About Recovery
Recovery is the process of restoring the built-in storage device back to its original factory condition. Refresh is the process of reinstalling the operating system with the main settings and personal data retained.

About the ASSIST Button
Press the ASSIST button to perform regular maintenance of your VAIO computer or to solve problems you might encounter when using the computer.

Checking the Volume of the Recovery Area
Your built-in storage device contains the recovery area where the data for the system recovery is stored.

Creating Recovery Media
Follow the instructions below to create Recovery Media.

Notes on Recovery
Read the following notes thoroughly before recovering your VAIO computer.

Recovering from Recovery Media
If the recovery area data has been corrupted or erased, you can use Recovery Media to recover your VAIO computer. However, recovering the computer using the Recovery Media will take longer than using the recovery area.

Recovering from the Recovery Area
You can recover your VAIO computer from the recovery area on the built-in storage device. This recovery method is faster than using Recovery Media.

Refreshing Your VAIO Computer
If your VAIO computer has become unstable, it is recommended that you use the refresh function provided by Windows. Refresh the computer by following these steps.

Removing Recovery Content to Free up Disk Space
Your built-in storage device contains the recovery area where the data for system recovery is stored. If your VAIO computer includes a solid state drive (SSD), you might want to minimize the recovery area by removing such data to free up disk space on the C: drive (or the last drive in your drive list, for example D: drive).

Memory card

About “Memory Stick”
“Memory Stick” is a compact, portable, and versatile IC recording media especially designed for exchanging and sharing digital data with compatible products, such as digital cameras and other devices. Because it is removable, it can be used for external data storage.

Compatible “Memory Stick”
The “Memory Stick” slot on your VAIO computer can accommodate the following sizes and types of media:

Formatting “Memory Stick”
“Memory Stick” is formatted in the specific FAT format by default and is ready for use. Be sure to use the device that is designed to format the media and supports “Memory Stick” when formatting the media.

Inserting SD Memory Cards
Your VAIO computer is equipped with an SD memory card slot. You can use this slot to transfer data among digital cameras, camcorders, music players, and other audio/video devices.

Inserting “Memory Stick”

- Precautions
- Troubleshooting information
- Windows 8 basic operations

To get the complete version of the User Guide

1. Connect your VAIO computer to the Internet. [Details]
3. Open the charms [Details] and select the Search charm.
4. Select Apps.
5. Enter “VAIO Manual” in the search box.
6. Select VAIO Manual from the list.
7. After a window prompting you to update the manual appears, follow the on-screen instructions to complete the updates.
   - This file will automatically update to the complete version of the User Guide.
   - If the window prompting you to update the User Guide does not appear, make sure your VAIO computer is connected to the Internet and repeat the above steps.
   - If the update window still does not appear, start VAIO Update [Details] so you can find and download the User Guide manually.
   - Hint
     - It may take some time to complete the update.

To view help files for Windows OS and app operations

When you have trouble operating your VAIO computer, try referring to Windows Help and Support or help files included with your apps.

To access Windows Help and Support, open the charms and enter “Help and Support” in the search box. [Details]

Connecting to the Internet

You will need to connect your VAIO computer to the Internet before updating to the complete version of the User Guide.

Before connecting to the Internet

Before using the Internet, you will need to sign up with an Internet Service Provider (ISP) and set up devices required for connecting your VAIO computer to the Internet.

The following types of Internet connection services may be available from your ISP:
For more information on devices required for Internet access and how to connect your VAIO computer to the Internet, ask your ISP. The following is one of the Internet connection methods as an example.

To use the network (LAN)
You can connect your VAIO computer to networks with a LAN cable. Connect one end of a LAN cable to the LAN port on the computer and the other end to your network. For detailed settings and devices required for LAN access, ask your network administrator.

Note
- The connection, setting method, or required devices may vary depending on your network environment.

To use the Wi-Fi network
1. Open the charms [Details] and select the Settings charm.
2. Select (the network icon).
3. Select your desired network (SSID) from the list and Connect.

Note
- For detailed information on network settings and devices, refer to the information from your Internet Service Provider (ISP) or the manuals that came with your network devices.

About the Touch Screen
<Touch screen equipped models>

The touch screen enables direct interaction with your VAIO computer using your finger(s). You can perform various gestures on the touch screen. Your VAIO computer supports multi-touch input.

Note
- Your VAIO computer is equipped with a capacitive touch screen. When using it, note the following characteristics of the capacitive touch screen.
  - The touch screen will not work if you touch it with fingernails, or if you wear gloves.
  - If tapping triggers an unintentional operation, make sure that no other parts of your body are in contact with the touch screen.
  - The surface of the touch screen may get hot. This is normal and does not indicate a malfunction.
  - Even though the surface of the touch screen is tempered glass, it could still become damaged. Treat it with adequate care. If it breaks, small granular shards may scatter and cause injury. Do not drop the touch screen or subject it to a strong impact. Do not scratch the surface. A surface flaw may cause the glass to break.
  - A protection sheet may be attached to the LCD screen frame at the factory. Remove the sheet before use; otherwise the touch screen may not work correctly.
  - Some apps do not accept touch screen operations.

How to Use the Touch Screen
<Touch screen equipped models>

You can tap the touch screen or make a simple motion with your fingers to operate your VAIO computer.

Basic operations

To click (tap)
Tap on the touch screen once with a finger. You can select a button, such as OK and Cancel, or an item in a menu by tapping it.

To double-click (double-tap)
Tap on the touch screen twice in quick succession with a finger. You can start an app, such as a word processor or a spreadsheet program, or open a file by double-tapping its icon.

To drag
Put a finger on the desired point on the touch screen and slide the finger. You can move a file or change the window size with this motion.

To drag and drop
Touch the desired file icon, slide to another folder, window or app icon, and then lift your finger off the screen. You can move or copy a file with this motion.

Advanced operations

You can make a simple motion (gesture) with your fingers on the touch screen to operate your VAIO computer.
The response to a gesture varies depending on the apps.

To right-click (touch and hold)
Touch and hold the desired point on the touch screen for a few seconds and lift your finger off the screen. Depending on the point you touch, you can display various menus.

To scroll
Touch and slide a scrollable area of a window, such as an Internet Explorer window. You can also drag the slider on the vertical scroll bar of the selected window to scroll the window.

To zoom in or out on an image such as a photo (zoom)
Pinch on the touch screen with two fingers for zooming on an image, such as a photo on Photos. Pinch open to zoom in or pinch close to zoom out.
To rotate an image such as a photo (rotate)
Put two fingers on the touch screen and slide them in circles to rotate an image, such as a photo. You cannot rotate images depending on the apps you are using.

To select by swiping
Slide your finger in short distance in the direction that the screen does not scroll. You can select an item, such as an app tile or a picture.
Notes on Using the Touch Screen
<Touch screen equipped models>

Before using the touch screen, read the following precautions for correct use.

- Do not push the touch screen roughly.
  Gentle touches always work as your VAIO computer is equipped with a capacitive touch screen.

- Do not use an object other than your finger to use the touch screen.
  The touch screen may be damaged or a malfunction may occur. Be sure to touch the screen only with your finger.

- The touch screen may not work properly if you turn on your VAIO computer while touching the screen. In such a case, restart the computer.

- The touch screen may not work for several seconds after your VAIO computer returns to Normal mode from Sleep mode. In such a case, wait for a while before using the touch screen.

- Keep the touch screen clean for good touch sensitivity. Dirt may cause damage or a malfunction.
Notes on the LCD screen

Read the following precautions for correct use of the LCD screen.

- The LCD screen is manufactured using high-precision technology. You may, however, see tiny black points and/or bright points (red, blue, or green) that continuously appear on the LCD screen. This is a normal result of the manufacturing process and does not indicate a malfunction.
- Do not scratch the surface of the LCD screen or exert pressure on it. This could cause damage.
- Do not exert pressure on the LCD screen lid with the lid closed as it may scratch the LCD screen or soil it.
- The LCD screen may become warm during operation. This is normal and does not indicate a malfunction.
- Due to the mechanical design of your VAIO computer's LCD screen/touch screen, the screen surface may become warm while you are using the computer for an extended period of time. This is normal and does not indicate a malfunction. (Touch screen equipped models)
- The LCD screen/touch screen is made of reinforced glass to implement high durability, however, treat the screen with care as it is not 100% unbreakable. In case the screen breaks into small pieces, be careful not to cut yourself on the pieces of broken glass. (Touch screen equipped models)
- Do not leave the LCD screen facing the sun. This could damage the LCD screen. Be sure to block direct sunlight when using your VAIO computer near a window.
- Do not exert pressure on the LCD screen or its edges when opening the LCD screen lid or lifting your VAIO computer. The LCD screen may be sensitive to pressure or added stress, and exerting pressure may damage the screen or cause it to malfunction. When opening the computer, hold the base with one hand and gently lift the LCD screen lid with the other. To carry the computer with the lid open, be sure to hold the computer with both hands.
- Using your VAIO computer in low temperature conditions may produce a residual image on the LCD screen. This does not indicate a malfunction. When the computer returns to normal temperature, the screen returns to normal.
- A residual image may appear on the LCD screen if the same image is displayed for an extended period of time. The residual image disappears after a while. You can use a screen saver to prevent residual images.
Selecting Display Modes

You can switch the display output between the computer screen and an external display connected to your VAIO computer.

1. Turn on an external display.
2. Press the `Fn+F7` keys several times to select your desired display output, and then press the `Enter` key.

**Note**
- If you disconnect a display cable (not supplied) while only an external display is selected as the display output, it is hard to operate your VAIO computer because the computer screen is blank.
  To switch the display output to the computer screen, press the `Fn+F7` keys twice, then the `Enter` key.
- The display switch may become unavailable or your VAIO computer may become unstable during video playback. Exit the video playback app before switching the display output.
- The display switch may not be available depending on the type of external display or projector.

Using the Multiple Monitors Function

The Multiple Monitors function allows you to distribute portions of your desktop across separate displays. For example, if you have an external display connected to the monitor port, the computer screen and the external display can function as a single desktop.

1. Right-click on the desktop [Details] and select **Screen resolution**.
2. Select **Extend these displays** from the drop-down list next to **Multiple Displays** and **OK**.

   The setting options vary depending on the number of the connected external displays.

**Note**
- Your external display may not support the Multiple Monitors function.
- Certain apps may not be compatible with the Multiple Monitors settings.
- Do not change the display settings while using video/image apps or playing DVDs, as it may cause unsuccessful playback/display or unstable system operations.

   Change the display settings after you exit the video/image app.

**Hint**
- You can set the screen resolution for each display used for the Multiple Monitors function.

About a Security Key for Wi-Fi(R) (Wireless LAN)

A security key is a security protocol for Wi-Fi that encrypts data transmitted on Wi-Fi. It is also referred to as an encryption key or a WEP (Wired Equivalent Privacy) key. The security key allows wireless devices that have the same key, such as a Wi-Fi access point and a computer, to communicate with each other on Wi-Fi.

The security key is assigned to each access point by default. (Make sure the default security key has been changed to protect data from unauthorized use.) If you cannot find the default security key, refer to the manual that came with your access point.

If you enter a wrong security key, follow these steps to re-enter the security key.

1. Open the charms [Details] and select the Settings charm.
2. Select (the network icon).
3. Right-click the desired network and select View connection properties.
4. Select the Security tab.
5. Enter a security key in the Network security key field and select OK.

About the Network (LAN)

The network (LAN) enables you to connect your VAIO computer to the Internet and transfer data between the computer and other devices. You can connect your VAIO computer to 1000BASE-T/100BASE-TX/10BASE-T type networks with a LAN cable (not supplied). Connect one end of a LAN cable to the LAN port on the computer and the other end to your network.

For information on peripheral devices required for LAN access, ask your Internet Service Provider (ISP) or refer to the manual that came with your modem. For information on how to connect your VAIO computer to the network, refer to your ISP’s instructions or the manual that came with the modem and other peripheral devices. If you require information on the network settings at your workplace, ask the network administrator.

About the Wi-Fi(R) (Wireless LAN) Standards

Wi-Fi allows your VAIO computer to connect to a network through a wireless connection. Wi-Fi uses the following IEEE 802.11a/b/g/n standard, which specifies the type of technology used. Refer to the specifications to find out about the configuration of the computer.

IEEE 802.11a (Frequency band: 5 GHz)
Exclusive to models compliant with the IEEE 802.11a/b/g/n standard.

IEEE 802.11b/g (Frequency band: 2.4 GHz)
The IEEE 802.11g standard provides higher-speed communications than the IEEE 802.11b.

IEEE 802.11n (Frequency band: 2.4 GHz/5 GHz)
For models compliant with the IEEE 802.11b/g/n standard, only 2.4 GHz band can be used.

Connecting to the Internet with a Wired Connection

Before using the Internet, you need to sign up with an Internet Service Provider (ISP) and set up devices required for connecting your VAIO computer to the Internet. Connect one end of a LAN cable (not supplied) to the LAN port on your VAIO computer and the other end to your network.

Note
- For detailed information on devices required for Internet access and how to connect your VAIO computer to the Internet, ask your ISP.
- When connecting your VAIO computer to the Internet, be sure to use a cable with “Network” or “Ethernet” writing on it.
- Do not plug a telephone cable into the LAN port on your VAIO computer.
  If the LAN port is connected to the following networks or telephone lines, high electric current to the port may cause damage, overheating, or fire.
  - Any network, except 1000BASE-T/100BASE-TX/10BASE-T type networks
  - Public telephone subscriber line
  - Private branch exchange (PBX)
  - Home (intercom speakerphone) or business-use telephone lines (multi-line business telephone)

Hint
- To connect your VAIO computer to the Internet using the Wi-Fi(R) (Wireless LAN) function, you need to set up the Wi-Fi settings. [Details]

You can disable the Wi-Fi function by following these steps.

1. Open the charms [Details] and select the [Settings] charm.
2. Select Change PC settings in the lower right corner.
3. Select Wireless in the left pane of the PC settings screen.
4. Change the Wi-Fi setting under Wireless devices to Off.

**Hint**
- To enable the Wi-Fi function, turn off Airplane mode and change the Wi-Fi setting under Wireless devices to On.
- To disable all wireless functions, turn on Airplane mode. The WIRELESS indicator light will be turned off.
- The wireless function(s) whose setting is on will be enabled when you turn off Airplane mode. When any wireless function is enabled, the WIRELESS indicator light turns on.
- Refer to Windows Help and Support for more information on Airplane mode. [Details]
Launching the Web Browser (WEB Button)
<WEB Button equipped models>

By pressing the WEB button, you can launch the default web browser. Even when your VAIO computer is off, pressing the WEB button starts Windows, and launches the web browser.
Notes on Using the Wi-Fi(R) (Wireless LAN) Function

Before using the Wi-Fi function, read the following precautions for correct use.

