

ask Sony

"I already have a computer. So why do I need Internet access from my TV?"

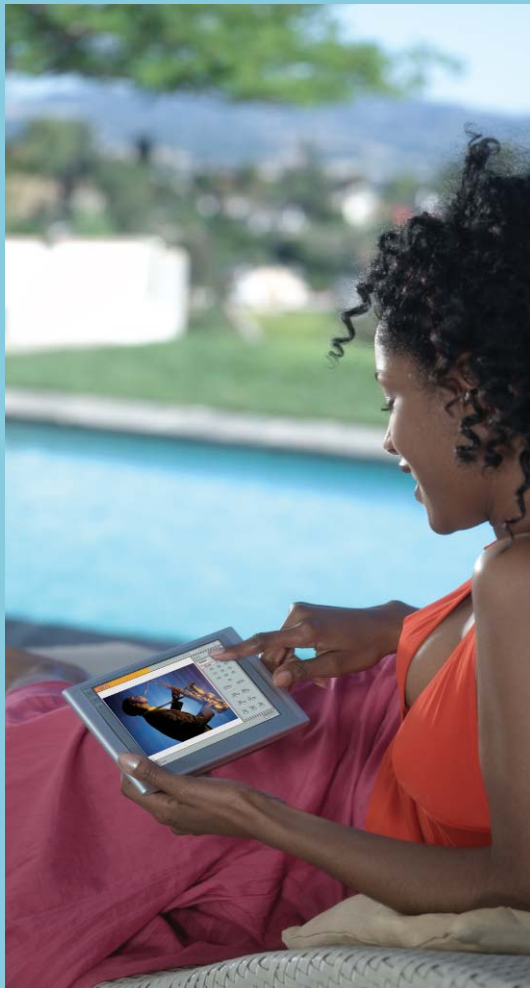

Our Sony engineers asked the very same question.
And they came up with some pretty cool answers.

Accessing the Internet is now as easy and as instant as watching TV.
So you'll no longer have to wait for a PC to boot up.

With LocationFree™ TV you can simultaneously watch a ball game
while surfing online to check scores around the league.

You can check your email during
commercial breaks without leaving your seat.

Location | Anywhere

LocationFree™ TV.

It will expand your A/V home network
in ways unlike any the world has ever seen.

And it's only from Sony.

SONY

LocationFree TV | Destination Freedom

LocationFree™ TV

Sony introduces the only television experience
as boundless as your imagination.

