(OPTIONAL ACCESSORY)

Sony Telecom™

Spread Spectrum **900 MHz**

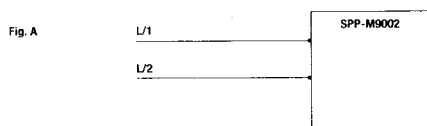

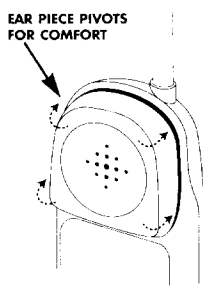

2Line

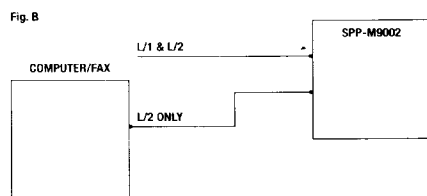

SPP-M9002

FEATURES

- **2-LINE OPERATION** accesses two separate phone lines from one phone (requires two-line installation from your local telephone company)
- **HIGH POWER DIGITAL SPREAD SPECTRUM FOR SUPERIOR RANGE AND INTERFERENCE REDUCTION**—900 MHz band starts with low interference because it's less crowded than conventional 43-49MHz band; Digital Spread Spectrum technology provides up to 100 times more output than other 900MHz systems; so you can carry your cordless phone further—and still carry on a conversation
- **EZFIT™ EAR PIECE** gives you a better coupling to your ear for better sound and increased comfort
- **DIGITAL PRIVACY** uses higher technology to keep your private conversations private; sophisticated digital speech encoding between handset and base unit
- **DIGITAL SOUND QUALITY** uses the technology behind the Compact Disc to achieve amazing voice accuracy; sounds less like older cordless phones, more like a corded phone
- **DUAL BATTERY CAPABILITY** base unit has the built-in battery charger. You can charge an optional battery (BP-T31) in the base unit
- **LIGHTED KEYPAD** allows for easier dialing in the dark
- **DATA PORT CAPABILITY** allows you to connect a computer, modem, fax or answering machine

— OR —

- **HEADSET JACK** is built into the headset. You can plug in an optional headset that allows you to talk hands free
- **AUTO CHANNEL HOPPING** automatically scans all available channels and selects the clearest one for your call; during your call, if any interference is encountered, automatically hops to the channel that offers the clearest reception, without interrupting your conversation
- **UP TO 6-HOUR TALK TIME & 10-DAY STANDBY** allows longer conversation and longer intervals between charging batteries
- **10-NUMBER SPEED DIALING** for two-step access to frequently dialed numbers
- **1-WAY PAGING** sends a beep to the handset so you can summon a co-worker or family member or locate a missing handset
- **3-WAY CONFERENCE CAPABILITY** allows you to talk simultaneously on both lines with two separate outside parties
- **BELT CLIP** makes it easy to "wear" your cordless phone and keep hands free for other activities
- **WALL MOUNTING** of base unit with supplied bracket, compatible with standard wall outlets