- In some countries or regions, using the Wi-Fi products may be restricted by the local regulations.
- Wi-Fi devices work on the 2.4 GHz band, which is used by a variety of devices. They use the technology to minimize radio interference from other devices that use the same band; however, radio interference may still slow communication speeds, reduce communication range, or cause communication failure.
- If both the BLUETOOTH function and the 2.4 GHz Wi-Fi function of your VAIO computer are enabled, interference may occur and cause slower communication speeds or other problems.
- To communicate via Wi-Fi while you are on the road, you may need to contract with a Wi-Fi connection service provider.
- If your VAIO computer is equipped with the IEEE 802.11a/b/g/n standard, outdoor use of the 5 GHz Wi-Fi function is prohibited by law.
- The communication speed and range may vary depending on the following conditions:
  - Distance between devices
  - Existence of obstacles between devices
  - Device configuration
  - Radio conditions
  - Ambient environment (including wall material, etc.)
  - Apps in use
    Communications may be cut off depending on radio conditions.
- The data transfer rate specified in the specification is the theoretical maximum, and may not reflect actual data transfer rate.
- Actual communication speed may not be as fast as the one displayed on your VAIO computer.
- The 2.4 GHz and 5 GHz Wi-Fi frequency bands are not communicable with one another.
- The data transfer rate of IEEE 802.11g and IEEE 802.11n (2.4 GHz) may be affected by interference when used with an IEEE 802.11b product. Also, IEEE 802.11g and IEEE 802.11n automatically lower the transfer rate to maintain compatibility with an IEEE 802.11b product. The transfer rate may be regained by changing the channel settings of your access point.
- To stop the Wi-Fi function abruptly, turn off your VAIO computer.
- The WLAN standard includes the encryption methods: Wired Equivalent Privacy (WEP), which is a security protocol, Wi-Fi Protected Access 2 (WPA2), and Wi-Fi Protected Access (WPA). Proposed jointly by the IEEE and Wi-Fi Alliance, both WPA2 and WPA are specifications of standards based on interoperable security enhancements that increase the level of data protection and access control for existing Wi-Fi networks.
- WPA is designed to be forward compatible with the IEEE 802.11i specification. It utilizes the enhanced data encryption Temporal Key Integrity Protocol (TKIP) in addition to user authentication using 802.1X and Extensible Authentication Protocol (EAP). Data encryption protects the vulnerable wireless link between clients and access points. Besides that, there are other typical LAN security mechanisms to ensure privacy, such as: password protection, end-to-end encryption, virtual private networks, and authentication. WPA2, the second generation of WPA, provides stronger data protection and network access control and is also designed to secure all versions of 802.11 devices, including 802.11b, 802.11a, 802.11g, and 802.11n standards, multi-band and...
multi-mode. In addition, based on the ratified IEEE 802.11i standard, WPA2 provides
government grade security by implementing the National Institute of Standards and
Technology (NIST) FIPS 140-2 compliant AES encryption algorithm and 802.1X-based
authentication. WPA2 is backward compatible with WPA.

Starting Wi-Fi(R) (Wireless LAN) Communications

You can establish Wi-Fi communications between your VAIO computer and an access point (not supplied).
Before using Wi-Fi, make sure a Wi-Fi access point is on and operating.

1. Connect an access point to your VAIO computer.
   Refer to Windows Help and Support [Details] and the manual that came with the access point for more information.

2. Open the charms [Details] and select the Settings charm.

3. Select Change PC settings in the lower right corner.

4. Select Wireless in the left pane of the PC settings screen.

5. Change Airplane mode to Off and the Wi-Fi setting under Wireless devices to On.
   Hint
   - Refer to Windows Help and Support for more information on Airplane mode.

6. Open the charms [Details] and select the Settings charm.

7. Select (the network icon).

8. Select the desired access point and Connect.
   After the connection is established, Connected appears in the selected wireless access point field.
   If a security key [Details] entry window appears, enter the security key as required and select OK.
   Note that security keys are case-sensitive.

Note
- On IEEE 802.11a/b/g/n equipped models, when only the 2.4 GHz Wi-Fi function is enabled, your VAIO computer cannot connect to a 5 GHz Wi-Fi access point. Also, when only the 5 GHz Wi-Fi function is enabled, the computer cannot connect to a 2.4 GHz Wi-Fi access point.

On IEEE 802.11b/g/n equipped models, when the 2.4 GHz Wi-Fi function is disabled, the computer cannot connect to an access point. Also, the computer cannot connect to a 5 GHz Wi-Fi access point.
- It may take some time to find and connect to a Wi-Fi access point before starting communications via Wi-Fi.

Hint
- Once you connect your VAIO computer to the access point by entering the security key, the access point will be registered in the computer. You do not have to enter the security key for subsequent connections.

To check Wi-Fi connection status
Open the desktop [Details] and move the mouse pointer over (the Network icon) in the desktop notification area to check the Wi-Fi connection status, such as the access point currently connected to your VAIO computer.

You can stop Wi-Fi communications by following these steps.

1. Open the charms [Details] and select the Settings charm.
2. Select (the network icon).
3. Select the desired access point and Disconnect.

Note
- Do not disable the Wi-Fi function while accessing remote documents, files, or resources, as it may result in data loss.

Using the Antivirus App for Your VAIO Computer

Protect your VAIO computer against computer viruses by using the antivirus app. You can keep the antivirus app current with the latest updates by downloading and installing the updates from the website of the app publisher. To update the antivirus app, find the antivirus app installed on your VAIO computer from the following and follow these steps.

1. Make sure your VAIO computer is connected to the Internet.
2. Perform any of these operations according to the preinstalled antivirus app.
   - For Trend Micro: Start Trend Micro Titanium Maximum Security. [Details]
   - For McAfee: Start McAfee Internet Security or McAfee Total Protection. [Details]
   - For Kaspersky Internet Security: Start Kaspersky Internet Security. [Details]
3. Follow the on-screen instructions.

**Note**
- The actual procedure may be different from the above depending on the version of the app installed on your VAIO computer. In such a case, follow the on-screen instructions.

**Hint**
- Refer to the help file included with your app for more information.
Entering Sleep Mode, Shutting Down, or Restarting

You can place your VAIO computer into Sleep mode or shut down/restart the computer by following these steps.

1. Open the charms [Details] and select the  
Settings charm.
2. Select  
Power and Sleep, Shut down, or Restart.
Changing the Rapid Wake (Sleep Mode) Settings

You can change the Rapid Wake settings in VAIO Control Center. Rapid Wake is enabled by default. With this function, you can keep your VAIO computer in Sleep mode without risk of data loss because the computer enters Sleep mode after your working data is saved on the built-in storage device.
In addition, you can conserve more battery power by reducing power consumption when the computer is in Sleep mode.

1. Start VAIO Control Center [Details] and select Hardware.
2. Enable/disable the setting in Rapid Wake.

Note

- With Rapid Wake disabled, your working data is not saved on the built-in storage device when the computer enters Sleep mode. Therefore, if the computer is turned off during Sleep mode because, for example, the battery pack runs out of power or the computer is disconnected from an AC power source, the working data will be lost and cannot be restored. To avoid data loss, be sure to save the data before the computer enters Sleep mode. With Rapid Wake disabled, the power indicator light blinks slowly in orange during Sleep mode, and the charge and power indicator lights blink simultaneously when the battery pack runs out of power during Sleep mode.
If you use the Windows hard disk drive encryption feature, you need to configure other settings. See Notes on Sleep Mode [Details] for more information.

The battery pack can be charged even while you are using your VAIO computer when the computer is connected to a power source. The charging time may vary depending on operating conditions.

1. Install the battery pack into your VAIO computer. [Details]
2. Plug your VAIO computer into an AC outlet. [Details]

Hint
- The charging time varies depending on ambient temperature. Note that at a low ambient temperature, it takes longer time to charge the battery pack.

Connecting a Power Source

Connect your VAIO computer to an AC power source. Carefully read the precautions in Notes on Using the Power Source before connection. [Details]

1. Plug one end of the power cord (1) into the AC adapter (3).
2. Plug the other end of the power cord into an AC outlet (2).
3. Plug the cable from the AC adapter (3) into the DC IN port (4) on your VAIO computer.

Note
- Do not plug more than one device into the same AC outlet.
- The shape of the AC adapter varies depending on the model you purchased.
- Make sure that the power plug is firmly plugged into your VAIO computer.

Hint
- You can purchase a power strip with a surge protector to help prevent damage to your VAIO computer caused by sudden power surges (in an electrical storm, for example).
Installing/Removing the Battery Pack

Install the battery pack into the battery compartment of your VAIO computer.

To install the battery pack

1. Turn off your VAIO computer, disconnect the power cord and all connection cables, and close the LCD screen lid.
2. Align the battery pack with the front side of the battery compartment.
3. Turn the battery pack in the direction of the arrow and push it down into the compartment.

4. Tighten the three or two screws with a coin.

To remove the battery pack
1. Turn off your VAIO computer, disconnect the power cord and all connection cables, and close the LCD screen lid.
2. Loosen the three or two screws with a coin.
3. Pull the battery pack slightly in the direction of the arrow.
Note
- Do not pull the battery pack forcibly when you cannot remove it. Loosen the screws once again.

4. Take the battery pack out of your VAIO computer.

Hint
- If your VAIO computer does not recognize the battery pack, push and hold the battery off button on the bottom of the computer for about three seconds with a thin, straight object (such as a paper clip). If this does not solve the problem, remove the battery pack and install it once again.

Note
- You will lose all unsaved data if you remove the battery pack while your VAIO computer is on or in Sleep mode and not connected to the AC adapter. Be sure to turn off the computer before removing the battery pack.

Notes on Sleep Mode

Read the following precautions before using Sleep mode.

- Some apps may not support Sleep mode. When running such apps, exit them before placing your VAIO computer into Sleep mode.
- Some USB devices may not support Sleep mode. When your VAIO computer resumes from Sleep mode, the computer may not recognize such USB devices, depending on the type and number of connected USB devices.

If you cannot place the computer into Sleep mode, disconnect all USB devices and try again.

- If your VAIO computer enters Sleep mode when Windows or the computer is unstable, it may not resume from Sleep mode. The following operations are recommended:
  - Before placing your VAIO computer into Sleep mode, save your files and exit all running apps.
  - Shut down your VAIO computer periodically.

- Depending on the condition of Windows, your VAIO computer cannot enter Sleep mode.
- If your VAIO computer enters Sleep mode while running a task, such as DVD writing, the task may be suspended.
- With the default Sleep mode settings, the computer’s state is saved to the dedicated partition when your VAIO computer enters Sleep mode. You, however, cannot encrypt this partition with Windows BitLocker Drive Encryption or other drive encryption features. If you use the drive encryption feature, it is strongly recommended that you first recover the computer with the settings which will not create the dedicated partition in order to avoid leaving unencrypted data. [Details]
Notes on Using the Power Source

Read the following precautions before plugging your VAIO computer into an AC power source.

- If you remove the battery pack while your VAIO computer is turned on or in Sleep mode, but the computer is disconnected from an AC power source, you may lose all unsaved data.
- If you leave your VAIO computer without connecting it to an AC power source for an extended period of time, turn off the computer.

Notes on the AC adapter

- Use the AC adapter supplied with your VAIO computer or with genuine Sony products. Do not use any other AC adapter as it may cause a malfunction.
- Do not connect the AC adapter to a power conversion device such as a travel power converter. It may cause overheating or a malfunction.
- If the AC adapter cable becomes damaged or broken, do not use it.

Notes on turning on your VAIO computer

- Because your VAIO computer contains magnetic components, keep magnetic storage media, such as floppy disks, away from the computer, as it may cause data corruption.
- Your VAIO computer will automatically enter Sleep mode (with the default settings) when you move magnetic devices closer to the computer. Keep magnetic devices away from the computer.

- The power status icon indicates what kind of power source your VAIO computer is currently using, and you can see the computer’s power status by selecting this icon.
### Troubleshooting

#### Shutting Down Your VAIO Computer

Properly shut down your VAIO computer to avoid losing unsaved data.

1. Save your data and close all running apps.
2. Turn off any peripherals connected to your VAIO computer.
3. Open the charms [Details], and then select the **Settings** charm.
4. Select **Power** and **Shut down**.
   - After a short time, your VAIO computer automatically turns off and the green power indicator light turns off.
   - Before closing the LCD screen lid, make sure the power indicator is off.

**Note**

- An improper shutdown may cause loss of unsaved data or cause your VAIO computer to malfunction.
- To disconnect your VAIO computer completely from an AC power source, turn off the computer, and then unplug the power cord from the AC outlet.

**To fully shut down your VAIO computer**

Fully shut down your VAIO computer by placing the computer into ACPI S5 mode. This mode will take more time during the start-up process than usual.

1. Save your data and close all running apps.
2. Turn off any peripherals connected to your VAIO computer.
3. Open the charms [Details], and then select the **Settings** charm.
4. Select **Power**, press and hold down the **Shift** key, and then select **Shut down**.
   - After a short time, your VAIO computer automatically turns off and the green power indicator light turns off.

**Hint**

- ACPI (Advanced Configuration and Power Interface) is an open industry specification for power management of PC/AT compatible devices and device configuration. In S5 mode, your VAIO computer is in a system sleep and soft off state.

Turning on Your VAIO Computer

Turn on your VAIO computer to start Windows. Carefully read the precautions in Notes on Using the Power Source before turning on. [Details]

1. Install the battery pack on your VAIO computer [Details], and then connect to an AC outlet. [Details]
2. Lift the LCD screen lid.
3. Press and hold down the (Power) button until the power indicator light turns on in green.
   Your VAIO computer is turned on, and Windows starts after a while.

Note
- If you press and hold down the (Power) button for more than four seconds, your VAIO computer will not turn on.
  Press the (Power) button lightly, and release it immediately when the power indicator light turns on.
- Do not use your VAIO computer without installing the battery pack as it may cause the computer to malfunction.
- When opening the LCD screen lid, do not hold the built-in camera as it may cause your VAIO computer to malfunction. (Built-in camera equipped models)
- If you press the (Power) button with the LCD screen lid closed, your VAIO computer will not turn on.
- Do not touch the touch screen when turning on your VAIO computer as it may cause the computer to malfunction. (Touch screen equipped models)

Hint
- By default, your VAIO computer automatically enters Sleep mode after a certain period of inactivity while the computer is connected to an AC outlet. [Details]
Troubleshooting

Using Sleep Mode

In Sleep mode, all unnecessary devices of your VAIO computer are turned off, though some devices stay on to retain the computer’s state including data you are working on. Sleep mode is useful when you take a short rest, for example. With the default Sleep mode settings, Rapid Wake is enabled and the computer’s state is saved to the built-in storage device.

To activate Sleep mode

1. Open the charms [Details] and select the [Settings] charm.
2. Select [Power] and [Sleep].

The power indicator light turns off when your VAIO computer enters Sleep mode.

Hint

- By default, your VAIO computer enters Sleep mode automatically after about 30 minutes of inactivity while running on AC power.
- The operations below also place your VAIO computer into Sleep mode.
  - Press the [Power] button (with the default setting).
    Note that if you press and hold down the [Power] button for more than four seconds, your VAIO computer will turn off automatically. Doing this will erase all unsaved data.
  - Close the LCD screen lid and leave the computer unused for a few seconds.

To return to Normal mode

1. Press the [Power] button.

Note

- By default, your VAIO computer automatically enters Hibernate mode when the battery pack is running out of power. However, depending on the operating conditions, the computer may fail to enter Hibernate mode.
  - If this occurs and the battery pack is running out of power, the computer will be turned off, resulting in loss of unsaved data.
  - While the computer is running on battery power, save data frequently.
- Before moving your VAIO computer, make sure that the power indicator light is off to avoid impact or vibration to the running hard disk drive.

Hint

- If you press and hold down the [Power] button for more than four seconds, your VAIO computer will turn off automatically. Doing this will erase all unsaved data.
- You can set to restore your VAIO computer from Sleep mode to Normal mode by opening the LCD screen lid.
  - To change the action when you open the lid, start [VAIO Control Center] [Details] and change the settings in [Power and Battery].

About the ASSIST Button

Press the ASSIST button to perform regular maintenance of your VAIO computer or to solve problems you might encounter when using the computer.

While the computer is on, the ASSIST button starts VAIO Care. While the computer is off, the ASSIST button starts VAIO Care Rescue Mode.

VAIO Care (Rescue Mode) : Recover or maintain your system can be used to recover the computer in case of emergency, for example, when Windows does not start.

Note
• If the VAIO Care Rescue Mode screen is displayed and five minutes pass without any operation, your VAIO computer automatically turns off.

Adding and Removing Memory Modules

If you want to increase your computer's speed or improve performance when running programs simultaneously, increase the amount of memory by installing optional memory modules.

Before you upgrade your computer's memory, see Notes on Adding and Removing Memory Modules.

If you install memory modules into two or more slots, the dual-channel mode is enabled to help improve performance.

The type of module and the amount of memory installed on your computer may differ depending on the model.

**Note**

- After adding a memory module to your VAIO computer, you may not be able to enable the Rapid Wake setting due to the shortage of the dedicated partition volume for Rapid Wake.

