		SDMS series	32/64/128MB, (*4)256MB
		SDMSH series (Duo)(*6)	32/64/128MB (*7)

*1:The computer and the operating system must be guaranteed by their manufacturers to support USB interface. Please contact respective manufacturers for details.

*2:Users with Windows 98 or 98 Second Edition will need to install the driver software on the included CD-ROM into their computers.

*3:The correct date and time of image file may not be displayed with Mac OS X. However, date and time of recording is stored in the Exif tag attached to the image file and can be displayed with Exif compatible software.

*Under Mac OS X v10.0.4, a camera can be recognized, however, image files in the camera cannot be operated directly via USB connection. We recommend to use Mac OS X v10.1 or more-upgraded version.

*4:SONY MSA-128S2, MSH-128S2 and SanDisk SDMS-256 is equipped with Memory Select Function(TM), which incorporates multiple 128MB memory units on a single card.

*5:This model is compatible with Magic Gate(TM) series Memory Sticks, however, it does not support Magic Gate(TM) function.

*6:This model has been tested using Memory Stick Duo Adapter which is included with Memory Stick Duo.

*7:

Please update the firmware of the camera. The firmware ver. 3.38A is compatible with Memory Stick PRO series. Also the following recording media has been tested with this ver. 3.38A.

Sony MSH series Memory Stick (MSH-32/64/128/128S2)

Sony MSH series Memory Stick Duo (MSH-M32A/M64A/M128A)

SanDisk SDMSH series Memory Stick Duo (SDMSH-32/64/128)
