Sony's Cyber-shot® DSC-W180 brings you a variety of intelligent features in a compact, easy-to-use design. Smile Shutter™ technology captures a smile the moment it happens. Face Detection technology automatically detects up to eight faces and optimizes focus and exposure settings.

- **10.1 megapixel Super HAD™ CCD Image Sensor**: A powerful 10.1 megapixel 1/2.3” Super HAD™ CCD image sensor helps you capture gorgeous images with superb contrast and clarity down to the finest detail. With 10.1 megapixels, you can create stunning prints up to A3 size, or crop your images and still come away with high resolution shots.

- **3x Optical Zoom Lens**: 3x optical zoom lens captures sharp images, even from a distance, and enables close-up shooting up to just under 2” (5cm) from the subject.

- **2.7” LCD display (230K pixels)**: A large 2.7” (230K pixels) LCD display features sharp, natural color that makes it easy to compose shots, read menus, and view photos.

- **Colors Available**: Available in silver, black, and red

- **Smile Shutter™**: Smile Shutter™ technology captures a smile the moment it happens. Simply choose the Smile Shutter™ button and the camera does the rest. You can also select subject priority and indicate the degree of Smile Detection Sensitivity.

- **Face Detection Technology**: Face Detection technology detects up to eight individual faces and adjusts flash, focus, and exposure to deliver crisp, properly lit images of family and friends.

- **SteadyShot™ Digital Image Stabilization**: Optical SteadyShot® digital image stabilization compensates for camera shake and helps prevent blur by capturing two photos at high shutter speeds and combining them into a single clear image.³

- **Scene Selection modes**: Choose from seven convenient Scene Selection modes to quickly adjust for specific shooting conditions, including High Sensitivity, Twilight, Twilight Portrait, Landscape, Soft Snap, Snow, and Beach.

- **High Sensitivity Mode (ISO 3200)**: High ISO allows for faster shutter speed, so you can take photos indoors or in low light without the need for a flash. In addition to High Sensitivity Mode (ISO), you can select up to seven ISO settings (Auto, 100, 200, 400, 800, 1600, 3200) when shooting in Program Auto Mode to adjust sensitivity to your shooting conditions.

- **Histogram Display**: Histogram display gives you more control over your images with the ability to optimize exposure adjustments for better detail in both light and dark areas of a photo.

- **Function Guide**: This beginner-friendly optional function helps navigate through the various functions and settings displaying the description of chosen functions or settings on the LCD screen.

- **Lithium-ion battery**: Included lithium-ion battery provides added convenience with longer lasting power than alkaline batteries.

- **In-Camera Retouching Tools**: Retouch and enhance your photos on the go with in-camera Trimming and Red-Eye Correction functions.

- **Multi-purpose Resize Function**: The Multi-purpose Resize function lets you change the aspect ratio of an image right in the camera from 4:3 to 16:9.

- **Picture Motion Browser ver. 4.2.01**: Sony® PMB (Picture Motion Browser) PC software provides a simple, easy-to-use way to transfer video and still images to your PC, as well as sort, edit, and output to data disc and the Web (PC with internet connection required). Finding your images with PMB is easy with Calendar view and Face Search. Face Search allows you to filter by faces (one or many) and also a specific person’s face. Share images and videos on popular sharing sites with Media Services function.