In such a case, recover the computer. [Details]

1. Turn off your VAIO computer and peripheral devices, disconnect the power cord and all connection cables, and remove the battery pack. [Details]

2. Wait for a while until your VAIO computer cools down. The inner parts of your VAIO computer may be hot just after turning off. Be careful to avoid burns while handling your VAIO computer in this state.

3. Lay a clean cloth on a level, flat surface, place your VAIO computer on it as illustrated below. Remove the screws with a cross slot screwdriver to open the memory module compartment cover.

   The screw locations are indicated by the arrows in the illustration below. On some models, captive screws are used on the memory module compartment cover and cannot be detached from the cover.

   Screws marked by arrows are behind the battery.
4. Touch an external metal object to discharge static electricity. Do not touch any metal parts inside your VAIO computer.

5. If there is no free slot, remove the currently installed memory module. Pull the latches in the direction of the arrows to pop up the module at an angle (1), then pull the module out in the direction of the arrow (2).

6. Remove the new memory module from its antistatic bag.

7. Hold the memory module by its edge and slide it into the memory module slot with its end terminal facing downward while aligning the notch on the module with the small projection in the slot.

8. Hold the memory module by its edge and push in until it clicks into place as shown in the illustration. The latches on both sides of the slot snap into place to secure the module. Do not touch any ICs (black components) on the memory module.

9. Replace the memory module compartment cover and secure it with the screws you
10. Install the battery pack and connect all connection cables and peripherals that you removed in Step 1, and turn on the computer.

11. Check that the amount of system memory has correctly changed. [Details]
If the amount of indicated system memory is correct, memory module installation was successful.

12. If you use the models equipped with only the SSD, recover your VAIO computer. [Details]

Booting Your VAIO Computer from External Devices

You can boot your VAIO computer from external devices, such as an optical disc drive, a USB floppy disk drive, or a USB flash drive by using the BIOS function.

1. Connect an external device to your VAIO computer.
2. Press the ASSIST button while your VAIO computer is off. The VAIO Care Rescue Mode screen appears.
3. Select Start from media (USB device/optical disc). The booting process from the external device starts.

Note
- Disconnect all devices from your VAIO computer except for the external device from which you intend to boot up. Some devices cannot be used to boot the computer, or cannot be used with the computer.
- If an AC adapter is supplied with the external device, be sure to connect it to an AC power source in advance.

Notes on Adding and Removing Memory Modules

Before adding or removing memory modules, read the following precautions thoroughly.

- Your VAIO computer and memory modules use high precision components and electronic connector technology. To avoid invalidation of the warranty during your product warranty period, we recommend that:
  - You should contact your dealer to install a new memory module.
  - You should not install a memory module by yourself, if you are not familiar with upgrading memory on a computer.
  - You should not touch the connectors or open the memory module compartment cover.
- For assistance, contact an authorized Sony service/support center. To find the nearest center or agent, refer to online support website. [Details]
- If you add or remove memory modules by yourself, your VAIO computer may result in malfunction or accident caused by breakage of slot and module, or connection mistake. In this case, repair fee will be charged.
- Be careful not to injure your hands or fingers with sharp edges of the memory module, inner components, or circuit boards of your VAIO computer.
- Be careful not to catch your fingers on any inner cables of your VAIO computer, as the cable may become loose or disconnected.
- If your VAIO computer is turned on while liquid such as water or other foreign object remains inside, it may cause a fire. Be sure to remove any foreign objects and attach the memory module compartment cover before turning on your VAIO computer.
- Sony does not guarantee that third party memory modules will work in your VAIO computer. For information on third party memory modules, consult the respective sales dealers.
- Be sure to turn off your VAIO computer and peripherals and disconnect all attachments and connection cables before adding or removing memory modules. Failure to do so may cause damage to the memory module, your VAIO computer, or peripheral devices.
- To prevent damage from electrostatic discharge to memory modules, follow the instructions below:
  - Do not work at a place that produces static electricity easily, such as on a carpet.
  - Before adding or removing memory modules, touch an external metal object from your VAIO computer to eliminate static electricity. Do not touch any metal parts inside the computer.
  - Do not open the memory module package before you are ready to install the module. The package protects the module from ESD (electrostatic discharge). To store the module, cover it with an antistatic bag or a sheet of aluminum foil.
- When holding a memory module, do not touch the chips or electrical terminal of the module.
- Do not insert a memory module into the slot facing in wrong direction. It may cause damage to the module or slot, or cause the circuit board to catch fire.
- Use a screwdriver that matches the size of the screw (such as a miniature screwdriver).
- Do not remove or loosen screws that are not specified to be removed.

Setting Up an Appropriate Work Environment

This topic describes where to or not to place your VAIO computer and ergonomic instructions.

Where to place your VAIO computer

When placing your VAIO computer, ensure that:
- You have easy access to a power source and necessary ports.
- You leave enough space around the computer.
- The computer is placed on a flat surface that is wide enough and you can face the computer screen as you operate it.
- You can place the computer in front of you where you can sit upright and keep your forearms parallel to the floor.

Where not to place your VAIO computer

Placing your VAIO computer in an inappropriate location may cause damage or a malfunction. Do not place the computer in a location subject to:
- Direct sunlight
- Magnetic items or sources
- Heat sources, such as residential heating equipment
- Excessive dust
- High humidity
- Poor ventilation

Note
- The area around the air exhaust vent may become extremely hot while your VAIO computer is on. Be careful before touching the area.
- Do not place any object near the air exhaust vent that may block the vent.

Hint
- Your VAIO computer uses high-frequency radio signals and may cause interference to radio or TV reception. If this occurs, move the computer a suitable distance away from the radio or TV.

Ergonomic considerations

Whenever possible, you should attempt to take account of the following ergonomic considerations.

Furniture and posture

Sit in a chair with good back support. Adjust the level of the chair so your feet are flat on the floor. A footrest may make you more comfortable.

Sit in a relaxed, upright posture and avoid slouching forward or leaning far backwards.

Viewing angle of the computer screen

Use the screen tilting feature to find the best position. Make sure the computer screen is at or slightly below eye level when you are sitting in front of your VAIO computer. Adjust the
brightness level of the display as well. You can reduce eye strain and muscle fatigue by adjusting the tilt and brightness level of the computer screen to the proper position.

Lighting

Choose a location where windows and lights do not cause glare and reflection on the computer screen. Use indirect lighting to avoid bright spots on the computer screen. Proper lighting adds to your comfort and work efficiency.

Note

- While adjusting the viewing angle, do not exert excessive pressure on your VAIO computer to eliminate a risk of mechanical damage.

Hint

- The same considerations apply when you use an external display.

Notes on handling your VAIO computer

Observe the following to avoid malfunctions and damage to your VAIO computer.

- Place your VAIO computer gently on a flat surface to avoid a mechanical shock.
- Be sure to turn off your VAIO computer before moving the computer. Moving the computer that is turned on may cause a hard disk malfunction. Be sure to disconnect all cables connected to the computer before moving it.
- Do not drop or hit your VAIO computer. Even a slight shock or vibration may cause a hard disk malfunction.
- Do not place your VAIO computer in an unstable position.
Updating Your VAIO Computer

Be sure to update your VAIO computer by installing the following apps to enhance its efficiency, security and functionality.

Note
- To perform the update settings below, your VAIO computer must be connected to the Internet.

Windows Update

Windows Update enables you to make your VAIO computer more stable.

1. Open the charms [Details] and select the Search charm.
2. Select Settings and enter “Windows” in the search box.
3. Select Windows Update from the list and follow the on-screen instructions to complete the updates.

VAIO Update

VAIO Update automatically notifies you of new updates available on the Internet, and downloads and installs them on your VAIO computer.

1. Start VAIO Update [Details] and follow the on-screen instructions.

To update Windows Store apps

Be sure to update the Windows Store app. If an update is available, a number will appear in the Store tile of the Start screen.

1. Select the Store tile to open it.
2. Select Updates in the upper right of the screen.
   The number in the bracket shows the number of programs you can update.
3. Set a check mark for the apps you want to update, then select Install.
   To update the apps later, remove the check mark.

Checking the Battery Charge Capacity

The battery pack is consumable. The capacity gradually declines through repeated cycles of recharging and discharging. As a result, the battery life becomes short even if it is fully charged and eventually the battery pack reaches the end of its life.

If the battery life has become short, replace the battery pack with a new one specified by Sony. Refer to the help file for more information on battery charge status and capacity decrease.

1. Start VAIO Control Center [Details] and select Power and Battery.
2. Select Details in Battery.
   Detailed battery pack information, such as charging capacity, is displayed.

Hint
- Enable the battery care function to maximize the battery lifespan. With this function, you can reduce battery degradation by limiting the maximum charging capacity.

Extending the Battery Life

When your VAIO computer is running on battery power, you can extend the battery life using the following methods.

- Use Sleep mode. [Details]
  When you do not need to use your VAIO computer temporarily, you can use Sleep mode. To extend the battery life, use Sleep mode frequently. If you do not intend to use the computer for an extended period of time, turn off the computer.
  Resuming the computer from Sleep mode is faster than from booting up the computer.
- Decrease the LCD brightness of the computer screen. [Details]
- Turn down the volume of the speakers and headphones. [Details]
- Disconnect peripheral devices that are not in use.

Notes on Using the Battery Pack

Before using the battery pack, read the following precautions for correct use.

About the battery pack
- The supplied battery pack is designed specifically for your VAIO computer.
- For your safety, only use the supplied battery pack or an optional battery pack that is specified by Sony.
- For safety reasons, battery charging may be suspended at higher or lower temperatures.
- While your VAIO computer is connected to an AC outlet with the AC adapter, it runs on AC power, even if the battery pack is installed.
- The battery pack is not fully charged at the time of delivery.
- While the battery pack is in use or being charged, heat builds up in the battery pack. This is normal and is not cause for concern.
- Do not use your VAIO computer without installing the battery pack as it may cause the computer to malfunction.

About battery discharge
After battery charge, the battery pack will gradually discharge over time even while not in use. If it is left unused for an extended period of time, the battery power may be depleted. It is recommended that you recharge the battery pack before use.

About battery life
Battery life varies depending on usage and settings.

About battery deterioration and replacement
- The battery pack is consumable. The capacity gradually declines through repeated cycles of recharging and discharging. As a result, the battery life becomes short even if it is fully charged and eventually the battery pack reaches the end of its life.
- If the battery pack quickly runs out of power after being fully charged or it has reached the end of its life, replace it with a new one.

When the battery pack is running out of power
If the battery pack runs out during your absence, power will be cut off and any data you are working on will be lost.
While your VAIO computer is running on battery power, save data frequently.

Changing the Sound Output Device

If there is no sound coming from an external device connected to your VAIO computer, you need to change the device for sound output.

1. Open Control Panel [Details] and select Hardware and Sound.
2. Select Sound.
3. Select the Playback tab.
4. Ensure there is a check mark next to the icon of the device you intend to output computer sound from.
   If there is no check mark next to the icon, select it and Set Default.
5. Select OK.

To change the sound rate and bit depth

The sound rate and bit depth of the digital audio output signal should be set according to your digital audio device.
Follow the above steps 1 to 3, and then select the HDMI device or OPTICAL OUT (optical digital audio output) icon and Properties. On the Advanced tab, select the sample rate and bit depth (for example, 16 bit, 48000 Hz (DVD quality)) which the device supports, and then OK.

About BLUETOOTH(R) Security

The BLUETOOTH wireless technology has an authentication function, which allows you to control communication with other devices. The authentication function helps you prevent unwanted anonymous BLUETOOTH devices from accessing your VAIO computer. The first time two BLUETOOTH devices communicate, a common passcode (a password required for authentication) should be identified to register both devices. Once a device is registered, there is no need to re-enter the passcode.

For details, open Windows Help and Support [Details], and enter “BLUETOOTH” in the search box.

About the BLUETOOTH(R) Function

You can establish wireless communications between your VAIO computer and other BLUETOOTH devices, such as another computer, a smartphone, a mobile phone, a headset, or a mouse.

You can transfer data between these devices without cables at a range of up to 33 feet / 10 meters in an open area.

One BLUETOOTH device can connect with up to seven devices via wireless network to exchange data.

When a device requires connection to another device, it sends out an inquiry to neighboring BLUETOOTH devices. If any device responds to the inquiry, the two devices can connect with each other.

You can connect BLUETOOTH devices to your VAIO computer. For details on BLUETOOTH communication, see About the BLUETOOTH Function.

1. Open the charms [Details] and select the [Settings] charm.
2. Select [Change PC settings] in the lower right corner.
   **Hint**
   - If your VAIO computer is compliant with BLUETOOTH high speed technology and you intend to use it for high-speed communications, change the [Wi-Fi] setting under [Wireless devices] to [On], too.
6. When connecting a BLUETOOTH mouse, turn it on and press the button to connect the mouse.
   **Hint**
   - Refer to the manual that came with your BLUETOOTH device for the procedure to ready the device for connection.
7. Select [Add a device].
   Your VAIO computer searches for devices and displays a device list. Follow the on-screen instructions to register your device.

**Note**
- Depending on the BLUETOOTH device, it may take some time for your VAIO computer to find the device. If your device does not appear in the list, repeat the procedure to ready the device for connection (for example, pressing the button for connection).
- Depending on the BLUETOOTH device, the procedure to establish connection may vary. Refer to the manual that came with the device for the procedure.

**Hint**
- For details on the operations, open Windows Help and Support [Details], and enter “BLUETOOTH” in the search box.
- A window appears for passcode input if a BLUETOOTH device is requesting authentication to establish connection. Follow the on-screen instructions to share the passcode between the BLUETOOTH device and your VAIO computer. If you do not wish to connect, select the [Cancel] button in the window.
  - A passcode is a secret number that is entered by a user to use for the authentication process to allow two BLUETOOTH devices to communicate with each other. Enter the same alphanumeric string (case-sensitive) for both devices to allow them to communicate with each other. You can change the passcode every time you perform authentication, providing you enter the same passcode for both devices during the authentication process. For details on the passcode of a BLUETOOTH device, refer to the manual that came with the device. If no BLUETOOTH passcode is entered for a certain time, the connection process will be terminated for security. In this case, try again.

Notes on Using the BLUETOOTH(R) Function

Before using the BLUETOOTH function, read the following precautions for correct use.

- In some countries or regions, using the BLUETOOTH function may be restricted by local regulations.
- The BLUETOOTH function may not work with some devices, depending on the manufacturer or the app version employed by the manufacturer. Check the system requirements of the BLUETOOTH device before purchasing.
  For information on BLUETOOTH devices, visit the VAIO Support website.
  Some BLUETOOTH devices require authentication (pairing) before establishing connection with another device. Perform the authentication process before connecting to such devices.
- BLUETOOTH devices work on the 2.4 GHz band, which is used by a variety of devices. BLUETOOTH devices use the technology to minimize radio interference from other devices that use the same band; however, radio interference may still cause slower communication speeds, reduce communication range, or in some cases, cause communication failure.
- Communication speed and range may vary depending on the following conditions:
  - Distance between communication devices
  - Existence of obstacles between devices
  - Ambient environment that includes existence of walls and materials of such walls
  - Device configuration
  - Apps in use
  - Radio conditions
  - Communications may be cut off depending on radio conditions.
- If your VAIO computer is compliant with BLUETOOTH high speed technology and you intend to use it for high-speed communications, enable both the wireless LAN and BLUETOOTH functions on the computer.
- Large files may occasionally be corrupted during continuous transfer due to limitations of the BLUETOOTH standard and electromagnetic interference in the environment.
- Connecting multiple BLUETOOTH devices to your VAIO computer may cause channel congestion, resulting in poor device performance. This is normal with BLUETOOTH technology and does not indicate a malfunction.
- Video and audio may not be synchronized if you play videos on your VAIO computer with audio output from a connected BLUETOOTH device. This is a frequent occurrence with BLUETOOTH technology and does not indicate a malfunction.
- All BLUETOOTH devices must be certified through the procedure stipulated by Bluetooth SIG to ensure that they are compliant with the BLUETOOTH standard. Even if the BLUETOOTH devices are compliant with the BLUETOOTH standard, individual device performance, specifications, and operation procedures may vary. Data exchange may not be possible in all situations.
- Not all BLUETOOTH devices are guaranteed of compatibility with your VAIO computer.
- If you urgently need to disable the BLUETOOTH function, turn off your VAIO computer.

