom of the screen. For more details, check the documentation that came with your DVD (or contact your program provider).</td>
</tr>
<tr>
<td>Certain programs on DVD or other digital sources display a loss of detail, especially during fast-motion or dark scenes</td>
<td>🗞️ The compression used by certain digital broadcasts and DVDs may cause your TV’s screen to display less detail than usual, or cause artifacts (small blocks or dots, pixelations) to appear on your screen. This is due to your TV’s large screen and ability to show very fine detail, and is normal for certain digitally recorded programs. Adjust the reality/clarity in the Palette menu (see page 71) to optimize the picture while viewing these sources.</td>
</tr>
<tr>
<td>Some video sources do not appear when you press TV/VIDEO</td>
<td>🗞️ Ensure that Video Label is not set to “Skip” (see “Video Label” on page 83).</td>
</tr>
</tbody>
</table>
### Audio

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Remedies</th>
</tr>
</thead>
</table>
| Good picture, no sound        | ❑ Press MUTING so that Muting disappears from the screen (see page 44).  
                                | ❑ Make sure the Speaker option is set to On in the Audio Menu (see page 73).                                                                                                                            |
| Audio noise                   | ❑ Communication problems may occur if the infrared communication equipment (e.g., infrared cordless headphones) is used near the TV. Please use headphones other than infrared cordless headphones. Also, if you use the infrared communication equipment other than infrared cordless headphones, move the infrared transceiver away from the TV until the noise is eliminated, or move the transmitter and receiver of the infrared communication equipment closer together. |
| Cannot gain enough volume     | ❑ Increase the volume of the cable box using the cable box’s remote control. Then press FUNCTION TV button and adjust the TV’s volume.                                                                                     |
| when using a cable box        |                                                                                                                                                                                                           |
| Sound seems weak or           | ❑ The TV’s audio might be set to Auto SAP or Mono, when it might be better set to Stereo. In the Audio Menu (see page 72), set the MTS setting to Stereo. If already set to Stereo, switch to Mono (which may reduce background noise during weak stereo broadcasts). |
| insufficient                  |                                                                                                                                                                                                           |
| Cannot raise the volume       | ❑ If the Speaker option is set to Off and the Audio Out option is set to Fixed (in order to output the sound to your audio system) use your audio receiver to adjust the sound (see page 73). Or, to use the TV remote control, set the Audio Out option to Variable. |
| on external speakers          | ❑ To turn on the TV speakers, set the Speaker option to On (see page 73).                                                                                                                                   |

### Channels

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Remedies</th>
</tr>
</thead>
</table>
| Cannot receive upper channels | ❑ Change the Cable option to Off (see page 76).  
                                | ❑ Use Auto Program in the Channel Menu to add receivable channels that are not presently in the TV’s memory (see page 76).                                                                                     |
| (UHF) when using an antenna   |                                                                                                                                                                                                           |
| TV is fixed to one channel    | ❑ Use Auto Program in the Channel Menu to add receivable channels that are not presently in the TV’s memory (see page 76).  
                                | ❑ Check your Channel Fix settings (see page 76).                                                                                                                                                           |
| Cannot receive any channels   | ❑ Use Auto Program in the Channel Menu to add receivable channels that are not presently in the TV’s memory (see page 76).  
                                | ❑ Check your cable settings.  
                                | ❑ Make sure the Cable option is set to On in the Channel Menu (see page 76).                                                                                                                             |
| when using cable TV           |                                                                                                                                                                                                           |
| Cannot receive or select      | ❑ Use Auto Program in the Channel Menu to add receivable TV channels that are not presently in TV memory (see page 76).                                                                                     |
| channels                      |                                                                                                                                                                                                           |
| Cannot receive digital        | ❑ Check the connections between the DTV receiver and the LCD projection TV (see page 39).                                                                                                                                 |
| channels (when a DTV receiver | ❑ Check your local listings to find out if you can receive digital broadcasts in your area.                                                                                                                |

</table>
Flashing Indicators on the Front of the Monitor

The POWER/STANDBY (red) and/or LAMP (red) indicators indicate the conditions of the LCD projection TV and warnings by lighting or flashing, as follows.

The POWER/STANDBY indicator flashes.
- The lamp for the light source is ready to turn on.

The POWER/STANDBY indicator flashes three times.
- The lamp cover is not attached securely. When you correct, the POWER/STANDBY indicator goes out and the LCD projection TV enters the standby mode (see page 16).

The LAMP indicator flashes.
- The lamp for the light source burns out.
  Replace it with new one (see page 13).

If the LCD projection TV is not recovered after correcting the problems, contact with qualified Sony personnel.

### Other Information

**Supplied Accessories**
- **Remote Control**: RM-Y913
- **AA Batteries**: 2 supplied for remote control
- **Cleaning Cloth**: 1

**Optional Accessories**
- **TV Stand**: SU-GW1 (for KF-50/60WE610), SU-GW2 (for KF-42WE610)
- **Lamp**: XL-2100U
- **AV Cable**: VC-810S/820S/830S
- **Control S Cable**: RK-G69
- **Component Video Cable**: VMC-10/30
- **AV Receiver**: STR series or equivalent
- **Memory Stick media**: Memory Stick Media, Memory Stick Duo Media, Memory Stick Media with Memory Select Function, Memory Stick PRO Media*

* Memory Stick PRO media features vary by and are dependent upon the design of host hardware devices. Memory Stick PRO in this projection TV has been tested to support up to 1 GB media capacity and does not support high-speed transfer, MagicGate copyright protection technology, or access control security features.

Design and specifications are subject to change without notice.
