# WARNING

To prevent fire or shock hazard, do not expose the television to rain or moisture.

This symbol is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**CAUTION:**

TO PREVENT ELECTRIC SHOCK, DO NOT USE THIS POLARIZED AC PLUG WITH AN EXTENSION CORD, RECEPTACLE, OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

**Note to CATV system installer**

This reminder is provided to call the CATV system installer’s attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

Use of this television receiver for other than private viewing of programs broadcast on UHF or VHF or transmitted by cable companies for the use of the general public may require authorization from the broadcaster/cable company and/or program owner.

# Precautions

**Safety**

- Operate the TV only on 120 V AC.
- One blade of the plug is wider than the other for safety purposes and will fit into the power outlet only one way. If you are unable to insert the plug fully into the outlet, contact your dealer.
- Should any liquid or solid object fall into the cabinet, unplug the TV and have it checked by qualified personnel before operating it any further.
- Unplug the TV from the wall outlet if you are not going to use it for several days or more. To disconnect the cord, pull it out by the plug. Never pull the cord itself.

**Installing**

- To prevent internal heat build-up, do not block the ventilation openings.
- Do not install the TV in a hot or humid place, nor in a place subject to excessive dust or mechanical vibration.

**Cleaning**

Clean the TV with a soft dry cloth. Never use strong solvents such as thinner or benzene which might damage the finish of the cabinet.

**Repacking**

Keep the original carton and packing materials to use for safe transport of your TV in the future.

If you have any questions or problems concerning your TV, please contact your nearest Sony dealer.

For details concerning safety precautions, see the supplied leaflet “IMPORTANT SAFEGUARDS.”

**CAUTION:**

When using TV games, computers, and similar products with your TV, keep the brightness and contrast functions at low settings. If a fixed (non-moving) pattern is left on the screen for long periods of time at a high brightness or contrast setting, the image can be permanently imprinted onto the screen. These types of imprints are not covered by your warranty because they are the result of misuse.

This television receiver provides display of television closed captioning in accordance with § 15.119 of the FCC rules.

# Introducing the Sony Trinitron® Color TV

## About the manual

This manual covers 13 different models. The menu displays are based on model KV-32TS36, one of the models with the most functions, and the Remote Commander illustrations are based on RM-Y118. If a particular function

does not apply to your model, this will be noted in the manual.  
We highly recommend that you read this manual before using your TV. Keep the manual handy for future reference.

## Features

With the following features, you can:

- Receive up to 125 cable channels for a total of 181 possible off-air cable channels with the **multi-band VHF/UHF/CATV tuner**.
- Receive the picture and sound of your VCR through the **VIDEO IN jacks**.
- Receive superior VCR playback pictures when you connect a VCR equipped with an S video output jack to the **S VIDEO IN jack**.
- Watch your portable camera images (8mm, video, etc.) by connecting to the **VIDEO IN jacks** on the front panel.
- Receive stereo programs and Second Audio Program (SAP) broadcasts with the built-in **Multichannel TV Sound (MTS) decoder**.
- Receive TV or video sound through an audio system by connecting to the **VARIABLE/FIX AUDIO OUT jacks**.
- Simulate the sound quality of a concert hall or movie theater with the **SURROUND system**.
- Watch another TV channel, video or cable image as a window picture by using **Picture-in-Picture**.

- Automatically preset all receivable channels with **AUTO PROGRAM**.
- Watch the closed caption and the text by using **Closed Caption**.

With the supplied Remote Commander, you can:

- Operate the TV, plus Sony and most other maker's video equipment or Sony multi-disc player with the **Pre-Programmed feature**.
- Switch quickly between two channels by using **JUMP**.
- Set the TV to automatically shut off after desired time (30, 60, 90 minutes can be set) using the **SLEEP** timer.
- Set the internal clock to display the **CURRENT TIME** on-screen.

And enjoy other features giving you a high quality picture...

- **Colorpure Filter™** produces fine picture detail without color spill or color noise.
- The **New Dynamic Picture™ system** adjusts picture contrast automatically to produce more detail in both bright and dark areas of every scene.

# Connecting TV Antenna/Cable

Although you can use either an indoor or outdoor antenna with the TV, an outdoor antenna will provide you with better picture quality. You can receive cable TV by connecting a cable supplied by your local cable company.

## Connecting VHF, UHF or VHF/UHF Combination Antenna\*, or CATV Cable

### 75-ohm coaxial cable (round)

- 1 Check your antenna cable type and prepare the end of the cable using the F-type connector.

Attach an F-type connector (not supplied).

- 2 Plug the connector into the VHF/UHF terminal at the rear of the TV.

\* Most combination antennas are equipped with a signal splitter. Remove the splitter and attach the appropriate connector.

### 300-ohm twin-lead cable (flat)

- 1 Check your antenna cable type and prepare the end of the cable using the 300-ohm twin-lead cable.

Attach an antenna connector (not supplied).

- 2 Plug the connector into the VHF/UHF terminal at the rear of the TV.

