GETTING CONNECTED

# **MAXIMUM TELEVISION™**

MXT-4110 MXT System

# Welcome to Maximum TV™

You are about to experience the thrill and excitement of your new **Sony MXT System**! Before you begin your many hours of Maximum TV™ enjoyment, we will guide you through the setup and operation of your system in an easy to understand and straight-forward approach. Think of your system as a combination of Source, Sight, and Sound. We have organized setup into these categories for simplification. **Source** are the components which provide your program material. These include Broadcast, Cable TV and Videotapes. **Sight** is your TV, the component you need to enjoy the Broadcast, Cable TV and Videotape Sources. **Sound** delivered by your SAVA Speaker System, is the key ingredient to providing the Maximum TV Surround Sound experience.

We thank you for your MXT System purchase. If you have any questions, please call our Consumer Information Services Center at 1-800-222-SONY. Enough talk, let's get started.

# Positioning

Stop and take a look at your room. Before unpacking your MXT system, you'll want to know where everything will be placed. Look at the diagram below, and position your furniture so that you will be able to sit in front of the TV. The TV stand should have enough room on either side to accommodate your MXT System.

A rough rule of thumb is to position the speakers relative to the seating position so that a triangle is formed. Best viewing and listening is achieved directly in front of the TV. The rear speakers should be placed along the rear walls.
