Error: Unknown BIOS Version Appears When Accessing Sony Notebook Setup. PCG 705 707 717 719 729

After upgrading the notebook computer to Windows 98 and updating the BIOS to version 2.13 or later, the following error message appears in Sony Notebook Setup:

**"E:\TMP\vsst\Shinsaku\Sony Notebook Setup\Beta\SNSProp\SUResourceBiosIndexTable.cpp
Unknown BIOS version R0213S1."**

This issue may be resolved by an upgrade to Sony Notebook Setup. Follow the steps below to download and install the update.

1. Go to the Sony Support web site at:

<http://www.ita.sel.sony.com/support/pc/>

2. Click Windows 98 Updates
3. Read and accept the License agreement.
4. Click the appropriate notebook model link.
5. Scroll to the section titled 'Unknown BIOS version error messages'.
6. The download consists of two files, an executable (EXE) and a text (TXT) file. the text file contains the instructions for downloading and installing the executable files.

S3090529.TXT (1 KB)

S3090529.EXE (2.3 MB)

7. Simply follow the prompts during the installation to complete the download.