For better picture quality, connect optional antenna cable so that the 300-ohm twin-lead cable can be separated a distance from the TV.

Connecting both VHF and UHF antennas

Use an EAC-66 U/V mixer (not supplied).

- 1 Prepare the VHF antenna cable using the appropriate connector (p.12).
- 2 Connect the cable to the U/V mixer.
- 3 Connect the U/V mixer to the VHF/UHF terminal.

When you use the U/V mixer

Snow and noise may appear in the picture when viewing cable TV channels over 37 (W+1).

Connecting both VHF/UHF antennas and a CATV cable (KV-32TS46 only)

Note

Do not connect anything to the TO CONVERTER terminal in this case.

Connecting a cable with a pay cable TV system converter/decoder\* (KV-32TS46 only)

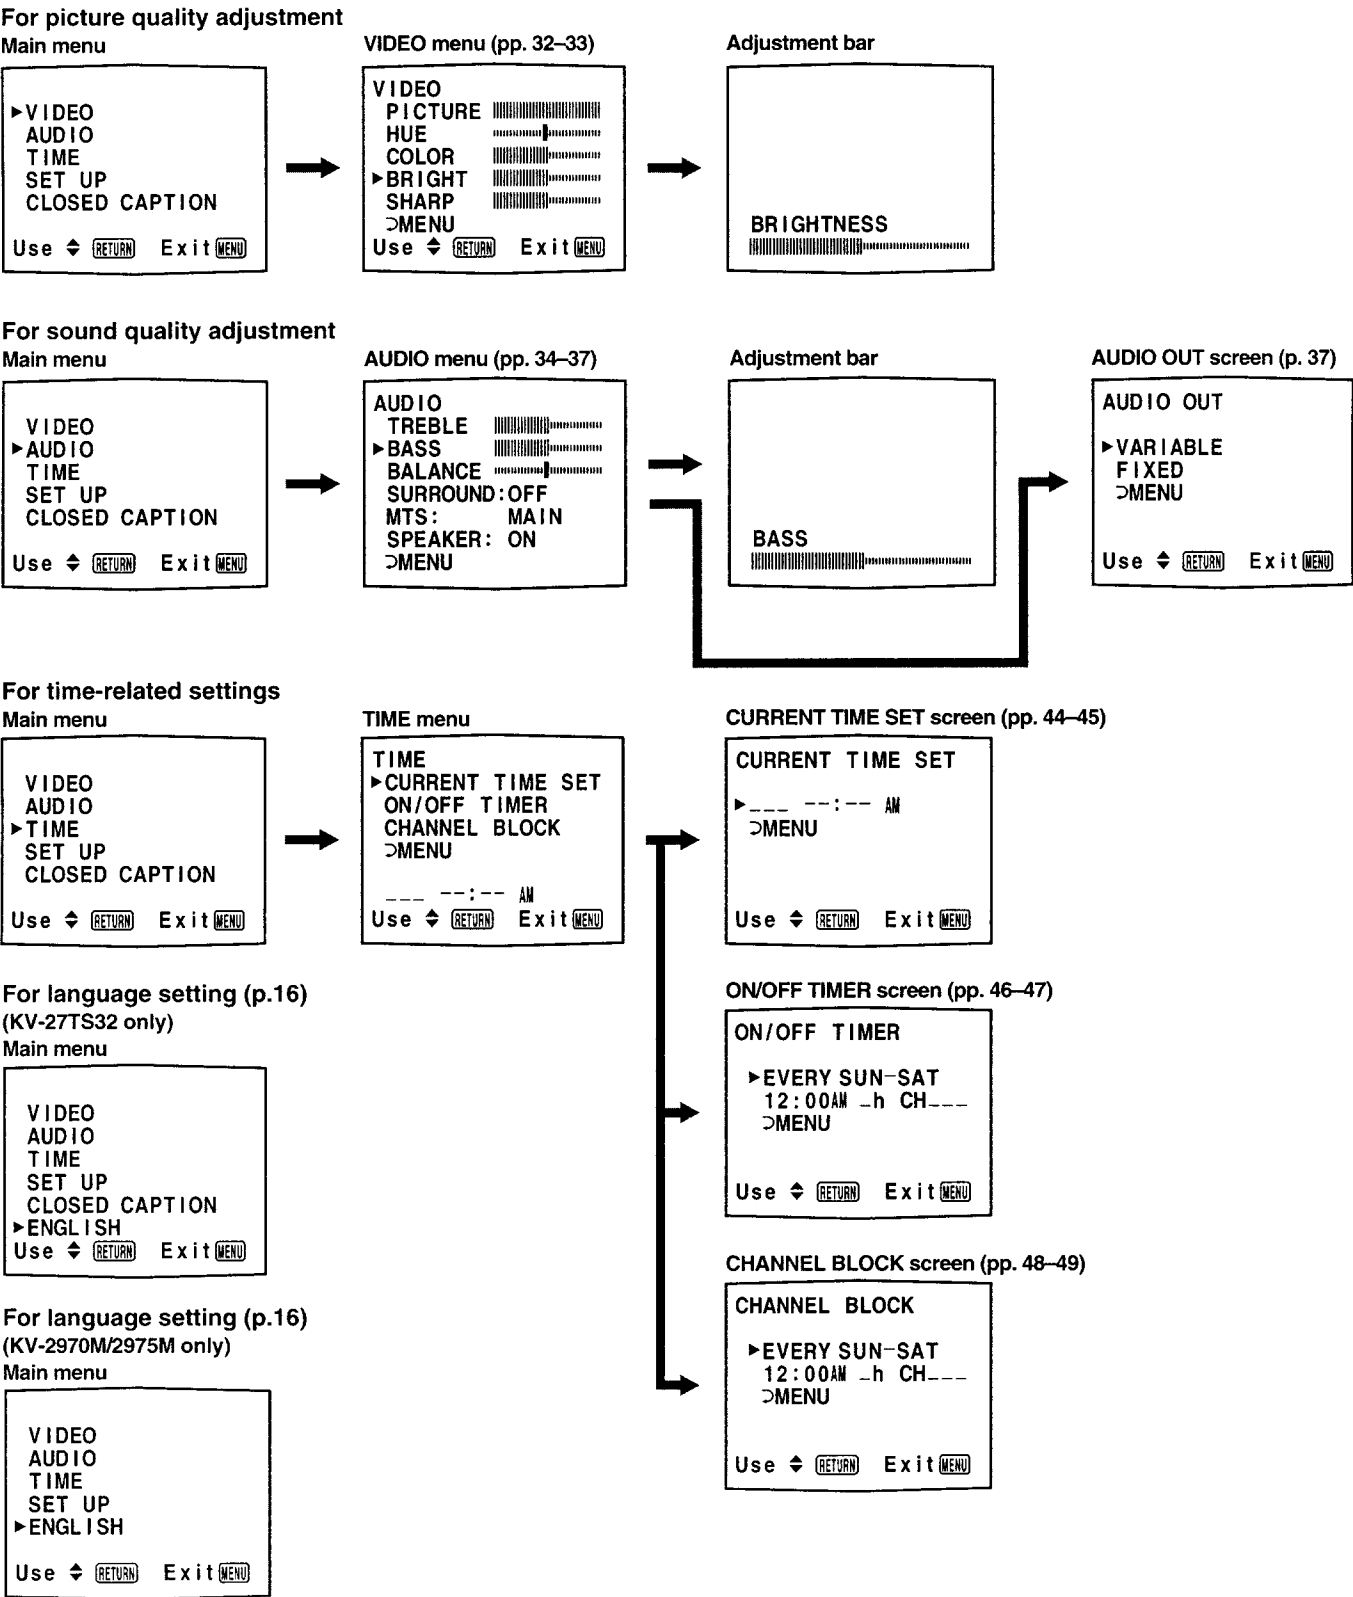

Pay cable TV systems use scrambled or encoded signals require special converters (decoders) in addition to the normal cable connection.

\* The special converter/decoder will be supplied by the cable company.

For example, to add channel 25, press 2, 5 and ENTER.

Press RETURN.  
A “+” sign appears in front of the channel number display, indicating that the channel is added to the channel scan memory.