About Region Codes
<Optical disc drive equipped models>

The following is a list of DVD region codes indicating playable regions of DVD media. You can check the region codes of DVD media sold in the following countries or regions.

1. USA, Canada
2. Europe, Middle East, South Africa, Japan
3. Southeast Asia, Taiwan, South Korea, Hong Kong
4. Central America, South America, Mexico, Australia, New Zealand
5. North Africa, Asia, Russia, Ukraine, Belarus, India
6. China
7. Reserved for future use
8. International aircraft, international cruise ship, international conference hall, etc.

Region code indicators are labeled on the discs or packages to indicate in which region and on what type of player you can play the disc. If the region code indicates “all,” you can play this disc in most regions of the world. If the region code for your residence area is different from the label, you cannot play the disc on your VAIO computer.

Handling Discs
<Optical disc drive equipped models>

Read the following to protect data stored on discs and take proper care of discs.

- Be sure to hold the disc by its edges and central hole without touching the recording surface (playing surface), as shown below. Fingerprints and dust on the surface of a disc may cause a read or write error. Be sure to keep the disc clean.

- Sony assumes no liability for any problems and damages to discs arising out of adhesive labels affixed to discs. Refer to the manual carefully that came with the label app or label paper, and use the labels under your responsibility.

To take proper care of discs

- For normal cleaning, hold the disc by its edges and use a soft cloth to wipe the surface from the center out, as shown below.

- If the disc is badly soiled, moisten a soft cloth with water, wring it out well, and use it to wipe the surface of the disc. Wipe off any remaining moisture with a dry soft cloth.

- Do not use solvents such as benzine, thinner, commercially available cleaners, or anti-static spray which may cause damage to the disc.
Inserting/Removing a Disc
<Optical disc drive equipped models>

Insert/remove a disc to/from your VAIO computer that is turned on.

1. Press the drive eject button. The drive tray slides out.

Hint
- The location of the drive eject button varies depending on the model you purchased. It is located on the front or side of your VAIO computer.

2. Insert/remove a disc to/from your VAIO computer.
   When you insert a disc:
   Hold the bottom of the drive tray with one hand, place a disc in the middle of the drive tray, and gently push it down until the disc clicks into place. If the disc is not properly placed when you close the drive tray, it may become unable to open.

   Place the disc with the label side facing upward.

   Note
   - Do not exert pressure on the drive tray when placing a disc.

3. Close the drive tray by pushing it in gently.

Notes on Using Discs
<Optical disc drive equipped models>

Observe the following notes when using discs on your VAIO computer.

Notes on playing discs

- Depending on system environment, you may find sound interruptions and/or dropped frames during DVD/BD/AVCHD playback. In addition, some discs may not be able to play on your VAIO computer.
- When you are playing discs:
  - The CPU load increases. Close all running apps other than the playback app you are currently using to enjoy smoother playback.
  - Do not switch the display output between the computer screen and an external display.

Notes on playing recorded discs on other players

- Some CD players may not be able to play audio CDs created with CD-R or CD-RW media.
- Some DVD players may not be able to play DVDs created with DVD+R DL, DVD-R DL, DVD+R, DVD+RW, DVD-R, DVD-RW, or DVD-RAM media.
- Blu-ray Disc recorders that support only BD-RE Ver.1.0 cannot play BD-R or BD-RE media created with your VAIO computer. (Blu-ray Disc Drive with DVD SuperMulti equipped models)

Tips for successful writing

- Do not plug or unplug cables, such as the AC adapter or the power cord while the optical disc drive is writing data to a disc.
- The writing process may take longer to complete than theoretically predicted because some apps write and verify data simultaneously.
- Sony assumes no liability for any loss or damage of any kind arising out of writing failure.
Supported Discs
<Optical disc drive equipped models>

This topic explains media types that are playable/recordable on your VAIO computer. The installed optical disc drive varies depending on the model you purchased. Check the specifications before use.

For DVD SuperMulti Drive equipped models
The optical disc drive supports playback and/or recording of the following media.

Playback and recording
- CD-R/RW *1
- DVD-R/RW
- DVD+R/RW
- DVD+R DL (Double Layer)
- DVD-R DL (Dual Layer)
- DVD-RAM *2*3

Playback only
- CD-ROM
- DVD-ROM

For Blu-ray Disc(TM) Drive with DVD SuperMulti equipped models
The optical disc drive supports playback and/or recording of the following media.

Playback and recording
- CD-R/RW *1
- DVD-R/RW
- DVD+R/RW
- DVD+R DL (Double Layer)
- DVD-R DL (Dual Layer)
- DVD-RAM *2*3
- BD-R SL (Single Layer)/DL (Dual Layer), BD-RE SL/DL *4
- BD-R TL (Triple Layer), BD-RE TL *5

Playback only
- CD-ROM
- DVD-ROM
- BD-ROM

For Blu-ray Disc(TM) ROM Drive with DVD SuperMulti equipped models
The optical disc drive supports playback and/or recording of the following media.

Playback and recording
- CD-R/RW *1
- DVD-R/RW
- DVD+R/RW
- DVD+R DL (Double Layer)
- DVD-R DL (Dual Layer)
- DVD-RAM *2*3

Playback only
- CD-ROM
- DVD-ROM
- BD-R SL(Single Layer)/DL(Dual Layer), BD-RE SL/DL *4
- BD-ROM

*1 Writing data to Ultra Speed CD-RW media is not supported.
*2 The optical disc drive does not support the DVD-RAM cartridge. Use non-cartridge discs or discs with a removable cartridge.
*3 Writing data to single-sided DVD-RAM media (2.6 GB) compliant with DVD-RAM Version 1.0 is not supported.
  DVD-RAM Version 2.2/12X-SPEED DVD-RAM Revision 5.0 media are not supported.
*4 BD-RE Disc media in Version 1.0 format and Blu-ray Disc media with a cartridge are not supported.
*5 Available when the optical disc drive supports BDXL(TM) media.
  Some apps may not support playback and/or recording of BD-R TL/BD-RE TL media, and the preinstalled apps vary depending on the model you purchased. Refer to the help files included with the apps for more information.
  Other players may not support playback of BD R TL/BD-RE TL media on which you recorded data with your VAIO computer. Make sure your player supports BD R TL/BD-RE TL media.

Note
- Your optical disc drive may not support writing or playback of some types of media.
- Your optical disc drive does not support 8 cm disc writing.
- Your optical disc drive supports only circular discs. Do not use discs in any other shape (star, heart, card, etc.) or damaged discs, as it may cause your VAIO computer to malfunction.
- DVD-Video format data can be written to DVD+R (single layer or dual layer), DVD+RW/DVD-R (single layer or dual layer), and DVD-RW media. DVD-Video Recording format data can be written to DVD-R (single layer or dual layer), DVD-RW, and DVD-RAM media. Writable media differ depending on the disc burning app you use. Refer to the help file included with the app for more information.
- You cannot write data to DVD-RW media (6x writing) unless your optical disc drive supports at least 6x writing for DVD-RW media.
- You cannot write data to DVD+RW media (8x writing) unless your optical disc drive supports at least 8x writing for DVD+RW media.
- Your VAIO computer is designed to playback discs that conform to the Compact Disc (CD) standard. DualDiscs and some music discs encoded with copyright protection technologies do not conform to the CD standard. Therefore, these discs may not be compatible with the computer.
- When you buy pre-recorded or blank discs for use with your VAIO computer, be sure to read the notices on the disc package carefully to check both playback and recording compatibility with your computer’s optical disc drives. Sony does NOT guarantee the compatibility of VAIO optical disc drives with discs that are not compliant with the official “CD,” “DVD,” or “Blu-ray Disc” standard. USING NON-COMPLIANT DISCS CAN CAUSE FATAL DAMAGE TO YOUR VAIO COMPUTER OR CREATE APP CONFLICTS AND CAUSE SYSTEM HANGING.
  For inquiries about disc formats, contact the individual publisher of the pre-recorded disc or the manufacturer of the recordable disc.
● Your VAIO computer needs to be connected to the Internet to play DVD-RW, DVD-RAM, and DVD-R (single layer or dual layer) media that are compliant with the Content Protection for Recordable Media (CPRM) standard.

● To record, edit, or play copyright protected content, Blu-ray Disc media employs the Advanced Access Content System (AACS) technology. To use Blu-ray Disc media continually, you need to update the AACS key.

● You can update the AACS key through the Internet. Follow a message displayed on a recording, editing, or playback app you are using. Without updating the AACS key, you may become unable to record, edit, or play copyright protected content. To record, edit, or play content without copyright protection, you do not need to update the AACS key. You can update the AACS key for the Blu-ray Disc recording or playback app installed on your VAIO computer for five years after purchase. After that, we will inform you about the update on the support website.

● Region settings are required for some contents of DVD and BD-ROM Disc media. If the region setting on the optical disc drive does not match the region code on the disc, playback is not possible.

● Unless your external display is compliant with the High-bandwidth Digital Content Protection (HDCP) standard, you cannot play or view the contents of copyright protected Blu-ray Disc media through an HDMI connection.

● Some Blu-ray Disc content may restrict video output to standard definition or prohibit analog video output.

### Charging a USB Device

You can charge a USB device even while your VAIO computer is off, in Hibernate mode, or Sleep mode by enabling the USB charging settings.

Change the settings while the USB device is disconnected from the USB port that supports USB charging.

1. Start **VAIO Control Center** [Details] and select **Hardware**.
2. Enable the **USB Charging** setting.
3. Connect a USB device to the USB port with the mark printed around it.

   If charging does not start even when you connect a USB device to the USB port that supports USB charging, disconnect and connect the device.

**Note**

- With the USB charging settings enabled, power consumption when your VAIO computer is off or in Hibernate mode or Sleep mode increases because the computer supplies power to the USB port even when a USB device is not connected to the port.
- When the USB charging settings are enabled, you cannot use the remote wake-up function on the USB device connected to the USB port that supports USB charging.

**Hint**

- The USB charging settings are disabled by default.

Connecting a USB Device

You can connect a Universal Serial Bus (USB) device such as a mouse, floppy disk drive, speaker or printer to your VAIO computer. Installation of the device driver supplied with the USB device may be required when connecting. Refer to the manual that came with the device for more information.

1. Choose the USB port (1) you prefer to use.
2. Plug the USB device cable (2) (not supplied) into the USB port.

Note
- You may need to install the driver supplied with your USB device before use. Refer to the manual that came with the USB device for more information.
- In order to print documents, be sure the USB printer is compatible with your version of Windows.
- Before disconnecting USB speakers from your VAIO computer, stop DVD or music playback or turn off the computer. If you disconnect the USB speakers during playback, it may cause a malfunction.
- For information on how to remove a USB device, refer to the manual that came with the device.
- To protect your VAIO computer and/or USB devices from damage, observe the following:
  - When moving your VAIO computer with USB devices connected, avoid exposing the USB ports to shock or impact.
  - Do not put your VAIO computer in a bag or carrying case with USB devices connected.

Hint
- The USB ports on your VAIO computer are compliant with the USB 2.0 standard and USB 3.0 standard.
  - USB ports that are compliant with the USB 3.0 standard are identifiable by their blue color.
  - In addition to the USB 2.0 standard transfer modes, the USB 3.0 standard specifies the following transfer mode:
  - SuperSpeed: Transfer rate of 5 Gbps.
Changing the Button Assignment (VAIO Button)

You can change the current task assigned to the VAIO button. [Details]

1. Press and hold down the VAIO button. The settings window appears.
2. Change the current task to your desired one. You can select a task from the list.
3. Select OK.
Changing the Keyboard Backlight Settings
<Keyboard backlight equipped models>

You can turn on and off the keyboard backlight by changing the keyboard backlight settings.

1. Start VAIO Control Center [Details] and select Mouse and Keyboard.
2. Change the keyboard backlight settings in Keyboard Backlight. The settings window appears. Follow the on-screen instructions to change the settings.

You can operate the on-screen Touch Keyboard with touch screen operations for text entry.

1. Open the desktop [Details] and select (the Touch Keyboard icon) in the desktop notification area.

Hint
- The on-screen Touch Keyboard appears automatically when you touch a text field.
Creating/Changing/Removing Your Windows Password

Setting a Windows password allows you to protect your VAIO computer from unauthorized access by requiring password entry when the computer is turned on or returns from power saving mode to Normal mode.

Refer to Windows Help and Support for more information on the Windows password.

1. Open the charms [Details] and select the Settings charm.
2. Select Change PC settings in the lower right corner.
3. Select Users in the left pane of the PC settings screen.
4. Select Create a password or Change your password.
5. Follow the on-screen instructions to enter your password.

Note
- Do not forget your password. Write down the password and keep it in a secure place.

Hint
- You can enter a hint in order to recall your password if you forget it. You can also create a password reset disc that can be used to create a new password. Refer to Windows Help and Support for more information on the Windows password. [Details]
Removing the Power-on Password

If power-on password input for booting up your VAIO computer is no longer necessary, follow these steps to remove the machine password and user password.

1. Press the ASSIST button while your VAIO computer is off. The VAIO Care Rescue Mode screen appears.
2. Select Start BIOS setup. Enter a password if it has already been set. The BIOS setup screen appears.
3. Press the ← or → key to select the Security tab, select Set Machine Password or Set User Password, and then press the Enter key. The password entry screen appears.
4. Leave the Enter New Password and Confirm New Password fields blank and press the Enter key.
5. Press the ← or → key to select the Exit tab, select Exit Setup, and then press the Enter key. At the confirmation prompt, press the Enter key.

Setting/Changing the Power-on Password

You can set a password (power-on password) for booting up your VAIO computer, using the BIOS function. Entry of the power-on password will be prompted after the VAIO logo appears to start the computer.

There are two types of passwords. Set the machine password first.

- **Machine password (for administrators):** Allows users with administrative rights to change all the setup options in the BIOS setup screen, as well as to start your VAIO computer.
- **User password (for users without administrative rights):** Allows standard users to change some of the BIOS setup options, as well as to start your VAIO computer. To set the user password, you must first set the machine password.

1. Press the ASSiST button while your VAIO computer is off. The VAIO Care Rescue Mode screen appears.
2. Select Start BIOS setup. Enter a password if it has already been set. The BIOS setup screen appears.
3. Press the ← or → key to select the Security tab, select Set Machine Password or Set User Password, and then press the Enter key. The password entry screen appears.
4. Enter the password and press the Enter key. To change the password, enter the current password and a new password. The password can be set up to 32 alphanumeric characters long (including spaces) and it is case-sensitive.
5. Press the ↑ or ↓ key to select Password when Power On, press the Enter key, and select Enabled.
6. Press the ← or → key to select the Exit tab, select Exit Setup, and then press the Enter key.
7. At the confirmation prompt, press the Enter key.

**Note**
- Be sure to write down the password to avoid forgetting it.
- If you forget the password, you cannot boot up your VAIO computer.
- You can reset the user password at the BIOS setup screen by entering the machine password.
- If you forget the machine password, the password must be reset by authorized Sony service/support center. (The reset fee will be charged.)

Using Intel(R) Anti-Theft Technology

<Intel(R) Anti-Theft Technology supported models>

You can change the Intel(R) Anti-Theft Technology settings in the BIOS setup screen. Follow these steps to enable Intel(R) Anti-Theft Technology.

