SPPG: \$499.95
Model: VGF-AP1L
FCS: Late September

VAIO Pocket Detail Information

Cradle Detail Information

The Music Plays On

The VAIO Pocket players rechargeable battery provides up to **20 hours³** of continuous music playback. And with a **40GB¹** hard drive, you have plenty of room to store your favorite **music, digital pictures and album art.**

See It All in Living Color

Escape from the two-tone world of black-and-white screens and experience the VAIO Pocket™ player's **vibrant LCD color display**. Get creative and make a slide show of your digital photos with a custom soundtrack playing in the background.

Audio Files for Audiophiles

The VAIO Pocket™ digital music player lets you store and play high-quality ATRAC3™ and ATRAC3plus™ files and also supports popular Internet audio formats such as MP3⁶, WMA⁶, and WAV⁶. Keep the music playing with custom song lists you create while you're on the go, or let the player's intuitive memory create song lists for you.

It's Easy To Get Around

The **Grid Sense™ touchpad** provides smooth navigation similar to the touchpad on a laptop. Menu items are easy to see and select with the player's clear, color LCD. You can search for songs in a variety of ways, including by artist, song title, album title, or how often you listen to them.

Convenient Song Selection

The in-line remote control with 3 line back lid LCD lets you select music tracks and view song information when the player is out of reach – like on your belt loop or in your backpack.

Beyond The Music

Let your multimedia creativity flow by making a photo slide show synchronized to your favorite music. The VAIO Pocket™ player can also be used as an external hard drive to backup and transfer files from your PC. No additional software drivers are required – just place the VAIO Pocket player in its versatile cradle to recharge the battery or connect to a personal computer, external speakers, or compatible digital camera directly.

1. GB means one billion bytes when referring to hard drive capacity. Some portion of hard drive capacity is reserved for application/data management functions.
 2. Based on a 4 minute average song length using ATRAC3™ format @ 48kbps.
 3. Up to 20 hours continuous playback with built-in Lithium-Ion rechargeable battery fully charged when playing in ATRAC3plus™ file format @ 48Kbps. Actual battery life may vary based on usage patterns.
 4. Not all products with USB 2.0 connectors may communicate with each other due to chipset variations.
 5. Compatible with USB mass-storage-class digital cameras. Only tested with Sony Cyber-shot® cameras
 - 6 Supports unsecure files with conversion to ATRAC3™ format.
- Features and specifications are subject to change without notice. Non-metric weights and measures are approximate