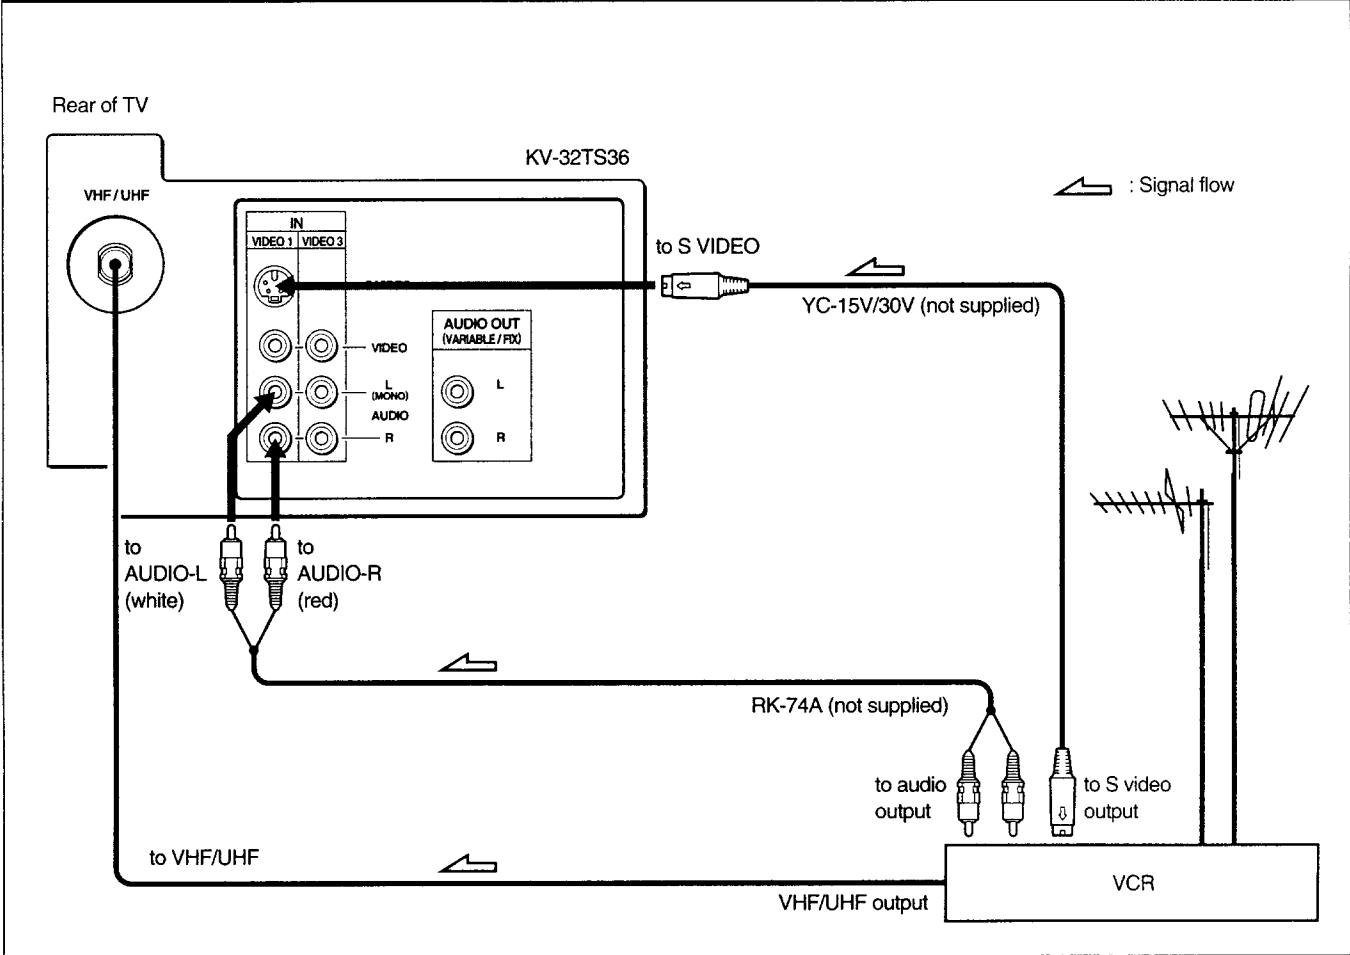

To add other channels  
Repeat step 5.

# Connecting Other Equipment

## Video Equipment

- After connecting, you will be able to...
- Play back video tapes
  - Watch two TV programs at once using a window picture (Picture-in-Picture, pp. 38-43)