1. Press the ASSIST button while your VAIO computer is off.
   The VAIO Care Rescue Mode screen appears.
2. Select Start BIOS setup.
   Enter a password if it has already been set.
   The BIOS setup screen appears.
3. Press the ← or → key to select the Advanced tab.
4. Select Intel(R) AT Support System, and then press the Enter key.
5. Press the ↑ or ↓ key to select Enabled, and then press the Enter key.
6. Press the ← or → key to select the Exit tab, select Exit Setup, and then press the Enter key.
   At the confirmation prompt, press the Enter key.
Using the Built-in Camera
<Built-in camera equipped models>

You can make a video call through the Internet using the built-in camera and communication apps. The built-in camera indicator light is on while the built-in camera is in use.

Hint
- The apps installed on your VAIO computer vary depending on the computer's configurations.

Notes on the Built-in Camera
<Built-in camera equipped models>

- Do not scratch or soil the area on and around the built-in camera, as it may cause poor-quality images.
- Do not let direct sunlight enter the lens of the built-in camera regardless of your VAIO computer’s power state, as it may cause the camera to malfunction.

Care and cleaning of the built-in camera

If the area on and around the built-in camera is soiled, gently wipe it with a soft cloth, such as a lens cleaning cloth. Do not rub the area too hard, as it can be easily scratched.

About Recovery

Recovery is the process of restoring the built-in storage device back to its original factory condition. Refresh is the process of reinstalling the operating system with the main settings and personal data retained.

Refresh your VAIO computer first if the computer becomes unstable. If the problem persists, recover the computer.

There are two ways to recover the computer:
- From Recovery Media
- From the recovery area

Note
- The 64 GB or 128 GB SSD equipped models do not support the refresh function. If you check the capacity of the SSD, press the ASSIST button while your VAIO computer is off to display the VAIO Care Rescue Mode screen, and select Start BIOS setup.

When do I have to perform recovery or refresh?
- If your VAIO computer has become unstable
- If your VAIO computer has been infected with a computer virus
- If your VAIO computer is experiencing problems which cannot be solved through troubleshooting
- If you have formatted the C: drive by mistake

Which apps should I use to recover or refresh my VAIO computer or create Recovery Media?

Use the following apps.

VAIO Care
- Creating Recovery Media
- Checking your computer hardware

VAIO Care (Rescue Mode) : Recover or maintain your system
- Recovering your VAIO computer
- Rescuing (backing up) your data
- Erasing all the data on your built-in storage device

Windows Recovery Environment (Windows RE)
- Refresh

Hint
- Refer to the help file included with VAIO Care and VAIO Care (Rescue Mode) : Recover or maintain your system for more information.
- You can also recover your VAIO computer from Windows Recovery Environment (Windows RE).

What is a recovery area?

The recovery area on the built-in storage device contains data for system and app recovery.
Typically, you cannot modify or delete data in this area, however, there are commercially available apps designed for this purpose.

**Why do I have to create Recovery Media?**

Recovery Media are used to restore your VAIO computer back to its original factory condition. If Windows does not start and you have deleted the recovery area, you will need the Recovery Media to perform recovery.

Create the Recovery Media immediately after the computer is ready for use.

Checking the Volume of the Recovery Area

Your built-in storage device contains the recovery area where the data for the system recovery is stored.

To check the volume of the recovery area, follow these steps:

1. Open the charms [Details] and select the Search charm.
2. Select Apps and enter “Computer” in the search box.
3. Select Computer.
4. Select Computer on the menu bar and Manage.
5. Select Disk Management under Storage in the left pane.
   The volume of the recovery area and the total volume of the C: drive are displayed in the Disk 0 row in the center pane.
Creating Recovery Media

Follow the instructions below to create Recovery Media.

To create Recovery Media

**Hint**
- You can use DVDs, Blu-ray Disc, or a USB flash drive as Recovery Media. However, it is recommended that you use DVD-R media, because data can be accidently deleted from a USB flash drive. You can also use BD-R/BD-R DL/DVD-R DL/DVD+R/DVD+R DL media; however, the type of media your VAIO computer supports and the number of discs you need vary depending on the model you purchased. You will be notified of such information during the creation process.
- USB ports that are compliant with the USB 3.0 standard do not support recovery with a USB flash drive that is compliant with the USB 3.0 standard. On models without the USB ports that are compliant with only the USB 2.0 standard, be sure to create Recovery Media using the USB flash drive that is not compliant with the USB 3.0 standard.

1. Connect your VAIO computer to the Internet and download and install the latest updates using VAIO Update.

2. On the model without a built-in optical disc drive, connect an external optical disc drive (not supplied) to your VAIO computer. [Details]
   - If an AC adapter or a power cable is supplied, plug it into a power source.

3. Press the ASSIST button while your VAIO computer is on to start VAIO Care.
   - If the User Account Control window appears, select Yes.
   - The VAIO Care window appears.
   - Hint
     - If you are signed in to your VAIO computer as a standard user, you may be prompted to enter an administrator name and a password.

5. Read the on-screen instructions carefully, and then select Next.

6. Follow the on-screen instructions.

**Note**
- It may take some time for the current status of the process to display.
- Do not eject or disconnect the media while creating Recovery Media, as doing so may result in a failure.
- Keep Recovery Media in a secure place.

**Notes on creating Recovery Media**
- Recovery Media is specific to your VAIO computer of which it was created.
- You cannot refresh your VAIO computer using Recovery Media.
- Create Recovery Media immediately after your VAIO computer is ready for use. In the following cases, you may not be able to recover the computer from the recovery area and Recovery Media will be necessary:
  - You have modified the recovery area with apps designed for data modification.
  - You have installed an operating system different from the preinstalled operating system.
You have formatted your built-in storage device without using VAIO Care (Rescue Mode): Recover or maintain your system.

- Do not touch or allow the surface of the discs to become dirty. Fingerprints or dust on the surface may cause read/write errors.
- To create Recovery Media, you may need to use the free space on your C: drive more than double capacity of media you use. Depending on your model, you cannot create Recovery Media even at the time of purchase due to the shortage of free space, regardless if the optical disc drive supports Blu-ray Disc or Double/Dual Layer DVD media.
- Refer to the help file included with VAIO Care before using a USB flash drive as Recovery Media.

Notes on Recovery

Read the following notes thoroughly before recovering your VAIO computer.

Important notes on recovery

- Recovering your VAIO computer will delete all the data on the built-in storage device and restore all the settings to the original factory settings. Make sure you have a backup copy of your valuable data.
  
  If you want to retain the main settings and personal data, refresh the computer. [Details]

- Disconnect all peripherals from your VAIO computer except the power cord, the AC adapter, or devices required for recovery before recovering the computer.

- Keep the power cord or the AC adapter connected to your VAIO computer during the recovery process.

- Do not stop the recovery process until the process is complete.

- If you have forgotten the password and cannot start the recovery process, contact an authorized Sony service/support center to reset it. A reset fee will be charged.

Notes on apps

- Recovering your VAIO computer can restore only the preinstalled apps. The app(s) that has been installed on your own or the data you have created since purchase cannot be restored. In addition, you cannot restore only Windows.

- Certain preinstalled apps include options that allow the apps to uninstall or install themselves. However, the apps may not work properly on your VAIO computer if such options are used.

- Installing apps to modify partition sizes may disable recovery or Recovery Media creation. To avoid this, create the Recovery Media immediately after your VAIO computer is ready for use. [Details]

Recovering from Recovery Media

If the recovery area data has been corrupted or erased, you can use Recovery Media to recover your VAIO computer. However, recovering the computer using the Recovery Media will take longer than using the recovery area.

On the model without a built-in optical disc drive, connect an external optical disc drive (not supplied) to the computer. [Details]

If an AC adapter or a power cable is supplied, plug it into a power source.

1. Insert Recovery Media (optical discs) into the optical disc drive or connect a USB flash drive to the USB port on your VAIO computer while the computer is in Normal mode.
2. Turn off your VAIO computer.
3. Press the ASSIST button to display the VAIO Care Rescue Mode screen and select Start from media (USB device/optical disc).
   Follow the on-screen instructions until the Choose an option screen appears.
4. Select Troubleshoot, then Recovery and maintenance.
   Follow the on-screen instructions until the VAIO Care (Rescue Mode) : Recover or maintain your system screen appears.
   Hint
   - If the display language selection window appears, select your desired language, then OK.
5. Select Start recovery wizard.
6. Follow the on-screen instructions.

Note
- If you want to use the hard disk drive encryption features, disable Rapid Wake by performing custom recovery to avoid leaving unencrypted data on your VAIO computer.

Hint
- To perform custom recovery, select Tools and Start advanced recovery wizard.
- If you cannot recover your VAIO computer using the USB flash drive, connect the drive to another USB port on the computer, and then try recovering the computer again.

If your VAIO computer has become unstable, it is recommended that you use the refresh function provided by Windows. Refresh the computer by following these steps.

**Note**

- The 64 GB or 128 GB SSD equipped models do not support the refresh function. If you check the capacity of the SSD, press the **ASSIST** button while your VAIO computer is off to display the **VAIO Care Rescue Mode** screen, and select **Start BIOS setup**.

1. Press the **ASSIST** button while your VAIO computer is off.
   The **VAIO Care Rescue Mode** screen appears.

2. Select **Recover or maintain your system**.
   Follow the on-screen instructions until the **Choose an option** screen appears.

3. Select **Troubleshoot** and **Refresh your PC**.

Most user data saved on your built-in storage device, some Windows settings and all apps downloaded from **Windows Store** will be retained even after you refresh your VAIO computer. However, some app settings or files in the specific folders may not be retained. Confirm the following list for details of which settings are retained, and which data is erased after you refresh the computer.

**Settings retained after you refresh your VAIO computer**

The following settings will be retained after you refresh your VAIO computer.

- Library settings
- User accounts (local, domain, Microsoft account), and group memberships
- Domain settings
- **Windows Update** settings
- Start screen and lock screen background
- Desktop themes
- International settings
- Wireless network profiles
- Settings configured in Windows Welcome

**Data erased after you refresh your VAIO computer**

The data in the folders specified below will be erased after you refresh your VAIO computer.

- `\Windows`
- `\Program Files`
- `\Program Files(x86)`
- `\ProgramData`
- `\Users\<User name>\AppData`

**Note**

- Save important data in advance.
- Copyright protected data, such as digital broadcast data or music files organized by digital media playback apps may not be available, even if the data is retained in the same location after you refresh your VAIO computer.

Refer to the help file included with the app you are using for instructions.

**Hint**

264
• The apps installed at the time of delivery and installed from Windows Store are retained, whereas all Desktop apps that you installed after the purchase will be erased.

**Removing Recovery Content to Free up Disk Space**

Your built-in storage device contains the recovery area where the data for system recovery is stored. If your VAIO computer includes a solid state drive (SSD), you might want to minimize the recovery area by removing such data to free up disk space on the C: drive (or the last drive in your drive list, for example D: drive).

You need Recovery Media to remove the data for system recovery or to recover the computer after you remove the data.

Note that removing recovery content makes it impossible to use the refresh function.

On the model without a built-in optical disc drive, connect an external optical disc drive (not supplied) to the computer. [Details]

If an AC adapter or a power cable is supplied, plug it into a power source.

1. Create Recovery Media if you have not yet created it. [Details]
2. Insert the Recovery Media into the optical disc drive or connect a USB flash drive (not supplied) to the USB port on your VAIO computer while the computer is in Normal mode.
3. Turn off your VAIO computer.
4. Press the ASSIST button to display the VAIO Care Rescue Mode screen and select **Start from media (USB device/optical disc)**. Follow the on-screen instructions until the **Choose an option** screen appears.
5. Select **Troubleshoot** and **Recovery and maintenance**. Follow the on-screen instructions until the **VAIO Care (Rescue Mode) : Recover or maintain your system** screen appears.
6. Select **Tools** and **Remove recovery partition**.
7. Follow the on-screen instructions.

Creating Other Drives (Modifying Partitions)

Partitions are divided areas on your built-in storage device. Dividing the built-in storage device into more than one partition may have various advantages, such as separating the system files from your data files.

Your VAIO computer has only one partition (C: drive) as the factory default setting. If you want to store data in another partition, such as D: drive, change the partition size and create a new partition.

For more information on how to create partitions, see Creating Partitions. [Details]

Hint
- Some models may have D: drive as the factory default setting.

**Note**
- If you reduce the volume of the C: drive partition, you may not create Recovery Media or complete the recovery process successfully because the free space on the built-in storage device is not sufficient.

1. Open Control Panel [Details], select System and Security, and select Create and format hard disk partitions under Administrative Tools.
   If the User Account Control window appears, select Yes.
   **Hint**
   - If you are signed in to your VAIO computer as a standard user, you may be prompted to enter an administrator name and password.
2. Right-click the C: drive and select Shrink Volume.
3. Enter the size of the partition to be created in Enter the amount of space to shrink in MB and select Shrink.
4. Right-click Unallocated and select New Simple Volume.
5. Follow the on-screen instructions.

Deleting the Dedicated Partition for Rapid Wake during Recovery (Before Using the Drive Encryption Feature)

With the default Sleep mode settings, the computer’s state is saved to the dedicated partition when your VAIO computer enters Sleep mode. You, however, cannot encrypt this partition with Windows BitLocker Drive Encryption or other drive encryption features. If you use the drive encryption feature, it is strongly recommended that you first recover the computer with the settings which will not create the dedicated partition in order to avoid leaving unencrypted data.

1. Press the ASSIST button while your VAIO computer is off. The VAIO Care Rescue Mode screen appears.
2. Select Recover or maintain your system. Follow the on-screen instructions until the Choose an option screen appears.
3. Select Troubleshoot and Recovery and maintenance. Follow the on-screen instructions until the VAIO Care (Rescue Mode) : Recover or maintain your system screen appears.
4. Select Tools and Start advanced recovery wizard. Follow the on-screen instructions until a screen to select recovery type appears.
5. Select any option except for Custom recovery - C: drive only.
6. Clear the Create a dedicated partition to enable Rapid Wake check box or the Use space on the SSD to enable Rapid Wake check box in the Additional options screen and select Next. With this setting, the dedicated partition is not created during the recovery.
7. Follow the on-screen instructions.
8. After the recovery is complete, restart your VAIO computer.
9. Make sure that Rapid Wake is disabled on VAIO Control Center. [Details] If not, the recovery may not be complete properly. Try again starting from step 1.
10. Enable the drive encryption feature.

Note
- Recovering your VAIO computer deletes all data on your built-in storage device.

About Backup

The backup process creates a backup copy of your data stored on the built-in storage device and saves it to another location.
Due to unexpected events or computer viruses, you might lose various data stored on your built-in storage device. To restore the lost data, its backup copy is needed.
It is strongly recommended that you back up your data regularly.
If you can start Windows, back up and restore your data with the Windows feature.
To use the feature, open Control Panel and select System and Security and File History.

About Types of Backup

You can use the Windows **Backup and Restore** feature to back up your valuable data. There are several types of backup to meet your needs, as described below.

**Backing up files**
You can select and back up folders and files stored on your VAIO computer to an external hard disk drive. For details on how to back up data, refer to **Windows Help and Support**.

**Backing up system images**
You can create a backup copy of the whole system of your VAIO computer. If the built-in storage device or the computer ever stops working, you can use the system image to restore the computer as it was when backed up.

To create a system image, you need an optional hard disk drive formatted in NTFS format. You can also back up a system image to optical discs such as Blu-ray Disc or DVD disc. For details on how to create a system image, refer to **Windows Help and Support**.

**Note**
- We will not restore or compensate for any lost or damaged data under any circumstances including failure of your VAIO computer.
- Create Recovery Media soon after purchasing your VAIO computer. In the event that you cannot make a backup copy of your data with the Windows feature due to computer malfunctions, you can use the backup tool included in the Recovery Media to back up your data. For information on how to create the Recovery Media, see **Creating Recovery Media**.

**Hint**
- If your VAIO computer is equipped with no disc drive, you need to connect an external device, such as an external hard disk drive or DVD drive, to the computer before backup, or you need to resize the partition of your C: drive and create another partition before backup.
Backing Up Your Data when You cannot Start Windows

If you cannot start Windows, back up your data with VAIO Care (Rescue Mode) : Recover or maintain your system.

