**CALLERID**  
with call waiting

## TL-ID10

### FEATURES

- **CALLER ID WITH CALL WAITING** allows you to screen the phone number and name of an incoming second call while you talk on the first (requires specific Caller ID with Call Waiting service from phone service provider).
- **JOG DIAL™ NAVIGATOR** for one-finger access to directory dialing numbers and Caller ID memories; simply rotate the dial to find the entry you're looking for and push the button to dial the number!
- **3-LINE BACKLIT LCD DISPLAY** provides all the information you need (including phone number, name, time/date, etc.) at a glance, even in dimly lit situations.
- **99 CALLER ID MEMORY INCLUDING 50 NUMBER DIRECTORY** is flexible to allow you the option of up to 50 permanently stored names/numbers while remembering up to 49 of your past calls. If you use less than 50 numbers in your permanent directory, you can keep track of more past calls (i.e. 40 permanent/59 past calls, 10 permanent/89 past calls etc.).
- **20 VIP MEMORY** lets you store up to 20 of your most important names/numbers so that you immediately know the priority of the incoming call.
- **VIP CALL INDICATOR** indicates the person calling is stored in your VIP memory via a flashing green LED (This happens when the phone is ringing and when you scroll through VIP memory).
- **NEW CALL INDICATOR** indicates you have a new call via a steadily lit red LED.
- **VISUAL MESSAGE WAITING INDICATOR** lets you know when you have a message waiting in your voice mail via a flashing red LED (Requires a subscription to voice mail service through your local telephone service provider).
- **LAST NUMBER REDIAL** at the touch of a button.
- **MULTI-LANGUAGE DISPLAY (ENGLISH/SPANISH)** allows you to select the language you'd like to use.
- **WALL MOUNTABLE:** Supplied bracket compatible with standard wall outlets.
- **AC ADAPTOR INCLUDED**