### Connecting a VCR with an S video output jack (except for KV-27TS29)

#### Notes

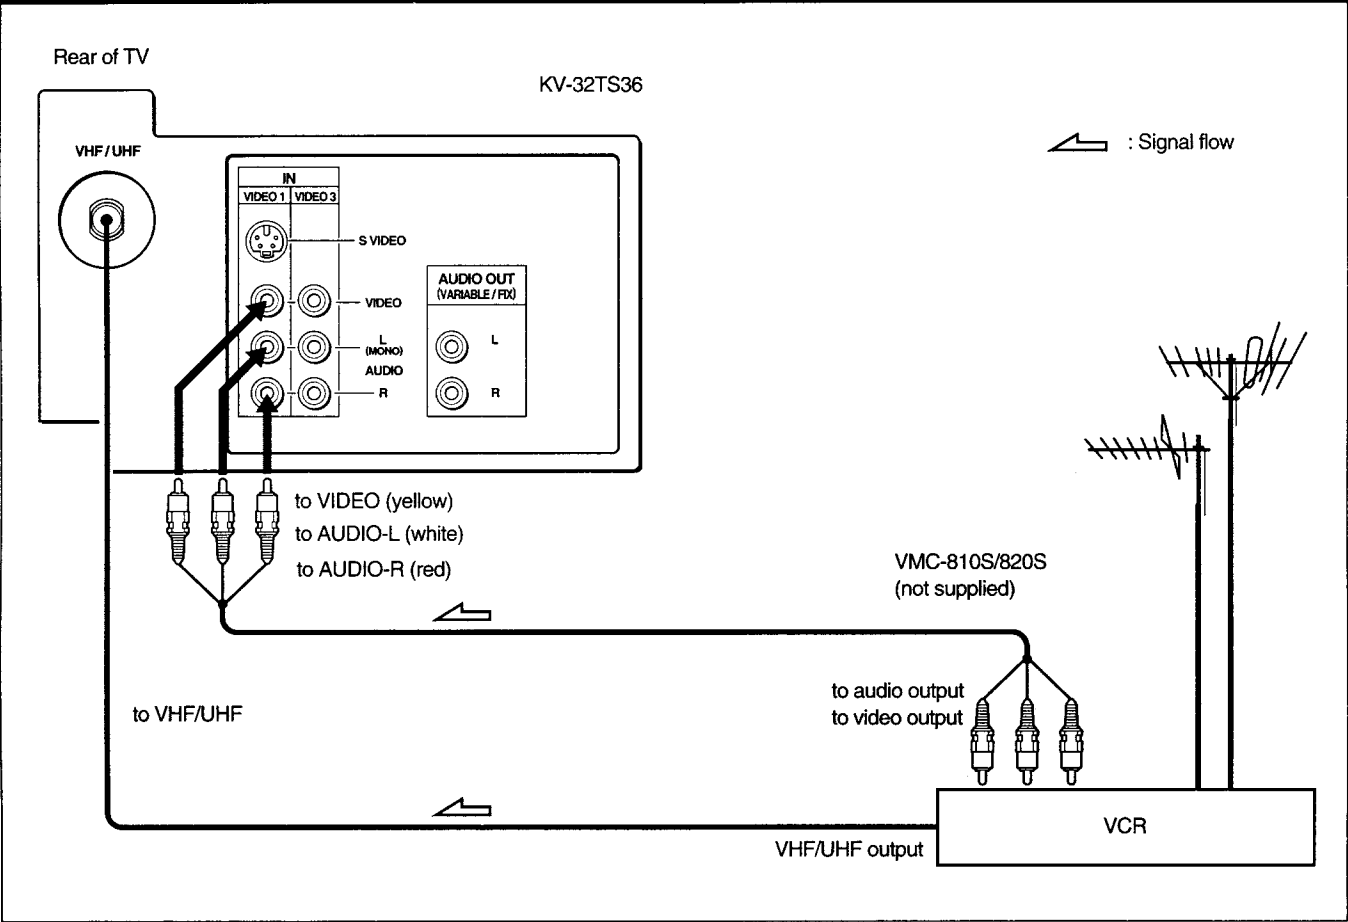

- If you connect a monaural VCR, connect the audio output of the VCR to the L (MONO) jack of VIDEO 1 IN on the TV. The monaural sound will be heard from both speakers.
- For operating instructions, refer to the instruction manual furnished with the VCR.
- If the picture or sound is affected, move the VCR away from the TV.
- If S VIDEO is set to OFF, you cannot watch VCR playback pictures from the S VIDEO IN. To set S VIDEO to ON, see "Watching a Video with Your S Video-Equipped VCR", p.28.

#### About S video input

Video input and output signals can be separated into Y (luminance or brightness) and C (chroma or color) signals. Usually these two signals are combined in a VCR and sent as one signal to a TV. Separation of the Y and C signals prevents them from interfering with one another, thereby improving picture (especially color) quality. This TV is equipped with an S video input jack through which these separated signals can be input directly. This way you can connect your S video-equipped VCR separately from a non-S video VCR.

Connecting video equipment not equipped with an S video output jack

Connecting Other Equipment

Preparing for use

- 1 Turn on the TV.
- 2 Press the TV/VIDEO button on the TV or on the Remote Commander so that VIDEO appears on the screen.

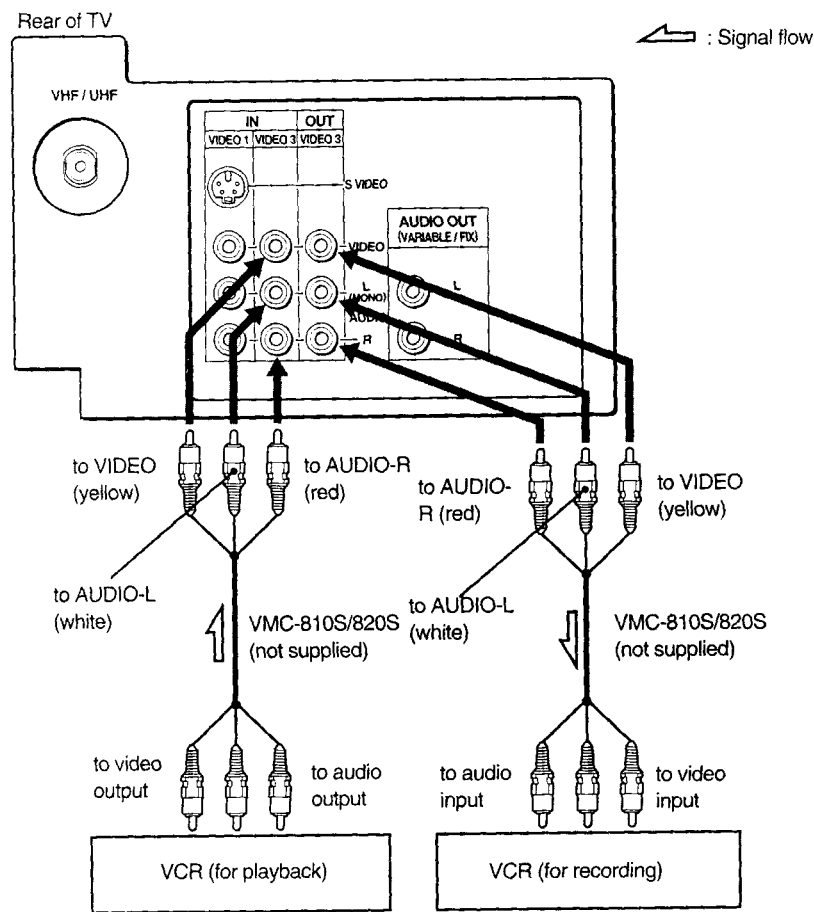

**When you cannot obtain a clear picture and/or sound**  
Make sure that the TV/VTR on the VCR is set to TV.  
Reselect the channel you want to view with the controls on the TV or the Remote Commander.

