

Why is Civilization II Playing in the Wrong Language?

Once set, the language cannot be changed in Civilization II. If you have set it to the wrong language, you will need to go into the file CIV.INI to change it back to English. To do this, do the following:

1. In Windows Explorer, locate the Windows folder in the C: drive.
2. Locate file CIV.INI
3. Double-click on CIV.INI. It will open in Notepad.
4. Find the line that begins "Language Preference..."
5. Change the line to read **Language Preference=1**
6. Close Notepad and click on **YES** to save changes.
7. The next time you play civilization it will be in English.
