

INTRODUCING

ROOMLINK™

NETWORK MEDIA RECEIVER

PCNA-MR10

Enjoy your Sony VAIO® PC Videos,
Music, and Photos on your Home
Entertainment Center TV and Stereo

- ▶ Use RoomLink™ Media receiver to Record Live TV* from your living room
- ▶ From your TV, view digital photos and videos recorded with Giga Pocket™ personal video recorder
- ▶ Listen to your PC's music collection on your home stereo system

Stream recorded TV and personal video content to your home entertainment center TV from a Sony VAIO® PC equipped with Giga Pocket™ Personal Video Recorder and VAIO Media™ software. Live TV can be recorded straight from RoomLink™ receiver for later playback.*

Enjoy your personal digital music collection on your home stereo. RoomLink™ receiver has audio line outputs as well as an optical audio output (SPDIF) for great audio playback quality. RoomLink™ receiver brings your entire music collection to you where you want, when you want.

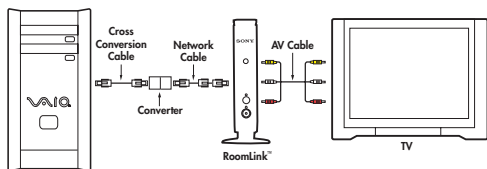

Use your television to show your photo slide show with RoomLink™ receiver. Your PC's digital photo collection is now available in your living room with RoomLink's photo streaming capabilities. RoomLink receiver and your VAIO PC make your home entertainment center come alive with your videos, music, and photos.

SONY®

An Ethernet (RJ-45) connection allows for RoomLink™ Media receiver to become part of your home network, streaming your VAIO® PC Media content throughout your home.

Connecting RoomLink™ to your TV

RoomLink™ receiver is connected to your VAIO® PC through your home network. It connects to your TV or home stereo via S-Video, Composite, and/or Optical Digital Audio outputs.

Compatible VAIO® Notebook and Desktop Models

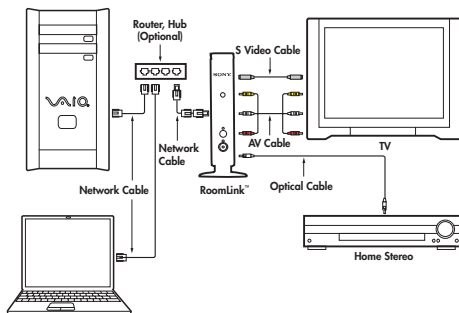

Microsoft® Windows® XP Professional/Windows® XP Home Edition installed on VAIO® Models beyond September 2002. (VAIO Media™ Ver.2.0 Pre-install models)