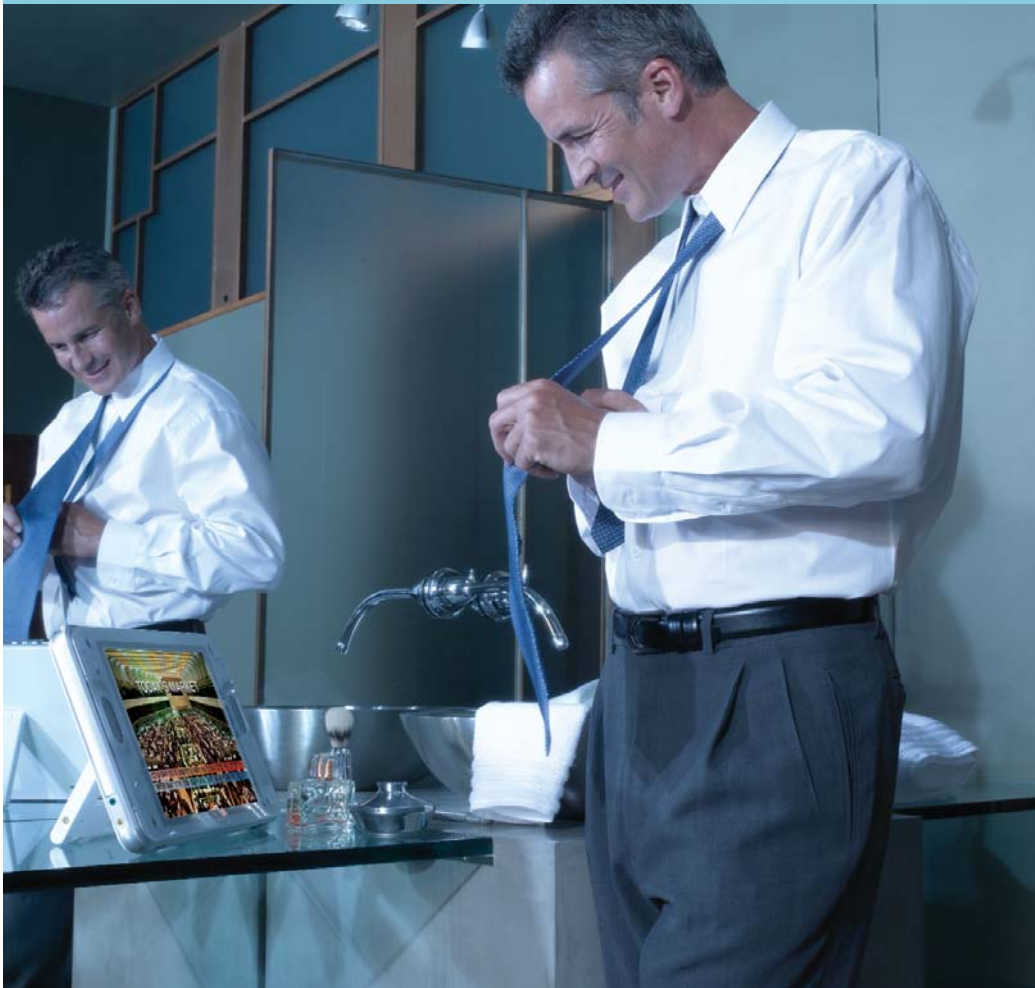

The first in an exciting new line of
Sony Network Audio Video products,
LocationFree™ TV is the definitive wireless TV experience.

No cables. No plugs.

Just your favorite programs, movies, even Internet and email,
streamed directly from the Base Station
to an elegantly designed, 12.1" or 7" Flat Panel LCD display
that sets up anywhere you dream to take it.

ask Sony

"How can I watch TV anywhere at home without my screen being plugged into anything?"

While the advantages are many and magnificent,
it is important to understand how Sony LocationFree™ TV works.

First, connect your home entertainment equipment to the LocationFree TV Base Station.
You can connect a range of devices, from satellite/cable receivers to
DVD players and personal video recorders.

Plug your Base Station into a broadband Internet connection.
This will allow you to surf the web or send and receive email
the same way you would with a PC.

The Base Station will stream digital video and audio
from your home video/audio system to your LocationFree TV display,
without wires, up to 100 ft away.

You can also access your personal content, like DVDs, remotely from
an Ethernet port in a hotel room or Internet hotspots at airports, universities and cafes.*

*For remote use, you must have a static IP address or Dynamic DNS service for the Base Station.
Picture quality depends on uplink speed of ISP in your home and downlink speed of remote access.

LIKE NO OTHER™

Location | Bedroom

From bedroom to breakfast to the boardroom, check today's stock quotes or talk show gossip as you get ready for work.

Location | Kitchen

Your favorite cooking show is now your personal assistant in the kitchen. The wall mounted frame[†] spices up any space. And because LocationFree™ TV is a dual band wireless TV (2.4GHz & 5GHz, 802.11a & 802.11g, max 54Mbps), reception will be excellent regardless of interference from 2.4GHz devices such as microwaves and cordless phones. LocationFree TV also uses the advanced QoS (Quality of Service) technology, which delivers more secured bandwidth for reliable audio and video transmissions even in high-traffic wireless environments.

[†]Accessories sold separately.

