JOG DIAL

Sony Telecom™

Spread Spectrum **900** MHz

Jog Dial

CALLERID
with call waiting

SPP-S9101

FEATURES

- **HIGH POWER DIGITAL SPREAD SPECTRUM FOR SUPERIOR RANGE AND INTERFERENCE REDUCTION**—900 MHz band starts with low interference because it's less crowded than conventional 43-49MHz band; Digital Spread Spectrum technology provides up to about 100 times more output than other 900MHz systems; so you can carry your cordless phone further—and still carry on a conversation
- **JOG DIAL™** for one-finger access to directory dialing numbers and Caller ID memories; simply push the button and jog up and down to find the entry you're looking for; push the button again to dial the number!

- **100 NUMBER DIRECTORY** allows you to store up to 100 names and numbers for easy access
- **EZFIT™ EAR PIECE** gives you a better coupling to your ear for better sound and increased comfort
- **DIGITAL PRIVACY** uses higher technology to keep your private conversations private; sophisticated digital speech encoding between handset and base unit
- **DIGITAL SOUND QUALITY** uses the technology behind the Compact Disc to achieve amazing voice accuracy; sounds less like older cordless phones, more like a corded phone

- **CALLER ID WITH CALL WAITING (20 MEMORIES)** allows you to screen the phone number and name of an incoming second call while you talk on the first (requires combination of Caller ID and Call Waiting services)
- **DUAL BATTERY CAPABILITY** base unit has the built-in battery charger. You can charge an optional battery (BP-T31) in the base unit
- **3-LINE BACKLIT LCD DISPLAY ON HANDSET** for clear presentation of caller ID information, number dialed and more. It's even backlit for easy viewing
- **LIGHTED KEYPAD** allows for easier dialing in the dark
- **UP TO 6-HOUR TALK TIME & 10-DAY STANDBY** allows longer conversation and longer intervals between charging batteries
- **AUTO CHANNEL HOPPING** automatically scans all available channels and selects the clearest one for your call; during your call, if any interference is encountered, automatically hops to the channel that offers the clearest reception, without interrupting your conversation
- **1-WAY PAGING** sends a beep to the handset so you can summon a co-worker or family member or locate a missing handset
- **3-NUMBER ONE-TOUCH DIALING** for instant access to your most important numbers
- **WALL MOUNTING** of base unit with supplied bracket, compatible with standard wall outlets

SPECIFICATIONS

FREQUENCY: 900MHz Band

BATTERY: 3.6V Rechargeable NiCad Battery Pack (BP-T31)

DIMENSIONS (WHD): Base: 5 3/8" x 2 3/4" x 10 1/2"