To rescue your data

1. Press the ASSIST button while your VAIO computer is off. The VAIO Care Rescue Mode screen appears.
2. Select Recover or maintain your system. Follow the on-screen instructions until the Choose an option screen appears.
3. Select Troubleshoot and Recovery and maintenance. Follow the on-screen instructions until the VAIO Care (Rescue Mode) : Recover or maintain your system screen appears.
   - If the display language selection window appears, select your desired language, then OK.
4. Select Tools and Rescue Data.
5. Follow the on-screen instructions.

Hint
- Alternatively, you can start VAIO Care (Rescue Mode) : Recover or maintain your system with Recovery Media. [Details]
- It is recommended that you select an external hard disk drive as a location to save rescued files if you select Custom rescue.

Notes on using VAIO Care (Rescue Mode) : Recover or maintain your system

- Handle rescued files with care to protect from unauthorized access.
- Disable the Windows hard disk drive encryption feature before using VAIO Care (Rescue Mode) : Recover or maintain your system to back up and restore your data. However, rescued files which are not encrypted on the built-in storage device can be easily accessed by unauthorized users using Recovery Media and this app. Therefore, after using the app, be sure to set the power-on or hard disk password, enable the Windows hard disk drive encryption feature, and keep the Recovery Media in a secure place to protect rescued files from unauthorized access.
- To restore copyright protected data, such as music files organized by digital media playback apps, use a backup tool specified by the app you used to import such data. Sony does not guarantee the playback compatibility of data which is not restored with the specified backup tool.
- Using VAIO Care (Rescue Mode) : Recover or maintain your system does not guarantee backup of all the data on your built-in storage device. Sony assumes no liabilities for any loss of your data arising out of the backup process.
- Use the power cord or the AC adapter to power your VAIO computer while using VAIO Care (Rescue Mode) : Recover or maintain your system.
- Your VAIO computer automatically restarts 72 hours after VAIO Care (Rescue Mode) : Recover or maintain your system starts. If 72 hours have passed during the backup...
process, the process will be stopped and the computer will restart. There is no way to resume the process.

- Rescued files may be divided into two or more files and saved in a specified location or renamed, depending on the location you select. Use VAIO Data Restore Tool to restore the rescued files. [Details]
- If an external hard disk drive or optical disc drive does not support the USB connection, you need to install a driver.

A restore point enables you to restore your computer system files to a previous state, depending on when the restore point was created. Typically, restore points are created automatically, for example when you install a driver. However, we recommend that you create a new restore point manually before installing any apps or drivers on your VAIO computer.

Refer to **Windows Help and Support** for information on creating a restore point. [Details]

The “Memory Stick” slot on your VAIO computer can accommodate the following sizes and types of media:

- “Memory Stick Duo”
- “Memory Stick PRO Duo”
- “Memory Stick PRO-HG Duo”*
- “Memory Stick Micro”

* The “Memory Stick Duo” slot on your VAIO computer does not support 8-bit parallel data transfer (high-speed data transfer).

**Note**

- Your VAIO computer supports only Duo-size “Memory Stick”, and does not support standard-size “Memory Stick”.
- Before using “Memory Stick Micro” (“M2”), be sure to insert it into an “M2” Duo adaptor. If you insert the media directly into the “Memory Stick Duo” slot without the adaptor, you may not be able to remove it from the slot.
- Your VAIO computer has been tested and found compatible with any Sony branded “Memory Stick” of up to 32 GB, available as of September 2012. However, “Memory Stick” compatibility is not guaranteed in all cases.
- The “Memory Stick” slot on your VAIO computer does not support the copyright protection feature of “Memory Stick”.
- If you use “Memory Stick” in a place subject to static electricity or electrical noise, stored data may be lost.
- The maximum possible size for a file on “Memory Stick PRO Duo” or “Memory Stick PRO-HG Duo” is less than 4 GB, as defined in the file system specification.

Formatting “Memory Stick”

“Memory Stick” is formatted in the specific FAT format by default and is ready for use. Be sure to use the device that is designed to format the media and supports “Memory Stick” when formatting the media. If you want to reformat the media with your VAIO computer, follow these steps.

**Note**
- Formatting “Memory Stick” erases the entire data stored on the media. Be sure to make a backup copy of important data to avoid erasing it.
- Do not remove “Memory Stick” from the slot while formatting. This could cause a malfunction.

1. Locate the “Memory Stick” slot.
   **Hint**
   - For SVT131, the “Memory Stick” slot on your computer also works as an SD memory card slot.

2. Carefully slide “Memory Stick” into the slot until it clicks into place. [Details]

3. Open **Computer**. [Details]

4. Right-click the “Memory Stick” icon and select **Format**.

5. Select **Restore device defaults**.
   The size of the allocation unit and file system will change to default settings.
   **Note**
   - Do not select **NTFS** from the **File system** drop-down list as it may cause a malfunction.
   **Hint**
   - The formatting process will be completed more quickly if you select **Quick Format** in **Format options**.

6. Select **Start**.
   Follow the on-screen instructions.
   **Note**
   - It may take time to format “Memory Stick” depending on the media type.

Inserting SD Memory Cards

Your VAIO computer is equipped with an SD memory card slot. You can use this slot to transfer data among digital cameras, camcorders, music players, and other audio/video devices.

The SD memory card slot on the computer can accommodate the following memory cards:
- SD memory card
- SDHC memory card
- SDXC memory card

To insert an SD memory card, follow these steps.

1. Locate the SD memory card slot.
   
   **Hint**
   
   For SVT131, the SD slot on your computer also works as a “Memory Stick” slot.

2. Hold the SD memory card with the arrow pointing toward the slot, and carefully slide it into the slot until it clicks into place.

   The SD memory card icon will appear in the Computer window [Details] after you insert the card into the slot.

**Note**
- Be careful not to insert an SD memory card in the wrong orientation. If you force it into the slot upside down, the slot may be damaged. Refer to the manual that came with the SD memory card for more information.
- The SD memory card icon will not appear in the Computer window [Details] until you insert the card into the slot.

**Hint**
- When you insert the SD memory card into the slot for the first time, you may be prompted to install a driver. If prompted, follow the on-screen instructions to install the driver.
- While data is being read from or written to the SD memory card, the media access indicator light is on.

Notes on Using SD Memory Cards

Before using SD memory cards, read the following precautions for correct use.

- Keep an SD memory card out of reach of children. There is a risk of swallowing it.
- Do not touch the SD memory card connector with your finger or metal objects.
- An SD memory card contains delicate electronic components. Do not impact, bend or drop it.
- Do not disassemble or modify an SD memory card.
- Do not wet an SD memory card.
- Do not use or store in a location subject to:
  - Extremely high temperature, such as in a car parked in the sun
  - Direct sunlight
  - High humidity or corrosive substances
  - Excessive dust
- Be sure to use SD memory cards and adaptors that are compliant with the standards supported by your VAIO computer. Incompatible cards and adaptors may get stuck in the slot, causing damage to the computer.
- You cannot write data to an SD memory card that is write-protected.
- It is recommended that you make a backup copy of important data.
- Stored data may be lost or corrupted if:
  - You remove an SD memory card or turn off your VAIO computer while the media access indicator light is on.
  - You use an SD memory card at a place where static electricity or electrical noise may disturb the card.
- When carrying an SD memory card, be sure to put it in its case to avoid static electricity.
- Before using an SD memory card with a device other than a computer, such as a digital camera or a portable audio, format (initialize) the SD memory card using the device. Some devices may not support the file format for computers and show you a message that recommends you to format the SD memory card. In this case, copy data from the card to your VAIO computer and format the card using the device. All data in the SD memory card will be deleted when you format it. Refer to the manual that came with the device for more information.
- Do not insert foreign objects into the SD memory card slot.
- The SD memory card slot can be used for reading/writing supported memory cards only, and cannot be used for other purposes.
- SD memory cards (up to 2 GB), SDHC memory cards (up to 32 GB) and SDXC memory cards (up to 64 GB) available as of September 2012 have been tested and found compatible with your VAIO computer. However, it is not guaranteed that all SD memory cards, SDHC memory cards or SDXC memory cards will be compatible with the computer.
- The SD memory card slot on your VAIO computer does not support the copyright protection feature of the SD memory card, the SDHC memory card, and the SDXC memory card.
- Do not attempt to insert a memory card or memory card adaptor of a different type into the memory card slot. An incompatible memory card or memory card adaptor may get stuck in the slot, causing damage to your VAIO computer.
- Some types of SD memory cards, for example ones with the UHS (Ultra High Speed data transfer feature), may become extremely hot due to continuous access to the memory cards. In such a case, wait for a while before removing the memory card until it
cools down.

- The “Memory Stick” slot can be used for reading/writing supported “Memory Stick” only, and cannot be used for other purposes.

Notes on Using “Memory Stick Duo”

When using “Memory Stick Duo”, do not use a fine-tipped pen to write on the label adhered to “Memory Stick Duo”. Exerting pressure on the media may damage internal components.

Notes on Using “Memory Stick Micro”

- Before using “Memory Stick Micro” (“M2”), be sure to insert it into an “M2” Duo adaptor.
If you insert the media directly into the "Memory Stick Duo" slot without the adaptor, you may not be able to remove it from the slot.

- Keep "Memory Stick Micro" and "M2" Duo adaptors away from children. They are harmful if swallowed.

About the International ENERGY STAR(R) Program

The following information is applicable to ENERGY STAR qualified products only. As an ENERGY STAR Partner, Sony confirmed that this product meets the ENERGY STAR standards for energy efficiency.

The International ENERGY STAR Office Equipment Program is an international program that promotes energy saving through the use of computers and office equipment. The program backs the development and dissemination of products with functions that effectively reduce energy consumption.

For detailed information on the ENERGY STAR Program, visit the following websites:

This computer is designed in compliance with the ENERGY STAR standards and delivered with the following power saving settings that apply to the computer running on AC power:

- The LCD backlight is turned off automatically after no more than 15 minutes of inactivity.
- The computer enters Sleep mode automatically after no more than 30 minutes of inactivity.

Press the (Power) button to bring the computer back into Normal mode.

Handling the Built-in Storage Device

The built-in storage device (hard disk drive or solid state drive) has a high storage density and reads or writes data in a short time. However, it can be easily damaged if improperly used. If the built-in storage device is damaged, the data cannot be restored. To prevent losing data, you should be careful when handling your VAIO computer.

To avoid damaging your built-in storage device

- Do not subject your VAIO computer to sudden movements.
- Keep your VAIO computer away from magnets.
- Do not place your VAIO computer in a location subject to mechanical vibration or in an unstable position.
- Do not turn off the power or restart your VAIO computer while reading or writing data to the storage device.
- Do not use your VAIO computer in a place subject to extreme changes in temperature.
- Do not remove the storage device from your VAIO computer.
Safety Information

Refer to the supplied safety manual for detailed safety information.

Computer

- If you drop a solid object or any liquid onto your VAIO computer, shut down the computer, unplug it, and remove the battery pack if it is removable. You may want to have the computer checked by qualified personnel before operating it again.
- Use only specified peripheral equipment and interface cables.
- Keep small parts such as “Memory Stick” and “Memory Stick” adaptors out of reach of children. There is a risk of swallowing them.
- The temperature of the surface and the bottom of your VAIO computer, the AC adapter, and the battery may rise due to the CPU load or an electric current generated while the battery is being charged. This is normal and does not indicate a malfunction. The amount of heat generation varies depending on external devices or apps in use.
- If your VAIO computer or the AC adapter becomes extraordinarily hot, turn off the computer, unplug the AC adapter, remove the battery pack if it is removable, and then contact an authorized Sony service/support center.

Power source

- Do not place heavy objects on the power cord, or this could cause a fire.
- To disconnect the power cord, pull it out by holding the plug. Never pull the cord itself.
- Do not use cut or damaged connection cables.
- Unplug your VAIO computer from the AC outlet if you are not planning to use the computer for an extended period of time.
- If you are not using your VAIO computer for an extended period of time, remove the battery pack from the computer to prevent damage to the battery pack.

Headphones

- Do not use headphones while driving, cycling, or operating any motorized vehicle. It may create a traffic hazard and is illegal in some areas. It can also be potentially dangerous to play loud music while walking, especially at pedestrian crossings.
- Avoid using headphones at high volume. Hearing experts advise against continuous, loud and extended play. If you experience a ringing in your ears, reduce the volume or discontinue use.

Cleaning Your VAIO computer/LCD screen

Before cleaning your VAIO computer, read the following precautions for the correct cleaning procedure.

When cleaning your VAIO computer

- Turn off your VAIO computer, unplug the AC adapter, and remove the battery pack before cleaning the computer.
- Use a soft, dry cloth to wipe debris and dust off your VAIO computer.
- Be sure to use a soft, dry cloth when cleaning your VAIO computer. If the computer is badly soiled, fog the surface of the computer with your breath and wipe off the dirt, or clean off with a lightly wet cloth and then wipe remaining moisture away with a dry cloth.
- Do not use solvents such as benzine, acetone, alcohol, thinner, or commercially available cleaners, as these may cause damage to the surface or coating of your VAIO computer.
- Use a blower to blow off debris and dust underneath the keys (keycaps). Do not remove any keycap from the keyboard.
- Do not use a vacuum cleaner, as it may cause a malfunction.

When cleaning your LCD screen

- Be sure to use a soft, dry cloth when cleaning your VAIO computer. If the LCD screen is badly soiled, fog the surface of the LCD screen with your breath and wipe off the dirt, or clean off with a lightly wet cloth and then wipe remaining moisture away with a dry cloth.
- Do not use solvents such as benzine, acetone, alcohol, thinner, or commercially available cleaners, as these may cause damage to the LCD screen.

What should I do if I forget the power-on password to start my VAIO computer?

- If you forget the password [Details], you cannot start your VAIO computer.
  - When you forget your user password:
    Enter the machine password to reset the user password at the BIOS setup screen.
  - When you forget your machine password:
    The password needs to be reset and a fee will be charged. To reset the password, contact an authorized Sony service/support center.
What should I do if I do not hear sound from a digital audio device connected to the digital output port, such as the HDMI output port?

- To output sound from a digital audio device connected to the digital output port on your VAIO computer, you need to change the sound output to the digital audio device.

[Details]
What should I do if I do not hear sound from speakers or headphones?

- Check if the volume from speakers or headphones is not minimized.
  - Keep pressing the **Fn+F4** keys to turn up the volume loud enough to hear sound. [Details]

- Check if the volume in Windows is not turned off or minimized. [Details]
  - When the volume is turned off (🔒), select 🔒 (Deactivate muting) to turn on the volume (🔊). When the volume is minimized, turn up the volume.

- When connecting external speakers or headphones, check the following:
  - Make sure external speakers or headphones are properly connected to your VAIO computer. [Details]
  - If external speakers require external power, make sure the speakers are securely connected to an AC outlet.
  - Make sure external speakers are turned on.
  - Make sure the volume from external speakers is not minimized.

- Make sure the sound output device is correctly selected. [Details]

- Check the volume on the playback app you are using.
What should I do if I hear microphone feedback from speakers when using my microphone?

- Microphone feedback may occur when your microphone receives the sound from a sound output device, such as speakers.
  - Keep the microphone away from a sound output device.
  - Turn down the volume of the speakers and the microphone.
What should I do if my microphone does not work?

- Check if your microphone is selected as a recording device. Open **Control Panel [Details]** and select **Hardware and Sound**. Select **Sound** and check if there is a check mark on your desired microphone icon on the **Recording** tab. If not, select the icon and **Set Default**. If the icon is not displayed, make sure the microphone is properly connected to your VAIO computer.
What should I do if sound interruptions occur during video or audio playback?

- Sound interruptions may occur when the CPU load is high. In this case, reduce the CPU load by exiting all running apps other than a playback app, or by disabling unnecessary audio effects applied to playback.
What should I do if I cannot find the BLUETOOTH(R) device I want to communicate with?