Operating your equipment (except for KV-27TS29/2970M)

When using a Sony VCR, Multi-disc player or other manufacture's infrared remote control VCR, you can operate most of the equipments by using the supplied pre-programmed Remote Commander (p. 55).

**To return to TV mode**  
Press the TV or TV/VIDEO button so that a channel number appears on the screen.

Connecting two VCRs for tape editing (KV-27TS32 only)

Watching a different image while duplicating

You can duplicate your recorded tapes by connecting two VCRs. The VIDEO 3 OUT jacks only output the signal from the VIDEO 3 IN jacks. Connect a VCR for playback to VIDEO 3 IN jacks, and a VCR for recording to the VIDEO 3 OUT jacks. You can watch a TV program or images from VIDEO 1 IN or VIDEO 2 IN during duplicating.

To watch a different input image

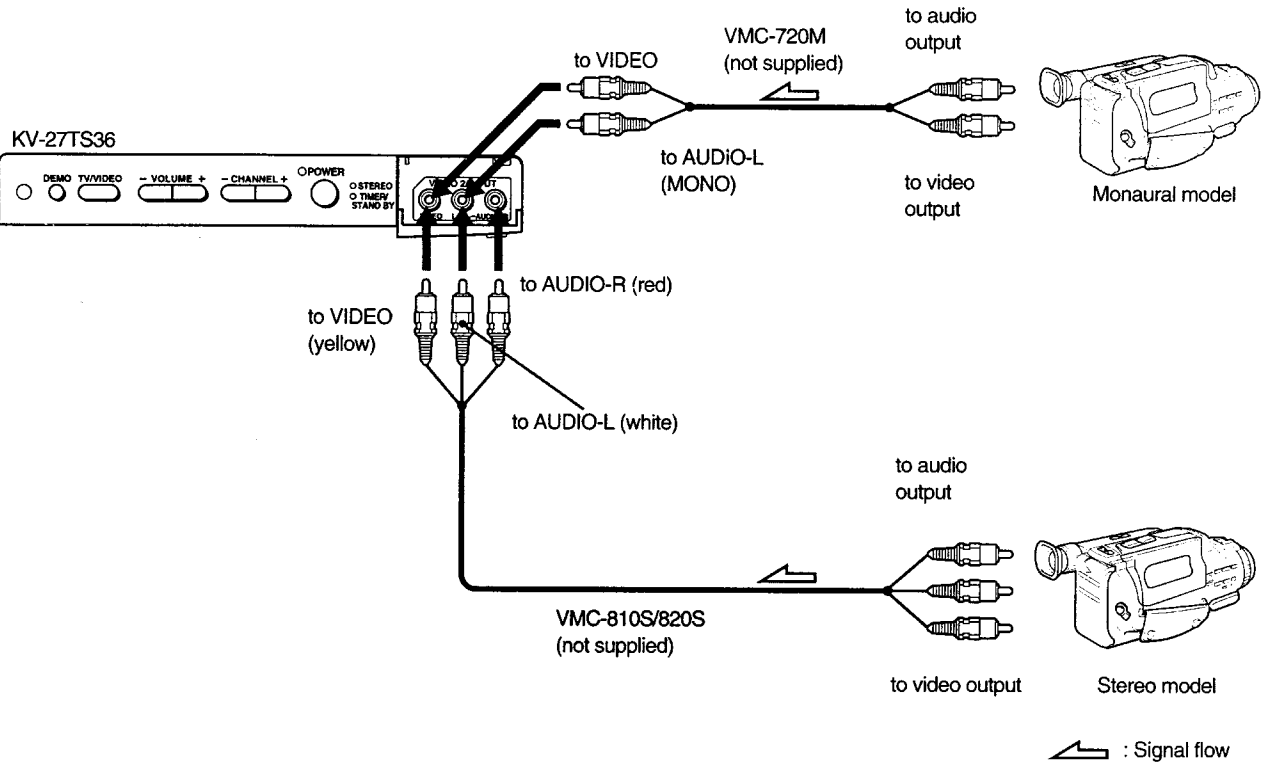

Press TV/VIDEO on the TV or on the Remote Commander to select the input image you want to watch.

Connecting camcorders (except for KV-27TS29/2970M)

Playing back recorded tapes

Connecting Other Equipment

Audio System

Listening to TV or connected VCR sound through an audio system

Preparing for use

Display the mode set menu and set **SPEAKER** to **OFF** to cut off the TV speaker sound (p. 37), and listen to the TV's sound solely through the audio system speakers.

