**PLUS: 2X max. DVD-ROM Drive with  
DVD Movie Playback Capability**

**The 3MAX™ Notebook System gives you the  
capacity, power, and portability you need.**

### **MAX Screen**

The 13.3" MAX Screen gives you an extra large, full-color XGA active matrix LCD display. Plus, compared to the average SVGA display, Sony XGA displays show up to 62% more data per page at a very legible resolution (1024 x 768). This means no more squinting for you. And no more headaches.

### **MAX Battery**

With MAX Battery you can use two batteries at once when you insert the second optional battery in the versatile drive bay. Go 2X as long before you need an AC outlet and be 2X as productive on business trips. This dual-battery feature is only brought to you by Sony.

### **MAX Mobility**

Why carry a heavy, bulky "portable" computer? At less than 6 lbs and 1.75" thin, the MAX Mobility lightens your load and helps you breeze through crowded situations.