- Shorten the distance between your VAIO computer and the BLUETOOTH device within 33 feet/10 meters.
  If the computer is more than 33 feet/10 meters away from the BLUETOOTH device, communication will not be possible.
  The computer may not be able to communicate with the BLUETOOTH device even within 33 feet/10 meters due to obstacles between the devices, radio wave quality, ambient environment that includes existence of walls and materials of such walls, or apps in use.
  In such a case, move the computer away from obstructions or closer to the device.

- Check that the BLUETOOTH function of the device you want to communicate with is on, and the device is not in the power saving mode.

- Check that the BLUETOOTH function of the device you want to communicate with is enabled.
  Refer to the manual that came with the device for more information.

- If the device you want to communicate with is already communicating with another BLUETOOTH device, it may not be found or it may not be able to communicate with your VAIO computer.
What should I do if I cannot use the BLUETOOTH(R) function?

- Make sure the WIRELESS indicator light on your VAIO computer is on. When the WIRELESS indicator light is off, you cannot use the BLUETOOTH function.

- Make sure the BLUETOOTH function is enabled. Open the charms [Details] and select the Settings charm. Select Change PC settings in the lower right corner, then select Wireless in the left pane. Turn off Airplane mode and change the Bluetooth setting under Wireless devices to On.
What should I do if other BLUETOOTH(R) devices cannot connect to my VAIO computer?

- See What should I do if I cannot find the BLUETOOTH device I want to communicate with?. [Details]
- Make sure that the authentication (pairing) between the device and your VAIO computer has been properly performed. Some BLUETOOTH devices require authentication (pairing) before establishing connection with another device. Perform the authentication process before connecting to such devices.
- Make sure that your VAIO computer allows BLUETOOTH devices to find the computer. Select (arrow) in the desktop notification area [Details], right-click (the BLUETOOTH icon), and select Open Settings to open the settings window. Select the Options tab and make sure that the Allow Bluetooth devices to find this computer check box is selected.
What should I do if the BLUETOOTH(R) icon is not displayed in the desktop notification area?

- Make sure the BLUETOOTH function is enabled.
  Open the charms [Details] and select the Settings charm.
  Select Change PC settings in the lower right corner, then select Wireless in the left pane.
  Turn off Airplane mode and change the Bluetooth setting under Wireless devices to On.

- Check the BLUETOOTH settings.
  Open Control Panel [Details] and select Hardware and Sound and Devices and Printers.
  Right-click the computer icon and select Bluetooth settings and the Show the Bluetooth icon in the notification area check box.
Why can’t I use BLUETOOTH(R) devices when I switch users?

- If you switch users without signing out from your system, BLUETOOTH devices will not work.
  Be sure to sign out before switching users.
Why can’t I use the BLUETOOTH(R) function when I sign in to my VAIO computer as a user with a standard user account?

- The BLUETOOTH function may not be available to a user with a standard user account on your VAIO computer.
  Sign in to the computer as a user with administrative rights.
Why is my BLUETOOTH(R) connection slow?

- Data transfer speed depends on obstructions and/or the distance between the two devices, radio wave quality, and the device configuration or apps in use. Move your VAIO computer and BLUETOOTH device closer to each other.

- If a version of a BLUETOOTH standard employed on the BLUETOOTH device with which you want to communicate is not the same version as the one employed on your VAIO computer, the communication speed may become slower.

- If your VAIO computer is compliant with BLUETOOTH high speed technology and the following two conditions are met, high-speed communications are available. However, some BLUETOOTH profiles do not support high-speed communications.
  - The BLUETOOTH device with which you want to communicate supports BLUETOOTH high speed technology.
  - Both the Wi-Fi(R) (Wireless LAN) and BLUETOOTH functions on the computer are enabled.
What should I do if I cannot play a disc, or dropped frames and/or sound interruptions occur during playback?

- Exit all running apps other than the playback app.
- Try using other playback apps, such as a DVD playback app.
- To play DVD media with Content Protection for Recordable Media (CPRM), you need to install a CPRM pack for the playback app on your VAIO computer.
- To play copyright protected Blu-ray Disc media continually, you need to update the AACS key. Follow a message displayed on the computer screen to update the AACS key. You can update it through the Internet.
- Uninstall the playback or writing app installed on your VAIO computer after purchase. For instructions on how to uninstall the app, refer to the help file included with the app or Windows Help and Support. [Details]
What should I do if I cannot remove the disc from the optical disc drive?

- The drive eject button may not work depending on your VAIO computer status. Exit all running apps and press the drive eject button. If the problem persists, restart the computer and press the drive eject button again.

- If the problem persists, insert a thin, straight object (such as a paper clip) into the manual eject hole on the optical disc drive.
Why can’t I write data to a disc?

- See Supported Discs for more information. [Details]
Why does it take time to write data to DVD writable media?

- In disc-at-once mode, it may take about 20 to 40 minutes to complete the writing process after the progress bar reaches 100%. This is normal and does not indicate a malfunction, so wait until the process is complete.

Because disc-at-once mode writes all the data to a disc at one time, the optical disc drive writes 1 GB of dummy data to a disc even when the actual data size is less than 1 GB to ensure playback compatibility.

Some players can play only discs that are created in disc-at-once mode. When you play the created disc on a player other than your VAIO computer, make sure if the player supports disc writing mode you selected.
Why is my VAIO computer running slowly and the CPU clock frequency low while the computer is running on battery power?

- While your VAIO computer is running on battery power, the CPU clock frequency is reduced for power conserving purposes, which causes the computer to run slowly. This is normal and does not indicate a malfunction.
What should I do if no image is displayed on my TV screen or external display connected to the HDMI output port?

- Reconnect the HDMI cable (not supplied). [Details]
- Make sure you are using an HDCP-compliant display. The copyright protected content is not displayed on a non-HDCP compliant display.
- Change the screen resolution of the connected TV or external display. [Details] Images may appear on the screen.
How can I find the physical address (MAC address) of the built-in wireless network interface of my VAIO computer?

- If MAC address filtering of your access point is enabled, register the MAC address of your VAIO computer in the setup screen of the access point. Otherwise, the computer cannot connect to the access point.
  Open Command Prompt [Details], enter "ipconfig /all", and then press the Enter key. You can find the physical address (MAC address) in the Physical Address field under Wireless LAN adapter Wi-Fi.
What should I do if I cannot connect my VAIO computer to an access point (or the Internet)?

- See What should I do if I cannot use the Wi-Fi(R) (Wireless LAN) function?. [Details]
- Make sure the access point is on.
- Check the access point settings.
  - In the following settings, your VAIO computer may fail to connect to an access point, or the connection may be unstable.
  - When the access point is set to refuse communication with a device whose SSID is set to "ANY," and the SSID of your VAIO computer or the access point is set to "ANY."
  - When the access point is in stealth mode.
    For more information, refer to the manual that came with your access point, or consult your Wi-Fi service provider.
- Make sure your VAIO computer and access point are connected to one another. [Details]
- Connection capability is affected by distance, obstructions, device configuration, radio wave strength/interference, wall materials, running apps, etc.
  Move your VAIO computer away from obstructions or closer to any access point you may be using.
- Open the charms [Details] and select the Settings charm and (the network icon).
  Check that your access point is displayed.
What should I do if I cannot play back movies or audio tracks received via Wi-Fi(R) (Wireless LAN), or their playback is interrupted? Why is the data transfer speed slow?

- Move your VAIO computer away from obstructions, or closer to any access point you may be using. Connection capability is affected by distance, obstructions, device configuration, radio wave strength/interference, wall materials, running apps, etc.
- If you are using an access point, the device may be temporarily overloaded depending on how many other devices are communicating via the access point. Wait for a while and try again.
- Change the channel setting of your access point. By changing the channel, interference on your wireless network may be reduced and data transfer speed may improve. If access point channel interference occurs, data transfer speed may be reduced.
- If your access point interferes with other access points, change the access point channel. Refer to the manual that came with your access point for more information.
- Make sure that a microwave oven is not operating near your Wi-Fi devices. The 2.4 GHz frequency band, on which Wi-Fi operates, is used by various devices and apparatus. If you use a microwave oven while communicating via Wi-Fi, data transfer rate may slow down, communication range may narrow, or communication may be interrupted.
What should I do if I cannot use the Wi-Fi(R) (Wireless LAN) function?

- Enable the Wi-Fi function. Open the charms [Details] and select the Settings charm.
  Select Change PC settings in the lower right corner, and select Wireless in the left pane.
  Turn off Airplane mode and change the Wi-Fi setting under Wireless devices to On.

- To use the Wi-Fi function on your VAIO computer, you need to configure the Wi-Fi settings.
  Check the Wi-Fi settings of the computer. [Details]

- If a connection utility app supplied with a third-party Wi-Fi product is installed, uninstall it.
  If a connection utility app is installed, Windows may fail to configure the Wi-Fi settings. Be sure to take a note of your settings, (such as security keys) before uninstalling.
What should I do if I do not know the SSID or security key for the access point?

- You can find the key in the setting screen of your access point. Refer to the manual that came with your access point for more information.
What should I do if I cannot turn off my VAIO computer?

- Follow any of these procedures to exit all running apps and then turn off your VAIO computer again.
  - Drag the app from the top center of the screen to the bottom center. [Details]
  - Press the Alt+F4 keys.
    - If there is unsaved data, save it at the confirmation prompt.
    - Press the Alt+F4 keys until the Shut Down Windows window appears and select Shut down from the drop-down list and OK.

- If you have installed a new app on your VAIO computer, check if the app is working properly, its data is normal, and you have operated it correctly.

- Contact the app publisher or designated provider for technical support.

- If you connect peripheral devices, such as a printer or a USB device, to your VAIO computer or connect the computer to your network, disconnect all peripheral devices or the computer’s network connection and then turn off the computer.
  While the computer is communicating with a peripheral device or the network, Windows does not allow you to turn off the computer. In addition, some peripheral device drivers for the peripheral devices do not support the feature to force the computer to shut down.

- If the computer screen freezes, press the Ctrl+Alt+Delete keys, select (Shut down) in the lower right corner of the computer screen, and then select Shut down.

- If your VAIO computer freezes with a message indicating the settings are being saved or the computer is shutting down displayed, follow these procedures in order.
  - Press the Enter key.
    - Wait for a while.
  - If the problem persists, press the Ctrl+Alt+Delete keys.
    - Wait for a while.

- If you still cannot turn off your VAIO computer even after you follow all the above procedures in this topic, perform the following operations.
  Note that performing these operations may cause working data to become corrupted. Be sure to disconnect the computer from the network before performing the following operations.
  - Press the Ctrl+Alt+Delete keys, select (Shut down) in the lower right corner of the computer screen, and then select Shut down.
  - Press and hold down the (Power) button for more than four seconds.
  - Unplug the AC adapter and remove the battery pack from your VAIO computer.
What should I do if VAIO Care Rescue Mode starts when I turn on my VAIO computer?

- You may have accidentally pressed the ASSIST button rather than the (Power) button. Exit VAIO Care Rescue Mode and locate the (Power) button on your VAIO computer.
What should I do if my VAIO computer does not enter Hibernate mode?

- Select Choose what the power button does in the Power Options window. [Details]
  Select Change settings that are currently unavailable, the Hibernate check box, and Save changes.
What should I do if my VAIO computer does not turn on (the power indicator light does not turn on in green)?

- Make sure all cables are securely connected to devices, such as between your VAIO computer and the AC adapter; the AC adapter and the power cord; and the power cord and an AC outlet. [Details]

- If you plug the power cord of your VAIO computer into a power strip with a switch, make sure the switch is turned on and the power cord of the power strip is securely plugged into an AC outlet.

- If you do not turn off your VAIO computer through the normal procedure, the power controller may be suspended due to a program error. Disconnect all cables and peripheral devices, such as the power cord and the USB device, remove the battery pack, and wait about five minutes. Then, put them back in place and turn on the computer again.

- Before using your VAIO computer for the first time, you need to connect the computer to a power source with the AC adapter.

- Check that you are using the supplied Sony AC adapter. For your safety, use only the genuine Sony rechargeable battery pack and AC adapter, which are supplied by Sony for your VAIO computer.

- A battery error may have occurred. Push and hold the battery off button on the bottom of your VAIO computer for about three seconds with a thin, straight object (such as a paper clip). [Details]

- Make sure the battery pack is installed properly.

- The battery pack may have run out of power.

- Make sure your VAIO computer is not in Hibernate mode by pressing the (Power) button on the computer. Note that if you press and hold down the (Power) button for more than four seconds, the computer will turn off.

- If you bring your VAIO computer directly from a cold location to a warm one, or use it in a high humidity location, moisture may condense inside the computer. In such a case, allow at least one hour before turning on the computer. Do not use the computer in a high humidity location (a relative humidity of more than 80 %), as it may cause the computer to malfunction.
What should I do if my VAIO computer does not turn on or the power button does not work (the power indicator light blinks fast)?

- A battery error may have occurred. Push and hold the battery off button on the bottom of your VAIO computer for about three seconds with a thin, straight object (such as a paper clip). [Details]
- The battery pack may not be installed properly. Remove the battery pack and reinstall it properly. [Details]
- If the problem persists, it means the installed battery is not compatible with your VAIO computer. Remove the battery pack.
What should I do if the power indicator light turns on in green when I press the power button but the screen remains blank?

- Make sure the brightness and contrast controls are adjusted correctly.
- An external display may be selected as the display output. Press the **Fn+F7** keys several times to select your desired display output, and then press the **Enter** key.
- If you are using an external display, make sure it is plugged into an AC outlet and is on. Make sure the brightness and contrast controls are adjusted correctly. Refer to the manual that came with your display for information on how to change the settings.
- Press the **Alt+F4** keys several times to close the app window. An app error may have occurred.
- If you wait for a while and the computer screen remains blank, restart your VAIO computer by following the procedures below in order. Note that following these procedures may cause working data to become corrupted.
  - Disconnect all peripheral devices, such as a printer or a USB device, and your VAIO computer from the network, if any.
  - Press and hold down the **(Power)** button for more than four seconds and make sure the power indicator light is off. Then, turn on your VAIO computer again.
  - If the problem persists, press and hold down the **(Power)** button for more than four seconds and make sure the power indicator light is off. Disconnect all cables connected to your VAIO computer, such as the AC adapter, remove the battery pack, and wait about five minutes. Then, put all cables, peripheral devices, and the battery pack back in place and turn on the computer again.
  - If an extra memory module is not installed properly, your VAIO computer may not turn on. Use of memory modules not specified by Sony or improper installation of memory modules may cause the computer to fail to boot or to become unstable. In such a case, reinstall the memory module.
  - If you use a memory module other than the Sony branded memory module, contact the sales dealer or the manufacturer of the memory module.
  - If you bring your VAIO computer directly from a cold location to a warm one, or use it in a high humidity location, moisture may condense inside the computer. In such a case, allow at least one hour before turning on the computer. Do not use the computer in a high humidity location (a relative humidity of more than 80%), as it may cause the computer to malfunction.
Why can’t I enable the Rapid Wake setting?

- After adding a memory module to your VAIO computer, you may not be able to enable the Rapid Wake setting due to the shortage of the dedicated partition volume for Rapid Wake.
  In such a case, recover the computer. [Details]
Why does a message appear and Windows fail to start when I turn on my VAIO computer?

- The BIOS boot options may have been incorrectly configured. Press the ASSIST button while your VAIO computer is off to display the VAIO Care Rescue Mode screen, select Start BIOS setup, and change the Boot Mode setting, then restart the computer.