Note

By setting **AUDIO OUT** variable, you can adjust the bass, treble and balance, or select surround or an MTS (Multichannel TV Sound) mode, using the on-screen menus (pp. 34–36).

Connecting active super woofer (supplied with KV-32TS46 only)

Preparing for use

To enjoy the active super woofer sound, make sure the connections are made as illustrated on the next page.

The woofer volume varies according to the TV volume. Adjust the woofer level control properly.

The active super woofer outputs the signal input to its **AUDIO IN** jacks. If you connect an audio system to the active super woofer's **AUDIO OUT** jacks, you can enjoy the sound from the audio system and the active super woofer simultaneously.

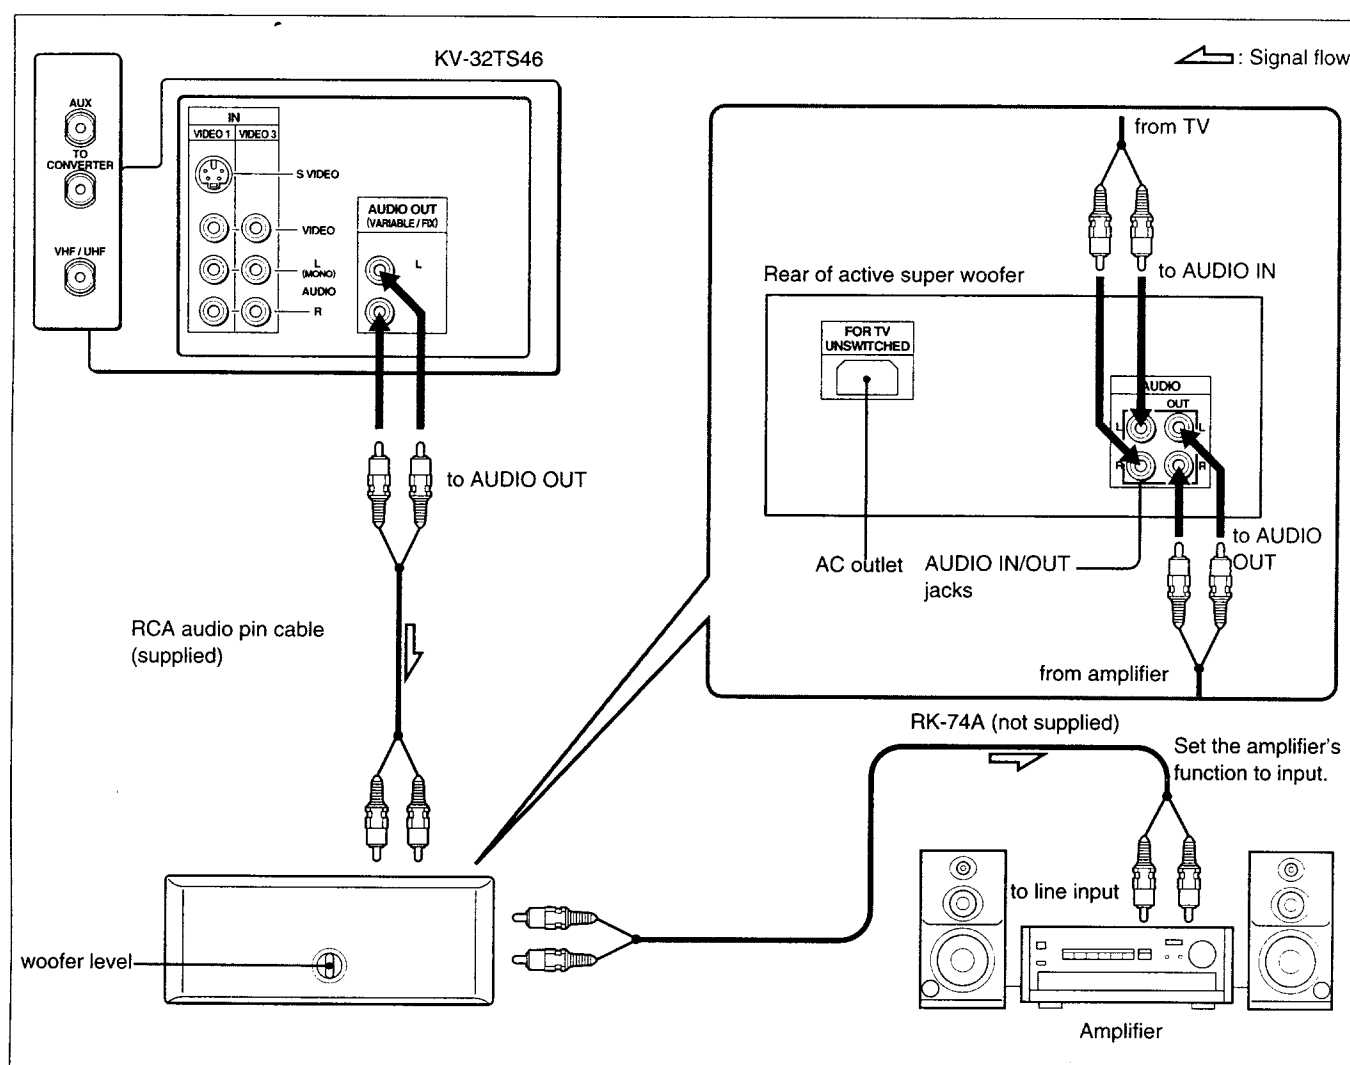

To make the active super woofer stable, attach the felt feet (supplied) to the bottom.

