Getting Started

Press to select the speaker jacks for the SPEAKER jacks.

Power

Connect the speaker cords and the power cord to an electrical outlet.

Select the speaker cords and the power cord to an electrical outlet.

Note on DualDisc

A DualDisc is a two-sided disc product which mates analog audio (on the CD side) with digital audio and video (on the DVD side) products. Since these discs have two different types of data on the same disc, playback is not guaranteed.

Note on copyright protection technologies

This product is designed to playback discs that conform to the Compact Disc (CD) standard. Some recently introduced advanced audio recording technologies have not been included. Discs that are not compatible with this product may be damaged. Use with care.

Music discs encoded with copyright protection technologies

This product is equipped with technologies designed to prevent illegal copying. If the software is not compatible with this product, it may not operate properly.

License and Trademark Notice

This product is equipped with Apple's iPod/iPhone Connector. For more information, please visit the Apple website.

Notes on playing multisession discs

If the first session on the disc is a CD-DA session, the other sessions continue to play back MP3 files accordingly in multiple sessions. If the first session on the disc is an MP3 session, the other sessions do not play back.
Playing the iPod/iPhone

Place the iPod/iPhone on the iPod/iPhone tray. Press PLAY MODE to select the iPod function. When you select the iPod function, the iPod/iPhone icon appears in the display.

Set the play timer.

Press PLAY TIMER to set the play timer. The iPod/iPhone icon changes to a clock icon, and the play timer function becomes active. Press PLAY TIMER again to cancel the play timer function. All preset clock settings are deleted when the play timer is canceled.

Use buttons on the unit to adjust the volume.

Press VOLUME + or VOLUME - to adjust the volume. Each press of the buttons increases or decreases the volume by 1 step. The volume setting is displayed in the display. To adjust the volume during playback, playback will pause and you can take an incoming call.

Use the volume control on the iPod/iPhone.

Press the track/album/artist/genre/search, volume, tracklist, options, shuffle, repeat, or menu button to control the iPod/iPhone. The control button on the iPod/iPhone is selected and the player is stopped. You can return to the previous menu or select a menu item using the navigation button. Press CLEAR to exit from the menu.

Creating your own program

Program Play

Use the hexagon on the remote to create your own program.

Select the iPod function.

Press FUNCTION (+) 2 or FUNCTION (-) 2 repeatedly until the iPod function is selected.

Select the program mode.

Press PLAY MODE (+) or PLAY MODE (-). The iPod function appears in the display.

Select the iPod function.

Press PLAY MODE (+) or PLAY MODE (-). The iPod function appears in the display.

Pause playback.

Press PAUSE. The iPod/iPhone is paused during playback. To resume playback, press PLAY.

Repeat the same procedure as above until “OFF” appears in the display.

Stop playback.

Press CLEAR or PLAY MODE (-). The iPod/iPhone is stopped during playback.

Resume playback.

Press PLAY MODE (+). The iPod/iPhone is resumed during stoppage.

Hold down the track/album/artist/genre/search, volume, tracklist, options, shuffle, repeat, or menu button to control the iPod/iPhone.

Press any button to select the iPod menu.

Press the iPod menu button to select the iPod menu.

Select the iPod function.

Press PLAY MODE to select the iPod function. When you select the iPod function, the iPod/iPhone icon appears in the display.

Resume playback.

Press PLAY. The iPod/iPhone starts playback from the point where it was stopped.