- If a message such as “Secure Boot Fail” appears, check the following:
  - Your VAIO computer may be booting from an external device that the computer does not support. When an external drive or a USB device is connected to the computer, disconnect it and restart the computer.
  - The BIOS boot options may have been changed from the factory default settings. Press the ASSIST button while your VAIO computer is off to display the VAIO Care Rescue Mode screen, then select Start BIOS setup. Press the ← or → key to select the Security tab, select Factory Default, and then press the Enter key. When the confirmation prompt appears, press the Enter key and restart the computer.
  - If a message appears even after you restart your VAIO computer, recover the computer using the recovery data on the built-in hard disk drive or SSD, or using the Recovery Media you have created. [Details]
  - The BIOS boot options may have been incorrectly configured. If the operating system on your VAIO computer is other than the preinstalled system, press the ASSIST button while the computer is off to display the VAIO Care Rescue Mode screen, then select Start BIOS setup. Press the ← or → key to select the Security tab, change the Secure Boot setting to Disabled, and then restart the computer.
Why does my VAIO computer automatically turn off?

- When the battery pack is running out of power, your VAIO computer automatically enters Hibernate mode and eventually turns off. Connect the AC adapter to the computer or charge the battery pack.

How do I disable the touch pad?

- Press the Fn+F1 keys to disable the touch pad. [Details]
- Alternatively, start VAIO Control Center [Details], then disable the touch pad.
What should I do if my VAIO computer screen freezes?

- Restart your VAIO computer. Press the Ctrl+Alt+Delete keys, select (Shut down) in the lower right corner of the computer screen, and then select Restart. If the problem persists, press and hold down the (Power) button for more than four seconds, or slide the (Power) switch to the right for more than four seconds.
What should I do if the pointer does not move?

- If your finger reaches an edge of the touch pad, the pointer will not move. You will need to lift your finger, and then place it back on the center of the touch pad.

- The pointer may not move temporarily as expected depending on the condition of your VAIO computer. In such a case, wait for a while before moving the pointer again.
  
  If the pointer still does not move, press the `Ctrl + Alt + Delete` keys, select (Shut down) in the lower right corner of the computer screen, and then select Shut down. If the problem persists, press and hold down the (Power) button or slide the (Power) switch to the right for more than four seconds.
  
  Turning off the computer with the `Ctrl + Alt + Delete` keys, the (Power) button, or the (Power) switch may cause loss of unsaved data.

- The touch pad may be disabled. [Details]
Why can’t I use the touch pad?

- The touch pad is disabled.
  - Press the **Fn+F1** keys to enable the touch pad. [Details]
  - Alternatively, start **VAIO Control Center** [Details], then enable the touch pad.
- If a mouse is connected to your VAIO computer, disconnect it.
What should I do if a message appears indicating that the battery pack is incompatible or has been incorrectly installed, after which my VAIO computer enters Hibernate mode?

- A battery error may have occurred. Push and hold the battery off button on the bottom of your VAIO computer for about three seconds with a thin, straight object (such as a paper clip). [Details]
- This problem could be due to the battery pack not being installed properly. To solve this problem, turn off your VAIO computer, remove the battery pack, and then reinstall it. [Details]
- If the problem persists, it is likely that the installed battery pack is not compatible with your VAIO computer or has failed. Turn off the computer, remove the battery pack, and then replace it with a new one specified by Sony.
Why can’t I fully charge my battery pack?

- The battery care function is enabled. Start VAIO Control Center [Details] and change the settings in the Power and Battery window.

- If ambient temperature is outside the specified range or the power consumption of your VAIO computer is high when you charge the battery pack, the charge current may be reduced.
What should I do if captured images contain dropped frames and audio interruptions?

- The effect settings on your app may cause dropped frames. Refer to the help file included with the app for more information.

- There may be more app running than your VAIO computer can handle. Exit the apps that you are not currently using.

- This problem may occur while your VAIO computer is running on the power saving plan, which reduces the CPU performance. Check the current power plan. [Details]
What should I do if captured images flicker?

- This problem occurs when you use the built-in camera under fluorescent lights and is due to a mismatch between the lighting output frequency and the shutter speed. To reduce flicker noise, change the direction of your VAIO computer so that you can adjust the direction of the built-in camera. Some apps offer adjustable parameters, such as brightness or power frequencies, to eliminate flicker noise.
Why are captured images poor in quality?

- Images captured under fluorescent light may contain light reflections.
- A dark portion in captured images may contain noise.
- The area on and around the built-in camera is soiled. Clean the area. [Details]
Why does the viewfinder show no images or poor-quality images?

- Some camera apps may not work correctly when another camera app is running. Exit the current app before starting another.
- You may not be able to use another camera app that uses the built-in camera while using the gesture function.
- The viewfinder may show some noise, for example horizontal streaks, when you are viewing a rapid-moving object. This is normal and does not indicate a malfunction.
- If the problem persists, restart your VAIO computer.
Why is the video input from the built-in camera suspended momentarily?

- The video input may be suspended momentarily if:
  - A shortcut key with the Fn key is used.
  - The CPU load increases.
How do I change the LCD brightness?

- Press the **Fn+F5** or **Fn+F6** keys to adjust the LCD brightness of your VAIO computer.
  
- To adjust the LCD brightness of the connected external display, such as a computer display or a TV, use the brightness control on the external display.
What should I do if my computer screen goes blank?

- Make sure your VAIO computer is on and not in a power saving mode. [Details]
- Make sure your VAIO computer is securely plugged into an AC outlet [Details] and the power indicator light is on.
- The computer screen may be off.
  Press any key on the keyboard.
- The display output may be set to an external display.
  Press the Fn+F7 keys several times to select your desired display output, and then press the Enter key. [Details]
- If your VAIO computer is running on battery power, make sure the battery pack is installed properly and is charged. [Details]
- If you wait for a while and the computer screen remains blank, follow the procedures below:
  - Press and hold down the (Power) button for more than four seconds, check if the power indicator light is off, and then turn on your VAIO computer.
  - If the problem persists, press and hold down the (Power) button for more than four seconds and check if the power indicator light is off. Disconnect all cables and peripheral devices, such as the power cord and the USB device, remove the battery pack, and wait about five minutes. Then, put them back in place and turn on your VAIO computer again.
What should I do if no image is displayed on my external display or TV screen?

- Press the \texttt{Fn+F7} keys several times to select your desired display output, and then press the \texttt{Enter} key. [Details]
What should I do if some items do not fit on the computer screen?

- Check that the text size is set to 100%. If not, some items, for example an app menu, may not be displayed correctly, depending on the apps you are using. Refer to Windows Help and Support for more information on how to change the text size. [Details]
What should I do if videos are not displayed on the computer screen?

- Your VAIO computer may not have sufficient video memory to display high resolution videos. In such a case, lower the resolution of the LCD screen. [Details]

- If you have selected to use an external display using the \texttt{Fn+F7} keys and the external display is disconnected from your VAIO computer, the computer screen may be unable to display the video. In such a case, stop video playback, press the \texttt{Fn+F7} keys to select the computer screen as the display output, and then press the \texttt{Enter} key. Then, restart video playback.
What should I do if videos are not displayed smoothly?

- It is recommended you disable your screen saver. If the screen saver is enabled, it may be activated during DVD playback and prevent the playback from running successfully.
- If you have set the display output to both the computer screen and an external display, change the display output to either of them.
- Some videos may not be displayed smoothly depending on the type or bit rate of videos. Lowering the screen resolution may improve video playback performance. [Details]
- If data access to a memory card is in progress (the media access indicator light is on), wait until the data access ends and then start playback again.
- If you are playing a video stored on the memory card, copy it to the built-in storage device and then play the copied video.
Why do sound interruptions and/or dropped frames occur when I play high-definition videos, such as those recorded with the AVCHD digital video camcorder?

- Playing high-definition videos requires substantial hardware resources, such as CPU, GPU, or system memory performance on your VAIO computer. During the video playback, some operations and/or functions may become unavailable, and sound interruptions, dropped frames, and playback failure may occur depending on the configuration of the computer.
What should I do if I cannot enter certain characters with my keyboard?

- Check if the Num lock indicator light is on or off.
  When the indicator light is on, you can enter the numbers printed on the keys.
  When the indicator light is off, you can enter the letters and symbols printed on the keys.
  Press the Num Lk key, or Fn+Num Lk keys, to turn the Num Lock indicator light on or off. [Details]

- Check if the Caps Lock indicator light is on or off.
  When the indicator light is on, characters typed will appear in uppercase (or lowercase if you also hold down the Shift key).
  When the indicator light is off, characters typed will appear in lowercase (or uppercase if you also hold down the Shift key).
  Press the Shift+Caps Lock keys to turn the Caps Lock indicator light on or off. [Details]
What should I do if my keyboard configuration is wrong?

- The language layout of your keyboard is labeled on the packaging box. If you choose a different regional keyboard when you complete the Windows setup, the key configuration will be mismatched. To change the keyboard configuration, refer to Windows Help and Support.
Why can’t I write data to a memory card?

- Some types of memory cards are equipped with an erasure prevention switch to protect data from unintentional erasure or overwriting. Make sure the erasure prevention switch is off.
What should I do if I forget the Windows password?

- The Windows password is case-sensitive. Check your password and enter again.
- Log on using a user account that has system administrator privileges to reset your password.
  - If you forget all passwords for system administrator accounts, you cannot reset any Windows passwords. You need to perform system recovery. [Details]
What should I do if the Enter Onetime Password message appears and Windows does not start after I enter a wrong power-on password three times consecutively?

- Press and hold down the (Power) button for more than four seconds and check if the power indicator light is off. Then, restart your VAIO computer and enter the correct password. The password is case-sensitive, so be sure to check letters for the current case before you enter the password.
- If you forget the power-on password, you cannot start your VAIO computer. [Details]
What should I do if my game software does not work or it keeps crashing?

- Check the website of the game if there are any patches or updates to download.
- Make sure you have installed the latest video driver software.
- On some VAIO computer models, the graphics memory is shared with the system. The optimal graphics performance in such a case is not guaranteed.
What should I do if I cannot charge the device connected to the USB port that supports USB charging?

- Make sure that the USB Charging setting is enabled. [Details]

What should I do if I cannot print a document?

- Make sure the printer settings are correctly configured. For information on the printer settings, refer to the manual that came with your printer.
- Make sure your printer is on. Refer to the manual that came with your printer for more information.
- Make sure the connections between the printer’s power cord and AC adapter and between the AC adapter and an AC outlet are securely made.
- Make sure the appropriate printer driver is installed. When you connect a new printer, you first need to set up the printer driver. For information on how to set up the printer driver, refer to the manual that came with your printer, or visit the website of the manufacturer.
- Make sure the status of your printer is displayed as online or ready. Then, make sure the printer settings are correctly configured as instructed in the manual that came with the printer.
- Make sure your printer is set to Set as Default Printer. Refer to Windows Help and Support for more information. [Details]
- Make sure your printer is compatible with Windows installed on your VAIO computer.
- Make sure your printer is connected to your network (LAN).
  - If the printer is directly connected to the network (LAN), make sure a router or a hub is on.
  - If the printer is connected to a printer server, make sure an error message is not displayed on the printer server.
- Make sure your app is working properly.
  - The app may not support your document format. In such a case, your document will not be printed properly.
  - Contact the app publisher or the manufacturer of your printer.
- Make sure the correct printer port for your printer is selected.
  - For more information on the printer port settings, refer to the manual that came with the printer, or contact the manufacturer.
What should I do if my VAIO computer does not recognize the USB device?

- Check if the USB device is on and using its own power supply.
  - If you are using a digital camera, check if the battery is charged.
  - If you are using a printer, check if the power cable is connected properly to an AC outlet.
- You may need to install a USB driver for the USB device before connecting the device. Refer to the manual that came with the USB device for more information.
- Try using another USB port on your VAIO computer. The USB driver could be installed to the specific port you used the first time you connected the device.
- USB hubs may prevent the USB device from working because of a power distribution failure. We recommend you connect the device directly to your VAIO computer without a hub.
How can I reinstall the original apps and drivers?

- You can restore the preinstalled apps and drivers using VAIO Care. To restore them, start VAIO Care [Details] and then select Advanced Tools, Restore and recovery, and Reinstall Applications and Drivers.
  
  Refer to the help file included with VAIO Care for more information.
How can I restore my VAIO computer system to its factory default settings?

- There are two ways to recover your VAIO computer system: from Recovery Media [Details] and from the recovery area [Details].
How do I create Recovery Media?

- You can create Recovery Media using VAIO Care. [Details]

© 2013 Sony Corporation
What should I do if I cannot create Recovery Media?

- Try the suggestions below:
  - Download and install the latest updates using VAIO Update. [Details]
  - Restart your VAIO computer. And then, try to create Recovery Media again.
  - If an AC adapter is supplied with an external optical disc drive, plug the AC adapter into a power source.
- Try other reliable media.
- If the problem persists, visit the VAIO online support website for further assistance.
What should I do if I cannot recover my VAIO computer from the recovery area?

- Recover your VAIO computer from Recovery Media if you have used apps to modify the recovery area, installed a different operating system from the preinstalled one, or formatted the built-in storage device without using VAIO Care (Rescue Mode) : Recover or maintain your system.

- If the problem persists, visit the VAIO online support website for further assistance.
What should I do if I cannot start/complete the recovery process?

- Disconnect all unnecessary external devices from your VAIO computer.

- Try the suggestions below:
  - Check the condition of Recovery Media. If you are using optical discs, check the discs for dirt or damage. If the discs are not clean, clean them and try recovering your VAIO computer again.
  - If you cannot recover your VAIO computer from the recovery area, restart the computer and recover the computer from the recovery area again, or use Recovery Media.
  - If you cannot recover your VAIO computer using a USB optical drive or USB flash drive, connect the drive to another USB port or to the USB port that is compliant with the USB 2.0 standard (if any). Then, turn off the computer and try recovering it again.

- If the problem persists, visit the VAIO online support website for further assistance.
What should I do if my VAIO computer becomes unstable (Windows does not start)?

- Try the suggestions below:
  - Restore computer system files. [Details]
    Use the restore point that you created before your VAIO computer becomes unstable.
  - Restore your VAIO computer from a system image backup if you have created the backup. Refer to Windows Help and Support for more information. [Details]
    Any file you have created or changed after you created the system image backup will not be restored.
    You need to back up such a file with VAIO Care (Rescue Mode) : Recover or maintain your system. [Details]
  - Use VAIO Hardware Diagnostics to identify problems on your VAIO computer.
    With the app, you can check if the computer hardware (a CPU, a memory module, and a built-in storage device) needs to be replaced.
    To start VAIO Hardware Diagnostics, select Tools and VAIO Hardware Diagnostics in VAIO Care (Rescue Mode) : Recover or maintain your system.
  - Follow the instructions in Recovering from the Recovery Area to recover your VAIO computer. [Details]
    If you have not backed up your data, be sure to make a backup copy of your valuable data using VAIO Care (Rescue Mode) : Recover or maintain your system before recovering your VAIO computer. [Details]
    If you have a backup created with the Windows backup feature before your VAIO computer becomes unstable, but you have created or changed the file after that, back up such a file with VAIO Care (Rescue Mode) : Recover or maintain your system.

Note
- Recovering your VAIO computer will delete all the data on the built-in storage device.
What should I do if my VAIO computer becomes unstable (Windows starts)?

- Try the suggestions below:
  - Start VAIO Care to search for a solution. [Details]
  - Restore computer system files. [Details]
    - Use the restore point that you created before your VAIO computer becomes unstable.
  - Uninstall an app or a driver if your VAIO computer has become unstable after you installed the app or the driver.
  - Reinstall the preinstalled apps or drivers on your VAIO computer if such apps or drivers have not been working properly. [Details]
  - Restore your VAIO computer from a system image backup if you have created the backup. Refer to Windows Help and Support for more information. [Details]

- If the problem persists, follow the instructions in Refreshing Your VAIO Computer to reinstall the operating system. [Details]
  - If the problem persists after you refresh your VAIO computer, follow the instructions in Recovering from the Recovery Area to recover the computer. [Details]
  - The computer may not support the refresh function depending on the model you purchased.
  - If you have not yet created Recovery Media, create the Recovery Media. [Details]
  - Be sure to make a backup copy of your valuable data before recovering your VAIO computer. Refer to Windows Help and Support for more information. [Details]

**Note**
- Recovering your VAIO computer will delete all the data on the built-in storage device.