Notes

- Do not place the woofer on the TV set. To enjoy good sound, place the woofer on a hard object near the TV avoiding soft objects like carpets, sofas, etc.
- If you do not use the TV for more than 20 seconds, the active super woofer is turned off automatically to save on power consumption.
- When you release **MUTING**, the sound of the woofer is heard before that of the TV. This is normal.
- If you set **SPEAKER** to **OFF** in the **AUDIO** menu and select **FIX** in the **AUDIO OUT** menu (p.37), the volume of the woofer may be excessive. We recommend that you set **SPEAKER** to **ON** when you use the active super woofer.
- You should only connect the KV-32TS46 to the AC outlet on the active super woofer.

**Active Super Woofer Specification**  
Input: 500 mVrms (100% modulation)  
Output: 500 mVrms (100% modulation)  
Impedance: 20 kilohms  
Speaker output: 9 W (100 Hz)  
Dimensions: 435 × 165 × 164 mm (W × H × D)  
(17 1/4 × 6 1/2 × 6 1/2 in.)  
Mass: 3.9 kg  
(8 lbs 10 oz)

When you place the active super woofer on a TV stand (not supplied), remove the rear panel of the stand.

# Using Closed Caption

RM-Y118

The Closed Caption system checks for errors before captions or text appear. If an error is found, the mistake does not appear; a white box appears instead. In most cases, this allows you to read the caption without difficulty. Of course, not all errors can be found, and in some cases mistakes may appear. Poor reception of any TV station can cause poor reception of the Closed Caption signal causing errors or missing captions.

- 1 Press MENU.  
The main menu appears.

- 2 Press Δ+ or ▽- to select CLOSED CAPTION.  
Then press RETURN.  
The CLOSED CAPTION screen appears.

- 3 Press Δ+ or ▽- to select closed caption mode.

Select CC1 or CC2 to view Captions.  
A Caption is a printed version of the dialogue or sound effects of a program. (The mode should be set to CC1 for most programs.)

Select TEXT1 or TEXT2 to view Text.  
Text is information that is presented using the half to full television screen. It is usually not related to the program.

Select CC/TEXT OFF if you do not want to use the CLOSED CAPTION mode.

Press RETURN.  
The setting is completed.

# Adjusting Picture and Sound Quality

Notes

- If more than one code number is listed for manufacturers other than Sony, try entering them one by one, until you come to the correct code for your equipment.
- If the video equipment does not have a certain function, the corresponding button on this Remote Commander will not operate.
- In some rare cases, you may not be able to operate your non-Sony video equipment with the supplied Remote Commander. This is because your equipment may use a code that is not provided with this Remote Commander. In this case, please use the equipment's own remote control unit.

CAUTION

When you remove the batteries from the Remote Commander, all the settings will revert to the Sony Beta setting. Reset the codes by following the steps on p. 55.

The code numbers for Sony equipment are assigned as follows:

- 01 .....Beta, ED Beta VCR
- 02 .....8 mm VCR
- 03 .....VHS VCR
- 04 .....Video disc player

Operating a Cable Converter Box

Follow these instructions to set the manufacturer's code which will enable you to operate a connected cable converter box with the pre-programmed Remote Commander.

EXAMPLE: Operate a connected Zenith cable converter box.

- 1 Set the CABLEBOX-TV selector to CABLEBOX.

Notes

- If more than one code number is listed, try entering them one by one until you come to the correct code for your equipment.
- If you enter a new code number, the code number you previously entered at that setting is erased.
- In some rare cases, your equipment may use a code that is not provided with this Remote Commander and you may not be able to operate your cable converter box with the supplied Remote Commander. In this case, use the equipment's own remote control unit.

- 2 While pressing CODE SET, press 6 and 8 (Zenith's code number -see chart below) and ENTER.

- 3 Use CABLE POWER and the TV control buttons (0 - 9, ENTER, JUMP and CH +/-) to operate the cable converter box.

To operate the TV

Set the CABLEBOX-TV selector to TV, then use the TV control buttons to control the TV.

For more details on operating the cable box

Refer to the operating instructions that come with the cable box.

 Dotted lines or stripes	This is often caused by local interference. (e.g. cars, neon signs, hairdryers etc.) Adjust the antenna for minimum interference.
 Double images or ghosts	Reflections from nearby mountains or buildings often cause this problem. A highly directional outdoor antenna or a CATV cable may improve the picture.
Try another channel. It could be station trouble.	

If the problem persists, contact your nearest service facility.