Location | Airport

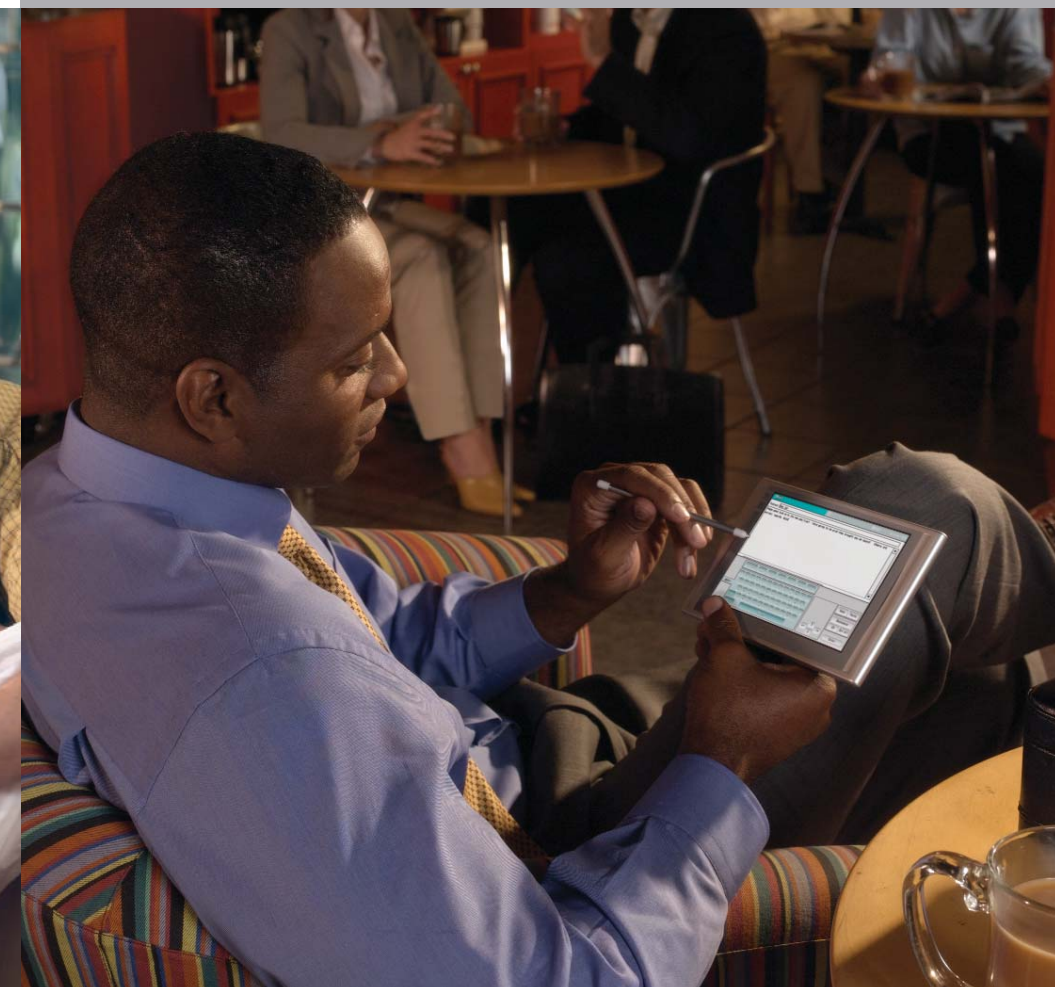

The World Is Your Living Room
Because LocationFree™ TV uses wireless and Internet technology to transmit its signal, you can access your home entertainment devices anywhere you have broadband Internet access. Which means the next time you're traveling the globe, you're just an Internet hotspot away from streaming personal content, like your favorite DVD movies, directly from home.*

Location | Sunroom

Home Is Where The Wires Aren't
LocationFree™ TV is engineered to be the perfect companion as you move from room to room. With built-in speakers, stand and carrying handle, its convenience is only surpassed by its sophisticated design. And because LocationFree TV is from Sony, it will deliver the same level of spectacular video and audio you've come to expect from the leader in television.

Location | Coffee Shop

When you're out and about, Internet access means you'll have instant access to your email, your favorite website or personal content you left back at home.*

*For remote use, you must have a static IP address or Dynamic DNS service for the Base Station. Picture quality depends on uplink speed of ISP in your home and download speed of remote access.

Location | Hammock

Surf the web or watch a game while you're catching rays in the backyard. Hang out even longer with an extra battery![†] And you know the image will always be crisp thanks to advanced audio and video technology. 3D Y/C separation circuitry ensures brilliant clarity and color. DCDi* circuitry smoothes jagged angles. Motion adaptive I/P conversion keeps fast motion clear. Digital audio amplifier delivers amazing distortion-free sound.
